Introduction

1.1 Overview of the Project

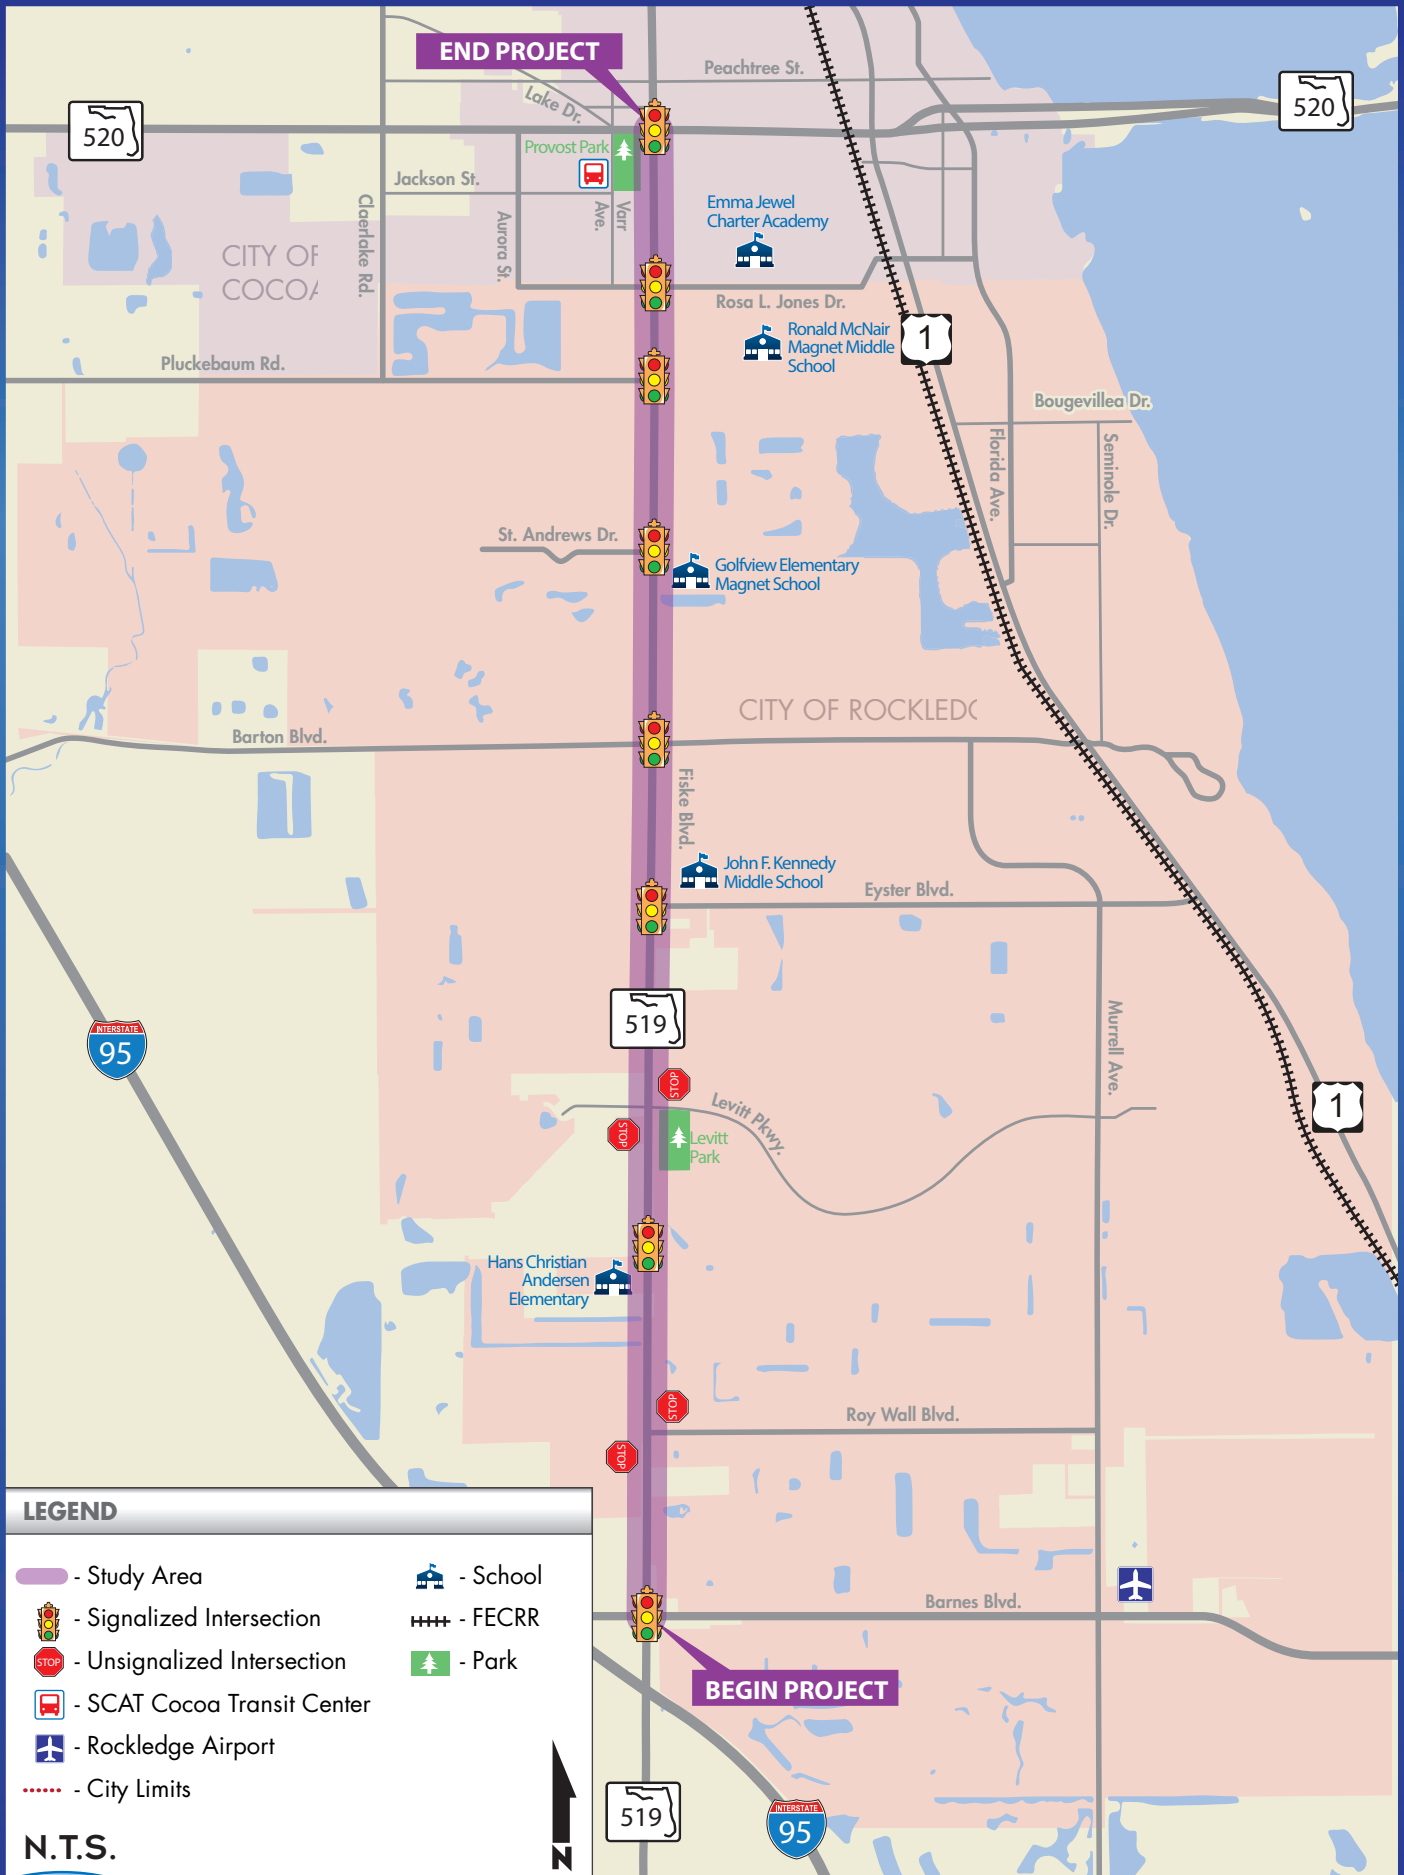

In January 2015, the Florida Department of Transportation (FDOT) began a Corridor Planning Study for State Road (SR) 519 (Fiske Boulevard) between the Barnes Boulevard / I-95 northbound ramps and SR 520 in Brevard County, Florida. The 4.2-mile section of Fiske Boulevard is depicted in Figure 1.

This project was requested by the Cities of Cocoa and Rockledge to coordinate and develop a multimodal vision for the Fiske Boulevard study corridor. The study involved a community based evaluation to determine how best to meet the needs of the current and future users, and to establish a long-term plan to guide evolution of the corridor that appropriately correlates the balance between land use and transportation planning. This project was coordinated with local and regional agency partners, such as Space Coast Transportation Planning Organization (SCTPO), Brevard County, the Cities of Cocoa and Rockledge, Space Coast Area Transit (SCAT), the Brevard County School Board, and the City of Cocoa Diamond Square Community Redevelopment Agency (CRA) to develop the improvement strategies that establish a more multimodal urban environment utilizing a context-sensitive approach.

1.2 Purpose of this Report

The purpose of this report is to document all of the outreach conducted and the feedback that was received for this project.

Chapter 2 of this report will summarize the public outreach that was conducted as part of this study. Chapter 3 presents the evaluation of the Public Involvement Plan to determine the effectiveness/extent of the project's outreach efforts.

2

Summary of Study Outreach Efforts

2.1 Introduction

A Public Involvement Plan (PIP) was developed at the onset of the study to assist FDOT in developing a project that meets the needs of the community in addition to gaining greater acceptance and support for the project. Activities implemented as part of the PIP allowed people living and working in the Fiske Boulevard study area, and other interested parties to contribute to the decision-making process. The goal of the PIP was to generate interest in the project scope and schedule, and to outline the public input process.

The PIP ensured that the public, local agencies and elected officials, and other interested parties understand the nature of the project and its benefits by providing an open, two-way line of communication, presenting project information in an easy-to-understand format, and by making all project information readily accessible.

The following goals pertaining to public involvement and the outreach process were established early in the study:

Goal 1: Early and Consistent Involvement

Involve elected officials, agency groups, stakeholders and the public early and regularly in the study during each of the three key stages of involvement:

- A. *Informational Stage.* Inform elected officials, agency groups, stakeholders and the public of the study's purpose, timeline, and major milestones, as well as how they can get involved and stay informed as the study progresses.
- B. *Decision-Making Stage.* Identify specific opportunities for the elected officials, agency groups, stakeholders and the public to provide input at key decision-making points that will affect the development of study deliverables.
- C. *Review Stage.* Allow elected officials, agency groups, stakeholders and the public to review and provide input on a draft version of the completed products.

Goal 2: Opportunity

Provide elected officials, agency groups, stakeholders and the public with the opportunity to participate in all phases of the public involvement process, with a focus on engaging traditionally under-represented or under-served populations, including, but not limited to transportation disadvantaged, minority, elderly, etc.

Goal 3: Information and Communication

Provide elected officials, agency groups, stakeholders and the public with clear, timely and accurate information relating to the study as it progresses.

Goal 4: Range of Techniques

Use a broad-spectrum of techniques to gather input from a diverse population within the study area.

The following sections summarize the outreach methods used during the study to reach the goals set by the PIP. The PIP is provided in Attachment A.

2.2 Project Visioning Team

The Department assembled a Project Visioning Team (PVT) to help provide guidance and direction for study. By involving and interacting with the PVT, local needs, issues and concerns were identified and addressed proactively. The PVT consisted of staff representatives from:

- FDOT
- SCTPO
- City of Cocoa
- City of Rockledge
- Brevard County
- Brevard County Health Department
- Brevard County Public Schools
- SCAT
- East Central Florida Regional Planning Council
- Local Resident Representative

The PVT met three times throughout the project to review information provided by the team and to offer input on key components of the study based on each agency's plans and positions. Prior to the public meetings, the PVT provided guidance on the materials to be presented and assisted the project team in distributing and publicizing meeting announcements.

In addition to the regular PVT meetings, a separate meeting was held with the City of Cocoa and Cocoa CRA representative on November 25, 2015 at the Cocoa City Hall to discuss the proposed alternatives within the Cocoa portion of the study corridor.

The meeting summaries are included in Attachment B.

2.3 Study Mailing Notification List

As part of the notification process for the public meetings that were held for this study, a contact list of all property owners located within or adjacent to the defined study area was developed. A copy of the mailing list is provided in Attachment C.

2.4 Project Website

The project website, housed on FDOT's CFLRoads site (http://www.cflroads.com/project/437241-1/SR_519_Fiske_Boulevard_Corridor_Planning_Study) was created as a "living" documentation of the study's outreach activities and technical work. The site includes: the PIP, meeting materials and summaries, and project reports. As the materials were approved and finalized, the website was updated for easy public access. Website updates occurred throughout the study.

As of October 3, 2016, the website received 373 unique hits and 628 page views.

The screenshot shows the FDOT Central Florida Roads website. The main heading is "437241-1 SR 519 / Fiske Boulevard Corridor Planning Study". Under the "About" section, it states: "This corridor planning study is designed to evaluate multi-modal transportation improvements along a 4.2 mile section of SR 519 between the Barnes Boulevard/I-95 northbound ramps and SR 520 in Brevard County, Florida. The corridor is located within both the Cities of Rockledge and Cocoa, and is a primary north-south route between Viera, I-95 and SR 520; serving local traffic as well as many visitors. Based on input from agency partners, this study will involve a community-based evaluation to determine how best to meet the needs of current and future users, and to establish a long-term plan to guide evolution of the corridor that appropriately correlates the balance between land use and transportation planning." The "Project Files" section lists various documents and meetings, including "Existing Conditions Report (04-13-2015)", "Project Visioning Team Meeting (05-05-2015)", "Public Alternatives Workshop Meeting Boards (03-15-16)", "Public Alternatives Workshop Meeting Roundabout Info Sheet - English Version (03-15-16)", "Public Alternatives Workshop Meeting Roundabout Info Sheet - Spanish Version (03-15-16)", "Public Involvement Plan (08-2015)", "Public Kick-off Meeting (08-25-2015)", "SR 519 (Fiske)", "Public Alternatives Workshop Roundabout Video 1 (3-15-16)", and "Public Alternatives Workshop Roundabout Video 2 (3-15-16)". The "Project Details" sidebar shows: Phase: Planning, Work Type: Traffic Study, City: Cocoa, Rockledge, County: Brevard, Road: I-95, SR 519, SR 520. The "Contact Information" sidebar lists Project Manager: Judy Pizzo, (386) 943-5167, Judy.Pizzo@dot.state.fl.us, and a button to "Ask a Question". The "Last Updated" section shows "- 6 months ago".

2.5 Public Meetings

Two public meetings (Public Kick-off Meeting and Alternatives Public Workshop) were held to solicit input from any and all interested parties that wished to actively engage in the planning process. The meetings were advertised in accordance to the FDOT public information process in coordination with District 5 Public Information Office, and following Section 120.525 of the Florida Sunshine Law.

2.5.1 Public Kick-off Meeting

The Public Kick-off Meeting was held on Tuesday, August 25, 2015 from 5:30 pm to 7:30 pm at the City of Rockledge City Hall Chambers. The meeting was held in an open house format with display boards and a handout for the public to review and discuss with the study team. There was a formal presentation given during the meeting as an open forum where attendees could ask questions of the presenter throughout the presentation. Approximately 70 people attended the public meeting. The objective of the meeting was to accomplish the following goals:

- Introduce the public to the overall project, and the goals and objectives
- Provide an overview of the existing conditions analysis findings
- Gain consensus on the Purpose and Need and Guiding Principles
- Receive input on issues along the corridor not identified in the existing conditions analysis
- Begin the discussion of potential alternatives to address identified issues

A summary of the meeting, which includes notices, materials presented at the meeting, and comments and responses are included in Appendix D.

2.5.2 Alternatives Public Workshop

The Alternatives Public Workshop was held on Tuesday, March 15, 2016 from 5:30 pm to 7:30 pm at the Cocoa Civic Center located in Cocoa, Florida. The meeting was held in an open house format with display boards and a handout for the public to review and discuss with the study team. There was a formal presentation given during the meeting followed by a question and answer session. Approximately 32 people attended the public meeting. The objective of the meeting was to accomplish the following goals:

- Provide an overview of the overall project and the goals and objectives
- Provide an overview of the Purpose and Need
- Introduce the public to the conceptual alternatives
- Receive input on the conceptual alternatives

A summary of the meeting, which includes notices, materials presented at the meeting, and comments and responses are included in Appendix E.

2.6 Small Group Meetings

2.6.1 Agency Meeting

Following the alternatives public workshop, the study team presented the final study findings to the SCTPO committees during the regularly scheduled meetings. The City of Rockledge and SCTPO requested a small group meeting, held on August 22, 2016, to discuss the recommendation for improving the intersection of Roy Wall Boulevard and Fiske Boulevard with a roundabout. In attendance at the meeting was representatives from FDOT, the City of Rockledge, Brevard County, and SCTPO. Full details about the meeting are included in Appendix F.

2.7 Public Comments

Public comments provided outside of the two public workshops, not during a meeting comment period, are included in Appendices D and E.

3

Evaluation of the Public Involvement Plan

3.1 Evaluation of the Public Involvement Plan

As documented in the PIP, evaluation measures were established at the beginning of the study to evaluate the effectiveness of the public involvement process. These evaluation measures and results are detailed in Table 1.

Table 1: Public Involvement Measures for Success & Results

Objectives	Measures for Success	Results
Provide multiple opportunities for affected citizens and stakeholders to help define the transportation System through the public involvement process.	Public meetings were widely advertised in a timely manner with sufficient material for the public to be informed on the project.	Over 100 members of the public attended two public meetings
	Public meetings were conveniently located and the meeting times were acceptable to 75% of the invitees or participants.	Meetings were held within the Cities of Rockledge and Cocoa government facilities, near the corridor.
	Public input is captured, documented and responded (when necessary).	Meeting notes, comments and comment cards, and responses to comments are included in each meeting summary and posted on the project website.
Public with disabilities have access to project related information and stakeholders have the ability to participate fully in the public process.	All disabled persons that requested accommodations were satisfied with efforts made to accommodate their needs. 100% compliance is required.	No disabled person requested accommodations at any point during the course of this study. In the event of such a request, all notification materials and emails contained Title VI and Americans with Disabilities Act contact information.
Diversity of participation in the development of the public development and information process.	The representatives attending the public involvement meetings reflect the demographics for the area (age, race/ethnic, income, gender and employment).	A majority of meeting participants live and work along the corridor.

Objectives	Measures for Success	Results
	The Project Visioning Team is comprised of similar demographics for the area (age, race/ethnic, income, gender and employment).	The PVT was made up of members from the Cities of Cocoa and Rockledge, Cocoa CRA, SCTPO, Brevard County, the Regional Planning Council and the residents along the corridor. Health and safety organizations were invited to participate as members of the PVT.
Ensure that the public information disseminated is clear, informative, timely, adequate and in plain language.	At a minimum 75% of the public meeting attendees agree that the information provided by FDOT was clear.	Materials were presented in plain English, in line with FDOT’s “Plain English” requirement.
	90% of the affected parties feel that sufficient notice was provided at public meetings.	Public notices were distributed at various stages of the project. Mailers were mailed between 3 and 4 weeks prior to the meeting, newspaper ads were advertised 2-weeks prior to the meeting, and emails, flyers, etc. were sent out at least one week prior to the meeting.
	At a minimum 75% of the public meeting attendees agree that the public information and presentation was adequate.	Materials were presented in plain English and easy to read formats. Complex ideas were graphically displayed with explanations of concepts from project team members.
Ensure that the public inquiries were responded to in a timely manner.	Responses to the public inquiries were made within two (2) business days from the date received.	Every attempt was made to respond to the public inquiries within two business days from the date received; however, some responses required additional time and research. Those responses were made as soon as possible.
	Responses to the public inquiries were made within one (1) business day from the date received.	Every attempt was made to respond to the public inquiries within one business day from the date received; however, some responses required additional time and research. Those responses were made as soon as possible.
Obtain resolutions of support for Brevard County, City of Rockledge, and City of Cocoa	Receive local agency acceptance of what FDOT can and cannot do to improve the operations and safety of the corridor.	City of Rockledge expressed concern for a roundabout located at Roy Wall Boulevard. All other recommendations were accepted by City of Cocoa, Rockledge and SCTPO.
	Obtain support for the project by verbal or written communications received from local agencies. Surveys can be used to obtain feedback and will be sent after the alternatives and final deliverables.	City of Cocoa, Rockledge and SCTPO agreed to accept final recommendations with the provision that a full signal warrant study be conducted at the intersection of Roy Wall boulevard during the Concept Development phase of the project. FDOT agreed and is currently preparing the Concept Development Scope in coordination with the Cities of Cocoa and Rockledge and the SCTPO.
	Receive executed resolutions of support from the Cities and County after the final deliverable.	N/A until completion of Concept Development phase.

3.2 Public Involvement during the Next Phase of the Project

It is anticipated that the appropriate level of public involvement activities will be conducted throughout all subsequent project phases including the Concept Development. These public involvement activities may include additional coordination meetings with local government and environmental permitting agencies, public meetings, work sessions, small group meetings, and public hearings, as directed by the FDOT.

SR 519 (Fiske Boulevard)

Corridor Planning Study

Brevard County, Florida

Project FM No.: 437241-1-12-01

Contract Number: C-9C62

PUBLIC INVOLVEMENT PLAN

Prepared For: Florida Department of Transportation, District Five

August 2015

PUBLIC INVOLVEMENT PROGRAM

Project Name: SR 519 (Fiske Boulevard) Corridor Study

Project Limits: The study area includes a 4.2-mile section of SR 519 (Fiske Boulevard) between the Barnes Boulevard / I-95 northbound ramps and SR 520 in Brevard County, Florida.

County/State: Brevard County, Florida

Financial Management No.: 437241-1-12-01

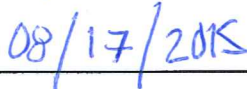

In accordance with Part 1, Chapter 11 of the Project Development Environmental (PD&E) Manual, this Public Involvement Plan is submitted to the District Environmental Management Office (DEMO) for his/her review and approval.

Submitted by:

Fabricio Ponce, PE - Project Manager

Date:

08/17/2015

PUBLIC INVOLVEMENT PLAN

SR 519 Corridor Study

Financial Project ID Number: 437241-1-12-01

Public involvement includes communicating to and receiving information from all interested persons, groups, and government organizations regarding the development of a project. This Public Involvement Plan (PIP) will outline the process to be taken to ensure the appropriate level of public involvement is performed for this project in compliance with the Florida Department of Transportation's (FDOT) Project Development and Environmental (PD&E) Manual, Part 1, Chapter 11, and Part 2, Chapter 9; the FDOT Public Involvement Handbook; Section 339.155, Florida Statutes; Executive Orders 11990 and 11988; Council on Environmental Quality Regulations for Implementing the Procedural Provisions of the National Environmental Policy Act (NEPA); and 23 Code of Federal Regulations (CFR) 771. The results of the PIP will be supportive of the NEPA process and local needs.

Successful public involvement is about building trust, understanding and consensus. It is also necessary to reach a broad consensus on public infrastructure investments. This requires a process that is characterized by technical competence, honesty and integrity, and good listening. These principles will create the framework for the public involvement that will occur for the SR 519 Corridor Study.

I. PURPOSE OF THE PUBLIC INVOLVEMENT PLAN

Activities implemented as part of this PIP will allow people living and working in the SR 519 Corridor study area, and other interested parties to contribute to the decision-making process. The goal of the PIP is to generate interest in the project scope and schedule, and to outline the public input process.

The PIP ensures that the public, local agencies and elected officials, and other interested parties understand the nature of the project and its benefits by providing an open, two-way line of communication, presenting project information in an easy-to-understand format, and by making all project information readily accessible.

Gaining community consensus among the varied stakeholders in the study area is essential to achieving a successful project outcome. The keys to gaining community consensus are:

- Include key stakeholders early in the project scoping;
- Feature a wide range of multimodal transportation improvements;
- Develop a transparent process to screen the improvements; and
- Maintain regular communications with the key stakeholders. This consensus will be critical to moving the selected improvements into the Project Design and Engineering phase.

Public involvement efforts will seek to truly involve key stakeholders; to listen to ideas and concerns; and to document and incorporate input received during the study process. The PIP also will ensure that the study reflects the diverse values and needs of the communities this project is designed to benefit.

The fundamental objectives of the PIP are to ensure that the concerns and issues of those with a stake in the study area are identified; that stakeholders are given opportunities to review and comment on the findings of the Corridor Study; and that stakeholder concerns are addressed in the analysis process. The PIP provides for:

- Early and continuous involvement of stakeholders;
- Reasonable availability of technical and other project information;
- Collaborative input on multimodal transportation improvements for the study area and the criteria against which they will be measured and evaluated; and
- Open access to the decision-making process.

II. TEAM ORGANIZATION AND COORDINATION

To ensure an all-inclusive public involvement process, a Project Visioning Team (PVT) team will support and participate in the study process and will consist of:

- **Project Management Team:** The Project Partners consist of FDOT, City of Cocoa, City of Rockledge, Brevard County, Space Coast Transportation Planning Organization (TPO), and Space Coast Area Transit (SCAT). This group will meet to discuss key milestones of the study.
- **Project Partners:** The Project Management Team (PMT) will be involved in the daily management, work tasks and technical assistance, and will meet at key milestones of the study. The PMT will be composed of the FDOT District Five project manager and key agency staff, and the Consultant Team.
- **Consultant Team:** The Consultant Team will conduct day-to-day study activities and manage the study schedule and budget. FDOT will provide technical data and internal reviews.

III. DESCRIPTION OF PROPOSED IMPROVEMENT

Contract No.	C-9C62
Financial Project No.:	437241-1-12-01
Project Limits:	SR 519 (Fiske Boulevard) between the Barnes Boulevard / I-95 northbound ramps and SR 520 in Brevard County, Florida (<i>see Figure 1</i>)
Project Length:	4.2 miles
Project Schedule:	14 months
Proposed Activity:	<ul style="list-style-type: none">• Establish a multi-modal approach to providing for future transportation needs along the corridor;• Establish a long-term plan to guide evolution of the corridor that appropriately correlates the balance between land use and transportation planning.

Figure 1: SR 519 Study Corridor

IV. PROJECT BACKGROUND

State Road (SR) 519 (Fiske Boulevard), between the Barnes Boulevard / I-95 northbound ramps and SR 520 in Brevard County, Florida, is a 4.2 mile section of roadway. The roadway is a five (5) lane arterial with paved shoulders and curb and gutter south of Rosa L. Jones Boulevard, while there is a paved shoulder and no curb/gutter or open swale drainage north of Rosa L. Boulevard. The posted speed is 45 miles-per-hour (mph) throughout the corridor and is located within both the City of Rockledge and the City of Cocoa. Travel lanes are generally narrow in each direction separated by a center two-way left turn lane.

This project has been requested by the Space Coast TPO, Brevard County and the Cities of Rockledge and Cocoa to coordinate the development of a future vision for SR 519 that establishes a multi-modal approach to providing for future transportation needs. This study will involve a community-based evaluation to determine how best to meet the needs of current and future users, and to establish a long-term plan to guide evolution of the corridor that appropriately correlates the balance between land use and transportation planning.

In general, the character of the corridor is transitional and mostly developed with commercial land uses and residential subdivisions with consolidated primary access to SR 519. In addition, there are seven churches, two parks (Schultz park and Provost Park), and three public schools (John F. Kennedy Middle School, Hans Christian Andersen Elementary, and Golfview Elementary Magnet School) along this corridor, with a few parks and schools located in close proximity. There are eight (8) signalized intersections: Barnes Boulevard/I-95 ramps, Hans Christian Andersen Elementary crosswalk, Eyster Boulevard, Barton Boulevard, St. Andrews Drive, Pluckebaum Road, Rosa L. Jones Boulevard, and SR 520.

There are mostly continuous undersized sidewalks along both sides of the corridor with a few gaps, as well as no marked bicycle lane. Space Coast Area Transit (SCAT) operates two routes within this corridor, Routes 1 and 6. Transit stops are marked with signage and benches (no shelters) along both sides of SR 519.

SR 519/Fiske Boulevard is a primary north-south route between Viera, I-95 and SR 520, serving local traffic as well as many visitors. Based on input from agency partners, this study will also consider the pedestrian interactions between the schools and neighborhoods, as well as the Provost Park and neighborhoods to the north.

V. PROJECT GOALS

The purpose of this Corridor Planning Study is to develop alternatives and strategies that identify a range of multi-modal solutions to address the mobility needs within a context, which reflects the long term vision for the study corridor – establish a more walkable urban environment utilizing a context-sensitive approach. The details of the study will be developed in an environment that encourages input and collaboration from stakeholders, as well as from various departments within FDOT, which may include, project development, traffic operations, design, and maintenance. The implementation plan developed as part of this project’s Corridor Management Plan, will include long-term strategies that guide future development within the corridor, as well as specific improvements that can potentially be advanced in the near term through local agency participation and/or by FDOT as Resurfacing, Restoration, Rehabilitation (3-R) projects, safety enhancements or push-button projects, such as traffic operations signal re-timing projects. The key objectives of the SR 519 Corridor Study are to:

- Establish a multi-modal approach to providing for future transportation needs along the corridor;
- Establish a long-term plan to guide evolution of the corridor that appropriately correlates the balance between land use and transportation planning.

VI. PUBLIC OUTREACH GOALS

Public outreach includes communicating to and receiving information from all interested persons, groups and government organizations, and providing information regarding the development of the SR 519 Corridor Study.

Four overarching goals pertaining to the public involvement and outreach process for the SR 519 Corridor Study have been identified:

Goal 1: Early and Consistent Involvement

Involve elected officials, agencies, stakeholders and the public early and regularly in the study during each of the three key stages of involvement:

- A. *Informational Stage.* Inform elected officials, agencies, stakeholders and the public of the study’s purpose, timeline, and major milestones, as well as how they can get involved and stay informed as the study progresses.
- B. *Decision-Making Stage.* Identify specific opportunities for the elected officials, agencies, stakeholders and the public to provide input at key decision-making points that will affect the development of study deliverables.
- C. *Review Stage.* Allow elected officials, agencies, stakeholders and the public to review and provide input on a draft version of the completed products.

Goal 2: Opportunity

Provide elected officials, agency groups, stakeholders and the public with the opportunity to participate in all phases of the public involvement process, with a focus on engaging traditionally under-represented or under-served populations, including, but not limited to transportation disadvantaged, minority, elderly, etc.

Goal 3: Information and Communication

Provide elected officials, agency groups, stakeholders and the public with clear, timely and accurate information relating to the study as it progresses.

Goal 4: Range of Techniques

Use a broad-spectrum of techniques to gather input from a diverse population within the study area. To ensure that the above goals are met, a wide range of public involvement and outreach techniques is proposed for use during the course of the SR 519 Corridor Study.

Title VI of the Civil Rights Act of 1964 prohibits discrimination on the basis of race, color, and national origin in programs and activities receiving federal funds. In addition to consideration of minority and low-income persons required by Title VI, other groups of traditionally under-represented or under-served populations, such as older adults and transit-dependent persons, will be invited to participate in this study.

VII. PUBLIC INVOLVEMENT OPPORTUNITIES

A Corridor Planning Study represents the ideal opportunity to engage local and regional project stakeholders in the identification of issues, establishment of planning goals, and project visioning leading to the identification of potential improvement alternatives. Collaboration with the public and project stakeholders to seek input into the development of the *Corridor Alternatives and Strategies Report* is an essential part of this project.

DEPARTMENT AND STAKEHOLDER KICK-OFF MEETING: An agency kick-off meeting will be held on April 2015 with the Department, Cities of Cocoa and Rockledge, Brevard County and Space Coast TPO. The purpose of this meeting will be as follows:

- Introduce study team members and agency stakeholders;
- Discuss the project background, purpose and need;
- Review project schedule;
- Discuss any know issues or details about the corridor;
- Choose the project branding.

FIELD REVIEW: A field review will be held prior to the Public Involvement Kick-off meeting. Attendees will include the Cities of Cocoa and Rockledge, Brevard County, the Department as well as the local agency and development partners along the SR 519 corridor. The field review will utilize SCAT's existing route on SR 519, if possible, with the goal of visiting good examples of projects, redevelopment sites, planned projects, and transportation issues that are relevant to the planning process. The majority of the tour will be conducted on foot or by carpool to various sites on the corridor to provide a range of case studies that show examples of successful development projects and lessons learned.

PROJECT VISIONING TEAM: Beginning the consensus-building process at the planning stage, stakeholder interviews will be utilized to identify the specific agency staff and other interested parties that wish to actively participate as part of a Project Visioning Team that will assist and guide the planning process throughout the study in the development of a multi-modal planning approach. The Project Visioning Team will likely consist of 15-20 members and will include representatives from the following:

- Florida Department of Transportation
- Space Coast TPO (Technical Advisory Committee, Citizens Advisory Committee, Bicycle, Trails, & Pedestrian Advisory Committee)
- City of Cocoa
- City of Rockledge
- Brevard County
- SCAT
- Chamber of Commerce

It is anticipated that the Project Visioning Team will meet three (3) times during the Corridor Planning Study, and will be coordinated by the consultant. To the extent that active local residents, businesses, or property owners wish to become engaged as stakeholders in the process, this opportunity will also be provided later in the public kickoff and public planning charrette meetings.

PUBLIC MEETINGS: Two (2) public meetings (Public Involvement Kick-off Workshop and Alternative Development Public Workshop) will be held to solicit input from any and all interested parties that wish to actively engage in the planning process.

The format of the workshop will include a brief presentation to review the study process, review existing conditions and key project issues, and to highlight samples of similar projects and /or planning techniques being considered as part of this corridor planning study. The public will be presented with key project contacts and ways that they can get involved.

The Alternatives Development Public Workshop will solicit input from the community for the implementation of the planning vision for the SR 519 corridor. This open forum will be utilized to introduce the study and present the information collected to date with regard to corridor operations, deficiencies, concerns, constraints, and opportunities, as well as to discuss and solicit input on the overall vision and scope of the study. This affords the public an opportunity to provide valuable input to the study team on these as well as additional considerations that may be important to the planning process.

- The Consultant Team will prepare and / or provide the following materials for the previously mentioned public workshops:
 - Agendas, handouts, and surveys.
 - Graphics and presentation material.
 - Contact information for interested attendees.
 - Meeting equipment set-up and tear-down.
 - Legal and / or display advertisements.
 - Letters or emails for notification of elected and appointed officials, and other interested parties.
 - News releases when applicable.
 - Summary of meeting to be provided to FDOT after the meeting.
 - Briefing and Debriefing FDOT staff.

All public involvement activities including comments received throughout the public meetings/workshops will be documented in a Comments and Coordination Package.

Meeting Facilities Evaluation: Public meeting facilities will be convenient to the study area, in a location where people normally congregate, and which are accessible to public transportation. Potential meeting sites will be visited and reviewed for suitability, including whether they are appropriate for the

meeting purpose and format, and whether they comply with the requirements of the Americans with Disabilities Act of 1990.

Special considerations will also be given to ensure the facility complies with the 2005 Jessica Lunsford Act. Facilities to be considered include community centers, churches, and other public facilities. The Department will approve the site selection in advance of each meeting.

AGENCY/STAKEHOLDER COORDINATION (Space Coast TPO): An update presentation will be given to the TPO Board, Committees, and Subcommittees listed previously.

OTHER STRATEGIES EMPLOYED:

- In accordance with Florida Statute (F.S.) 163.3181 (2), local city and county governments follow procedures providing for effective public participation in the process of developing and/or amending local government comprehensive plans.
- Periodic evaluation of the PIP to determine effectiveness of public involvement activities.
- Documentation of comments, commitments, community issues, and continual update of this document to be passed to design project manager to prepare the Community Awareness Plan (CAP).
- FDOT/TPO liaison will communicate the status of this project at all TPO committee meetings throughout the life of the project. Feedback received by the committee members will be documented in this plan. Any adverse responses from the committee will require review and response by the Project Visioning Team.
- Distribution of flyers to major employers, grocery stores, libraries, post office, transit vehicles, and restaurants in study area.

VIII. IDENTIFICATION OF AGENCIES AND AFFECTED PUBLIC

The PIP includes conducting a formal, comprehensive community inventory to develop a study area stakeholder database. A variety of resources will be used to compile the database to include key community members and leaders who can provide information about the community, local elected and appointed officials, local agencies, property owners, businesses owners and operators, chamber of commerce leaders, neighborhood homeowner’s association (HOA) presidents, religious leaders and school principals. A detailed list of the elected and appointed officials is provided in the *Appendix*. This list will be updated to reflect changes in inter-agency collaboration, or as other public agency stakeholders are identified.

POTENTIAL CONTROVERSIES: None at this time.

IX. PUBLIC NOTIFICATION

The following techniques will be employed to notify the public of the Corridor Planning Study meetings and to facilitate an exchange of ideas and information about the project. The goal of early coordination is to incorporate community input prior to key decision points in the study. An effort will be made to solicit input from all who have an interest or stake in the proposed Corridor Planning Study. The opportunity will be provided to active local residents, businesses, or property owners whom wish to become engaged in the process.

LEGAL/DISPLAY NEWSPAPER ADVERTISEMENTS – In accordance with Section 120.525, F.S., the FDOT shall give notice of public meetings, hearings, and workshops by publication in the *Florida Administrative Register* and on the agency’s website not less than 7 days before the event. Legal/display newspaper advertisements will be published in the highest circulating newspaper in the area. Online media will be used as well, where possible. For public meetings, these advertisements shall be published 7 days prior to the date of the event. The advertisements will announce the date, time, location, and purpose of the Study’s public meetings/charrettes for the general public.

INVITATIONAL AND INFORMATIONAL LETTERS – Letters will be mailed or emailed, as appropriate, to jurisdictional agencies, elected, and appointed officials to provide information about the study and to announce public meetings two (2) weeks prior to the public meeting/workshop date. Although a public hearing is not anticipated for this project, the notification process would be followed as required by Florida. Press releases will be issued at the discretion of the FDOT Public Information Office, and may not be submitted to media outlets for all advertised events.

DIRECT MAIL LIST – The following will be contacted by direct mail in order to obtain input into the planning study process and/or to provide project information.

- All individuals owning and/or occupying property within the project study area. This includes all individuals owning and/or occupying property within 300 feet of the existing SR 519 right-of-way (as required by Section 339.155, F.S.). This list will be compiled using the most current data available from the Brevard County Property Appraiser’s Office. Notification must be made at least 21 calendar days prior to date of the event.
- Local public officials, community service organizations, local and regional transportation officials, environmental agencies and special-interest groups for each city and county affected by the project.
- Individuals, public or private groups, organizations, agencies, or businesses that request to be placed on the mailing list.

MEDIA RELEASES – Media releases shall be prepared and submitted to the FDOT’s Project Manager and the FDOT’s Public Information Officer for publication 3 to 5 days prior to the meeting and the charrette. Local newspaper, television station and radio station information is provided in the *Appendix*.

WEBSITE – A public project website presenting useful information will be developed and maintained. The site will contain project products, meeting notices, and other informational materials as appropriate. A method to provide comments on the project or ask the project manager a question will be provided. The public project website will be hosted on www.cflroads.com. In addition, a QR code will be generated and made available on any handout and/or mail-out material to allow the public the opportunity to have a direct link to specific project information on the website, making all material available to view and/or print.

SOCIAL MEDIA – Social media, such as Facebook and Twitter will be developed and maintained by FDOT. The Consultant Team will coordinate with FDOT and provide content materials for social media.

E-MAIL BLASTS AND LISTS – E-mail blasts will be used to provide stakeholders and citizens information on the study and will be coordinated with the FDOT District Five Public Information Office. This may include the following:

- Stakeholder and PVT e-mail blasts will be sent to the stakeholders and PVT members identified through the stakeholder identification process and those who volunteered to participate in the PVT. These e-mail blast will be used to keep stakeholders up-to-date on the progress of the study and will announce new content on the website, PAG meetings, public meetings and other study developments.
- Citizen e-mail blasts will be sent to all individuals who have requested to be on the study e-mail list. Individuals may join the e-mail list by signing up through the study website or social media outlets, by attending a public workshop, or through communication with study team members.

PERSONAL INTERACTION – The telephone conversations, email exchanges, and face-to-face meetings that will take place during the course of the study will also provide a method for the timely exchange of relevant information about the study. These communications will be documented and retained in the project files.

X. TITLE VI, VIII AND ADA COMPLIANCE

To assure compliance with Title VI of the U.S. Civil Rights Act of 1964, as supplemented by Title VIII of the 1968 Civil Rights Act, as amended, if minority groups are identified as an element of the concerned public, the application and implementation of public involvement techniques will be fully described in the public involvement program record. In addition, coordination with the Florida Department of Transportation’s District 5 Title VI Coordinator will take place to ensure that all of the concerns are fully addressed to comply with Title VI, Title VIII, and the Americans with Disabilities Act (ADA) of 1990.

SPECIAL OUTREACH

For those individuals with limited English proficiency, the Consultant Team will translate the most pertinent materials (study fact sheet, study map, questionnaires/comment cards – as determined to be necessary by the PMT) into Spanish. To ensure representation by these community members in the process, the Consultant Team will invite representatives from these groups to participate in the stakeholder meetings and forums.

XI. ANALYSIS AND SUMMARY OF PUBLIC COMMENTS

A Comments and Coordination Report will be developed to summarize the public meeting results and recommendations. The report also will contain the overall input

XII. PUBLIC INVOLVEMENT SCHEDULE

Below is a tentative schedule for the major public involvement activities:

Public Outreach Activities	2015												2016			
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr
Department and Agency Kick-off Meeting																
Field Visit with Stakeholders																
PVT Meetings																
Public Involvement Kick-off Workshop																
Alternatives Development Public Workshop																
Project Completion																

NOTE: Dates are approximate and subject to change.

XIII. EVALUATION OF THE PUBLIC INVOLVEMENT PLAN

In June of 2008, FDOT District 5 developed a performance based document that would ensure that all interested stakeholders have the open opportunity to participate in the transportation decision making process and that during the process, the public input is considered during all of the project development stages. As indicated in the *Performance Measures to Evaluate the Effectiveness of Public Involvement Activities in Florida* report, the following five (5) objectives should be considered during the project development and decision making process.

1. Provide equitable access to transportation decision-making.
2. Inform the public early, clearly and continuously.
3. Use a variety of methods to involve and engage the public.
4. Carefully consider public input in transportation decisions.
5. Obtain resolutions of support for Brevard County.

The following indicators or measures are used to assess the public acceptability, accessibility, sound decision-making process, educational explanation of issues, cost effectiveness of involvement, and in general public process outcome based on general feedback and comments received.

Objectives	Measures for Success	Results
Provide multiple opportunities for affected citizens and stakeholders to help define the transportation System through the public involvement process.	Public meetings were widely advertised in a timely manner with sufficient material for the public to be informed on the project.	
	Public meetings were conveniently located and the meeting times were acceptable to 75% of the invitees or participants.	
	Public input is captured, documented and responded (when necessary).	
Public with disabilities have access to project related information and stakeholders have the ability to participate fully in the public process.	All disabled persons that requested accommodations were satisfied with efforts made to accommodate their needs. 100% compliance is required.	
Diversity of participation in the development of the public development and information process.	The representatives attending the public involvement meetings reflect the demographics for the area (age, race/ethnic, income, gender and employment).	
	The Project Visioning Team is comprised of similar demographics for the area (age, race/ethnic, income, gender and employment).	
Ensure that the public information disseminated is clear, informative, timely, adequate and in plain language.	At a minimum 75% of the public meeting attendees agree that the information provided by FDOT was clear.	
	90% of the affected parties feel that sufficient notice was provided at public meetings.	
	At a minimum 75% of the public meeting attendees agree that the public information and presentation was adequate.	
Ensure that the public inquiries were responded to in a timely manner.	Responses to the public inquiries were made within two (2) business days from the date received.	
	Responses to the public inquiries were made within one (1) business day from the date received.	
Obtain resolutions of support for Brevard County	Receive local agency acceptance of what FDOT can and cannot do to improve the operations and safety of the corridor.	
	Obtain support for the project by verbal or written communications received from local agencies. Surveys can be used to obtain feedback and will be sent after the alternatives and final deliverables.	
	Receive executed resolutions of support from the City and County after the final deliverable.	

The Public Involvement Program is considered a fluid document and will be updated throughout the study process as necessary.

XIV. PUBLIC INVOLVEMENT DURING THE NEXT PHASES OF THE PROJECT

It is anticipated that the appropriate level of public involvement activities will be conducted throughout all subsequent phases of the study. These public involvement activities may include additional coordination meetings with local government and environmental permitting agencies, public meetings, work sessions, small group meetings, and public hearings as directed by the FDOT

The SR 519/Fiske Boulevard Project Visioning Team (PVT) Kick-off Meeting was held on Tuesday, May 5, 2015 at the City of Rockledge Council Chambers. The objective of the PVT meeting was to accomplish the following goals:

- Meet the PVT members and establish their roles in this study.
- Provide an overview of the corridor.
- Elicit feedback from the PVT to identify issues and concern along the corridor.
- Tour the corridor.

The session began with a presentation from John Moore, the FDOT Project Manager, and Rohan Sadhai with VHB. Mr. Moore began the meeting by introducing himself and the VHB project team, and gave the PVT members the opportunity to introduce themselves to the group. That was followed by a brief overview of the study area, project background, and a description of the primary goal of the study which is to identify a range of multi-modal solutions to address the mobility needs within a context that reflects the long term vision for the corridor.

Mr. Sadhai then provided an overview of the project schedule as follows:

- Phase 1 – Planning Phase – Define the problem (Feb – May 2015)
- Phase 2 – Planning Phase – Define the purpose and need (May – Aug 2015)
- Phase 3 – Planning Phase – Define/select alternatives (Aug – Mar 2016)

Mr. Sadhai followed by providing a preliminary overview of the corridor's existing conditions. The key points he presented are as follows:

- Fiske Boulevard is comprised of a rural cross section to the south, and an urban cross section to the north.
- Residential is the predominant land use within the study area, encompassing over 40% of land.
- There are three schools within the corridor study area – Hans Christian Andersen Elementary, Golfview Elementary Magnet School and John F. Kennedy Middle School. Each school has different start and dismissal times.
- The northern section of the study area, primarily located in the City of Cocoa, has the highest concentration of residents below poverty level within the study area.

Following the overview, the focus of the presentation shifted to receiving input from the PVT members in attendance. Following is a summary of the input received from the PVT members:

- There are severe traffic issues during school start and dismissal times – especially at Hans Christian Andersen Elementary School. Police resources are tied up daily with assisting with traffic during AM drop-off and PM pick-up times. The City has tried to work with the School District to provide on-site circulation for car pick-off and drop-off at Andersen Elementary, but no plan ever came to fruition.
- Sidewalks on Fiske Boulevard, near John F. Kennedy Middle School, are very close to the roadway, which is not safe for kids walking to school.
- John F. Kennedy Middle School constructed a stacking lane on site a short time ago, which relieved vehicle stacking on Fiske Boulevard; the City of Rockledge expanded the cross section, which also helped alleviate vehicle stacking.
- Several PVT members expressed that the main challenge for Fiske Boulevard is the vehicle stacking at Andersen Elementary. It was suggested that Sue Hann, Director of Planning and Project Management with the School Board of Brevard County Brevard be invited to the PVT meetings.
- The Ronald McNair Magnet Middle School is located east of Fiske Boulevard, south of Rosa L Jones Boulevard. Students residing in the west side of Fiske, cross the street to get to school, and most do not use a crosswalk. Afternoon traffic backs up due to school end times, the traffic

signal cycle length, and number of children crossing Fiske Boulevard; McNair ends school at 4:15 PM.

- Several bicycle accidents have occurred in the northern portion of the corridor; specifically at Pluckebaum Road. Don Griffin explained that a large tree was located at the northwest corner of the intersection which caused vehicle/pedestrian sight-distance issues. This tree was removed approximately three months ago.
- Within the City of Cocoa's jurisdiction, a "de facto" cross-walk has been created at Barbara Jenkins Street. It was suggested that from the worn pathway crossing from Barbra Jenkins Street to Provost Park, that a midblock cross walk may be needed.
- It was suggested that we explore the population demographics within the City of Cocoa's portion of the corridor. This portion of the study area has the most pedestrians, as many residents walk to the SCAT Transit Center located behind Provost Park. Susan McGrady explained that this area of Cocoa is one of the most challenged census tracts in Florida. Golfview Elementary, Endeavour Elementary and Emma Jewel Charter School are the schools that serve this area.
- Cocoa Fire Station #2 sometimes has issues with fire trucks responding to emergency calls and needing to make a left-turnout of the station; most times there is left-turn stacking in front of the station making it extremely difficult for the trucks to make this maneuver.
- Stone Street has an unsafe condition for vehicles making a left turn onto Fiske Boulevard. There will most likely be strong political and social issues arising if a right-turn only alternative was presented as a solution for Stone Street, due to a past street closures within this neighborhood.
- PVT members explained that there is a negative perception as the corridor shifts north past Rosa L. Jones Boulevard, leaving the City of Rockledge and entering the City of Cocoa, as there are no curbs along Fiske Boulevard within the City of Cocoa's jurisdiction.
- Several PVT members suggested that a median with curb and gutter is needed in the northern area of the corridor.
- Some PVT members explained that the continuous left turn lane along Fiske Boulevard greatly contributes to the amount of accidents along the corridor, particularly near Levitt Park.
- Georgetown and Levitt Park are well established residential communities within the corridor. PVT members explained that it is extremely challenging to get home or run errands during the PM Peak Hour due to the traffic queues along Fiske Boulevard.
- The Health First facility on Fiske Boulevard provides medical services and insurance. They have an existing facility encompassing approximately 40,000 sf, across the street from the Phillips Landing residential community. Health First is currently in the process of submitting application/plans for an additional 40,000 sf building expansion. They currently have approximately 550-600 employees, and operate between the hours of 7AM to 7PM. With the building addition, there is expected to be a significant increase in trips on the corridor.
- Phillips Landing is a new residential community across the street from the Health First facility. This community is requesting a traffic light at their main entrance; however Rockledge would

like to install the traffic light at the intersection of Roy Wall Boulevard and Martin Road. The City owns some of the land around the intersection and can contribute towards the signal installation and elimination of the current east-west streets off-set.

- PVT members expressed their understanding of the limits of the corridor planning study; within FDOT's right-of-way.
- It was stated that Brevard County is responsible for maintaining canals along Fiske Boulevard.
- Drainage along Fiske Boulevard is not an issue. The area north of Barton Boulevard recently underwent significant improvements to help with drainage.
- It was suggested that the Florida Highway Patrol be invited to the PVT Meetings.
- It was explained that there is an ITS Master Plan, and that Fiske Boulevard is included within phase 2, which is approximately five years out. It was suggested that the project team review the master plan as part of this study.

After the discussion with the PVT members was completed, the session shifted focus to branding for the corridor planning study. The PVT members were shown six alternative logos to represent the project. After all six alternatives were shown, the PVT members were asked to provide input on the logos. The comments received were as follows,

- Do not use SR 519 in the logo. Use the name "Fiske Boulevard", as this is the common name for the corridor that residents are familiar with.
- Palm trees should be removed from logo #2.
- SCAT really likes logo #6.
- Logos #1 and #2 could present issues because it could appear as if a cross-section alternative has already been identified.
- The majority of the PVT members liked logo #4 but requested that a bus be added to the design.

Once the presentation session ended, the PVT members went on a guided-tour of the corridor. SCAT provided a bus to transport the members. The tour began along the southern end of Fiske Boulevard and Barnes Boulevard, and headed north along the corridor. Following is a summary of the tour:

- The first stop was at the intersection of Roy Wall Boulevard and Martin Road, in front of Health First. The stop here was to observe the existing bus stop accessibility condition, existing cross-section and sidewalks.
- The second stop was across the street from Hans Christian Andersen School, to observe the car stacking within the corridor, trail and cross walk conditions.
- The site visit then continued north along Fiske Blvd and stopped at Levitt Park. The PVT observed traffic conditions around the intersection and the existing bus stop conditions.

- The fourth stop occurred just north of the Barton Boulevard intersection to observe potential mid-block crossings from the residential development on the west side of Fiske Boulevard.
- The fifth stop occurred at the Pluckebaum Road intersection to observe traffic, operational, and design conditions. Pluckebaum Road was identified as one of the higher bicycle/pedestrian accident intersections.
- The site visit concluded at Provost Park to observe the existing conditions around the SCAT Transit Center, Community Action Agency, and the affordable housing east of Fiske Boulevard.

The tour and kick-off meeting concluded with a return trip back to the Rockledge City Hall.

Next Steps:

- Meet with Susan Hann from the Brevard County School Board. *This meeting was held on May 14, 2015.*
- Complete Existing Conditions Report. Once completed and approved by FDOT, circulate to PVT members. The Draft Report is expected to be completed early June.
- Begin preparations for the next PVT meeting and first public workshop. Both are expected to take place in the July/August time period.

Fiske Boulevard (SR-519) Corridor Planning Study

Project Visioning Team Kickoff

May 5, 2015

Rockledge City Hall, Council Chambers

1600 Huntington Lane

Rockledge, FL 32955

1:00 pm – 4:00 pm

1. Introductions
 - a. FDOT staff
 - b. VHB staff
 - c. PVT members

2. Project Background and Goals

3. Project Approach
 - a. Define the Problem
 - b. Define Purpose and Need
 - c. Define and Select Alternatives
 - d. Alternative Assessment and Evaluation
 - e. Corridor Development Plan
 - f. Role of PVT and Public Workshops

4. Overview of Existing Conditions
 - a. Demographics
 - b. Existing Land Use
 - c. Future Land Use
 - d. Traffic Characteristics
 - e. Transit Characteristics
 - f. PVT Feedback: What are the Known Issues?

5. Project Branding
 - a. Review of five conceptual project logos
 - b. Select preferred logo

6. Field Review (2:00 – 4:00pm)

Fiske Boulevard (SR 519) Corridor Planning Study

Presented to
Project Visioning Team

Kickoff Meeting
May 5, 2015

Meeting Agenda

1. Introductions
2. Project Background and Goals
3. Project Approach
4. Overview of Existing Conditions
5. Project Branding
6. Field Review (2:00 – 4:00pm)

Project Visioning Team Overview

- PVT Responsibilities
 - Three (3) meetings during key project milestones
 - Identify stakeholders that need to be engaged
 - Provide input on the planning and concept development process,
 - Recommend corridor alternatives to be advanced for further study.
 - Share your local knowledge and history

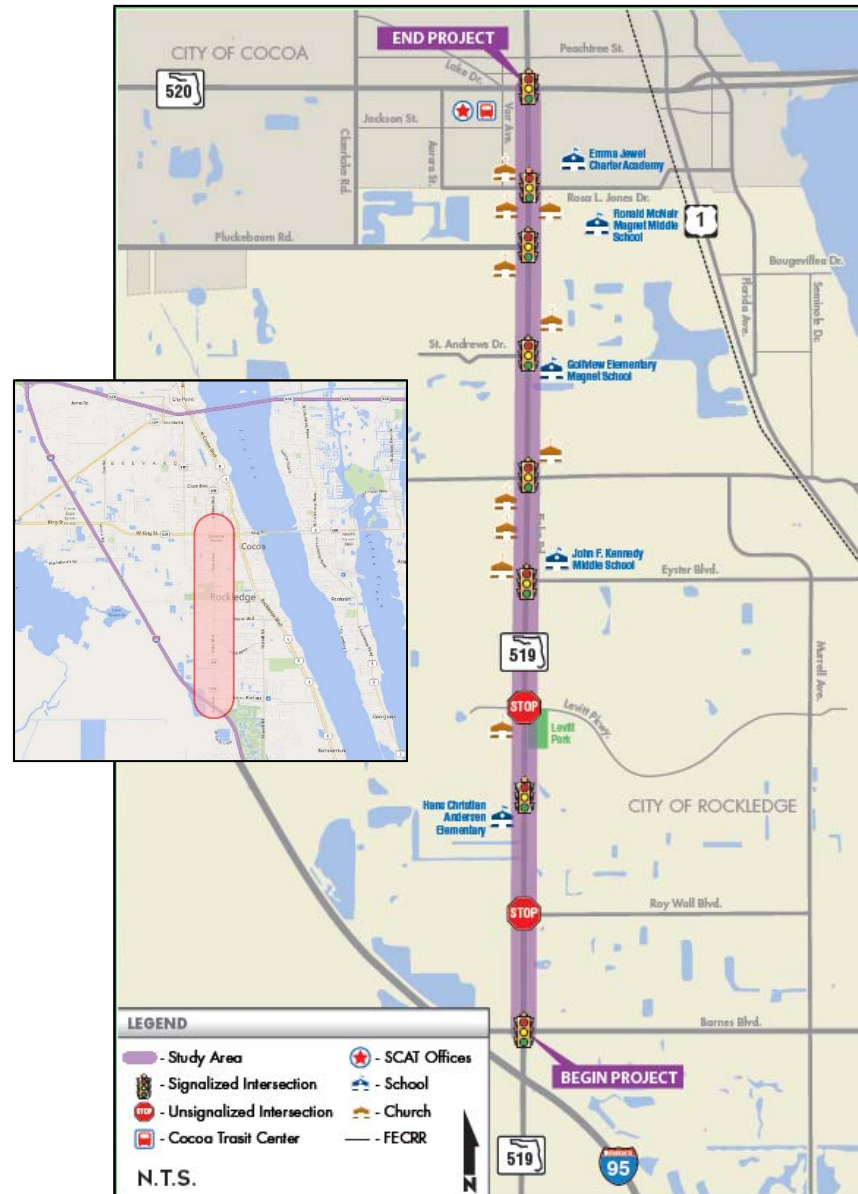

Project Background and Goals

- Project requested by the TPO and Brevard County to coordinate the development of a future vision for SR 519 that establishes a **multimodal approach** to providing for future transportation needs.
- Community-based evaluation to determine how best to meet the **needs of current and future users**.
- Establish a long-term plan to guide evolution of the corridor that appropriately correlates the **balance between land use and transportation planning**.

Study Area

- From Barnes Boulevard/I-95 NB Ramps to SR 520
- 4.2 miles
- Transitional character, varying cross sections
- Primary north-south route between I-95 and SR 520
- Viera connection

Project Approach

- 14 month schedule (“living document”)

*Planning Phase
– Define the
Problem*

Feb – May 2015

*Planning Phase –
Define the
Purpose and
Need*

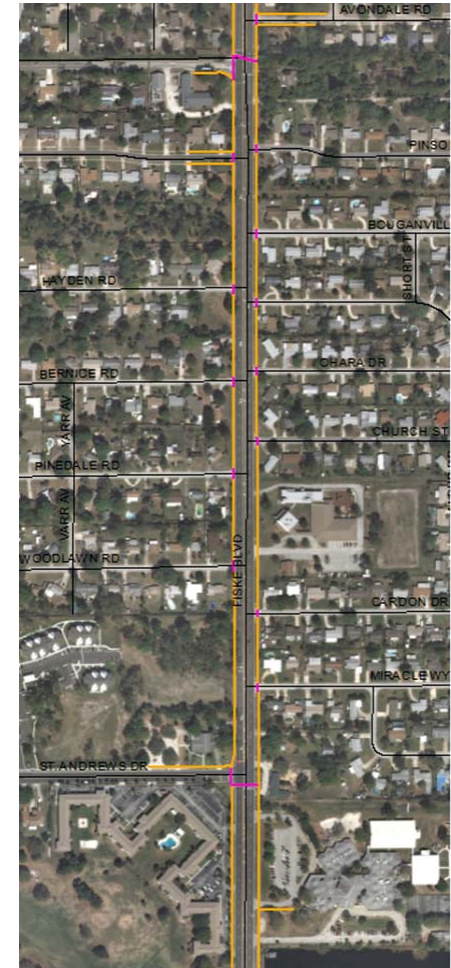

May – Aug 2015

*Planning Phase
– Define and
Select
Alternative(s)*

Aug – March 2016

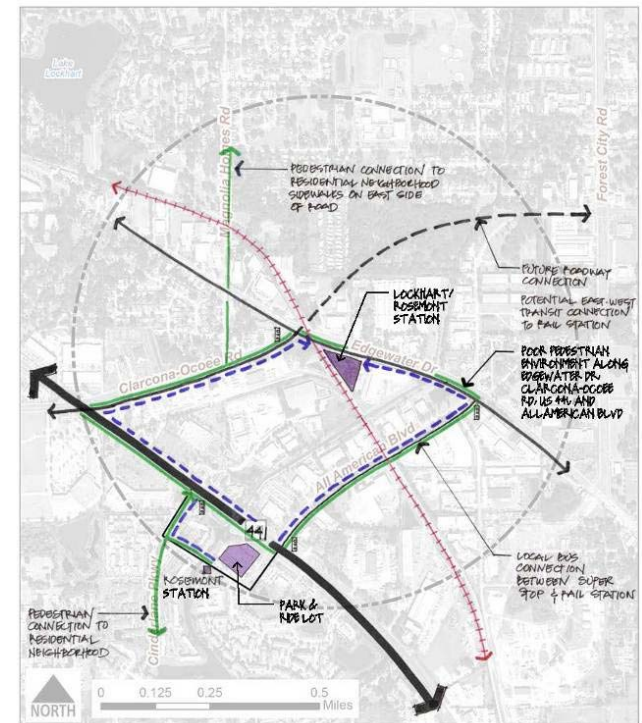

1.0 Planning Phase – Define the Problem

- Public Involvement Plan
- **Project Visioning Team Meeting #1 - Kickoff**
- Existing Conditions Report
 - Data Collection
 - Existing Travel Demand Characteristics
 - Existing Corridor Operations
 - Safety Assessment
 - Land Use and Community Characteristics
 - Issues/Constraints Identification
- Deliverable: Corridor Existing Conditions Report

2.0 Planning Phase – Define the Purpose and Need

- Needs Assessment
- Future Conditions Summary
- **Project Visioning Team Meeting #2**
 - Review existing conditions and key project issues
 - Identify potential improvement alternatives
- **Public Involvement Kick-Off Workshop #1**
 - Highlight existing and future conditions
 - Identify potential alternatives to be considered
 - Samples of similar projects or planning techniques
- Deliverable: Purpose and Need Report

3.0 Planning Phase – Define and Select Alternative(s)

- Alternatives Brainstorming
 - Initial Alternatives
 - Viable Alternatives
 - Alternatives Development Public Workshop
 - Preliminary Engineering/Environmental/Costs Assessment
 - Deliverable – Conceptual Plans

- **Project Visioning Team Meeting #3**

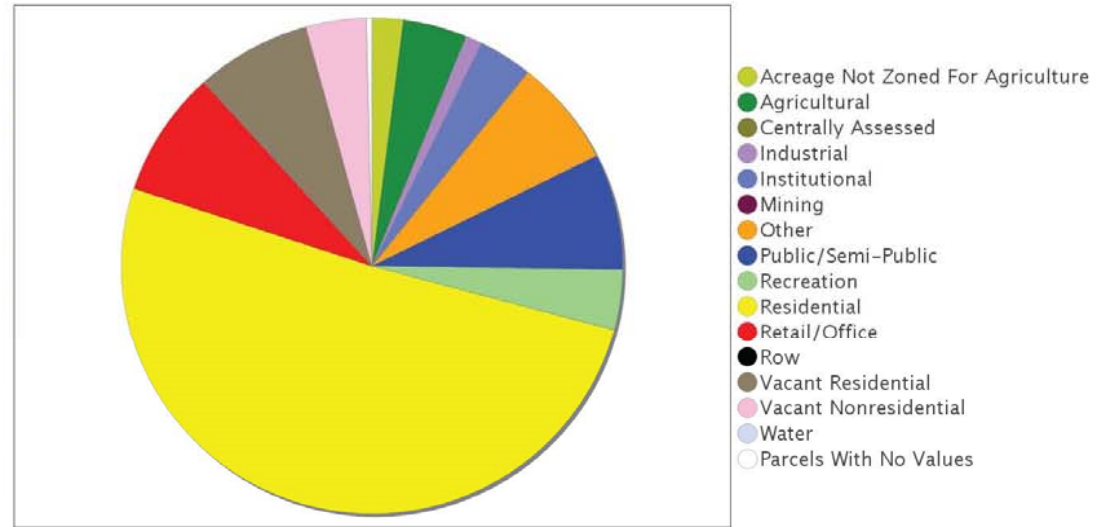

- Input on proposed alternatives
- Review evaluation matrix
- Identify the Viable Improvement Strategies

- Alternatives and Strategies Report

	Commuter Rail/Express Bus (Alt. 1-2)	Commuter Rail (Alt. 1-5)	Express Bus (Alt. 2-4)	No Build (Alt. 0-1)
Potential Impact on Natural Environment	Minimal	Minimal	Minimal	Minimal
Potential Impact on Social/Cultural Environment	Minimal	Minimal	Minimal	Minimal
Potential Impact on Physical Environment	Moderate	Moderate	Moderate	Minimal
Daily Ridership (2035)	1,300 +/- 10%	2,000 +/- 10%	900 +/- 10%	N/A
Capital Cost (2013\$)	\$245-255M	\$365-375M	\$55-60M	N/A
Competitiveness for FTA New Starts Funding	Low	Low	N/A	N/A

Existing Land Use

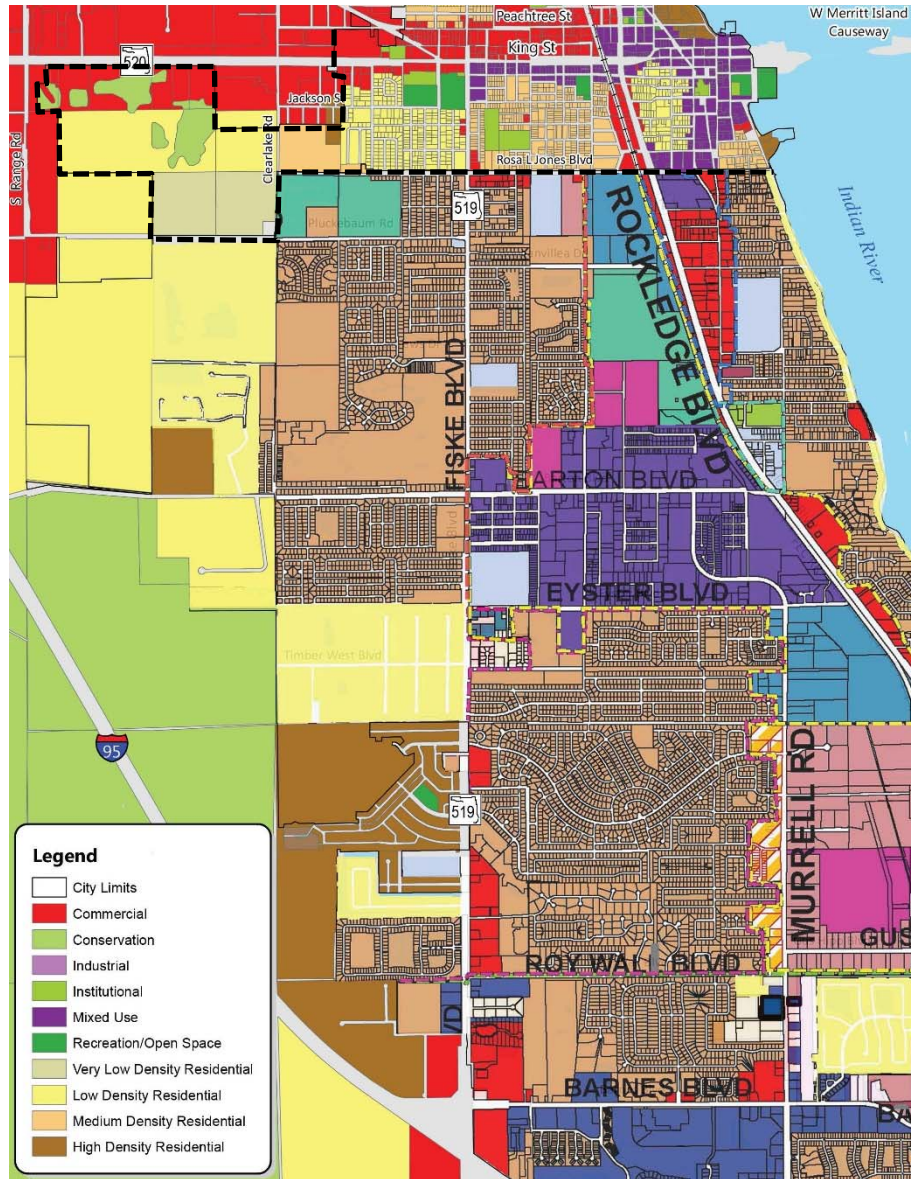

Land Use	Percent of Study Area (1/2-Mile Buffer)
Agricultural	4.6%
Commercial	7.5%
Industrial	1.1%
Office	0.6%
Public/Institutional	9.5%
Residential	40.6%
Vacant	26.9%
No DOR Code	9.2%

Location Maps

Future Land Use

Population and Demographics

Socioeconomic Characteristics	
Population	10,715
Density	4.73/acre
Households	4,203
HH Density	1.39/acre
Persons Per HH	2.52
Median HH Income	\$45,763
Households Below Poverty Level	16.4%
Median Age	43

Transit Conditions

- Four Routes in Study Area
 - Route 1: Operates along SR 519 from Rosa L. Jones Drive/Boulevard to Judge Fran Jamieson Way
 - Route 4: Serves SR 520 crossing through the northern part of the Study Area
 - Route 6: Service along SR 520, Rosa L. Jones Drive/Boulevard and Barton Boulevard
 - Route 8: Service along SR 520 and terminates at Cocoa Transit Center

Route	Days of Service	Service Frequency	FY 2013 Annual Ridership
1	5:15 AM to 8:30 PM Monday – Friday 7:30 AM to 6:30 PM Saturday	30/60 min 120 min	237,209
4	5:45 AM to 11:30 PM Monday – Friday 5:45 AM to 11:30 PM Saturday 8:00 AM to 6:00 PM Sunday	15/60/15/60 Min 15/60/15/60 Min 60 Min	338,214
6	5:45 AM to 8:15 PM Monday – Friday 7:15 AM to 6:15 PM Saturday	15/30/60 Min 60 Min	261,626
8	6:45 AM to 5:45 PM Monday – Friday	Varies from 90 to 150 min	17,494

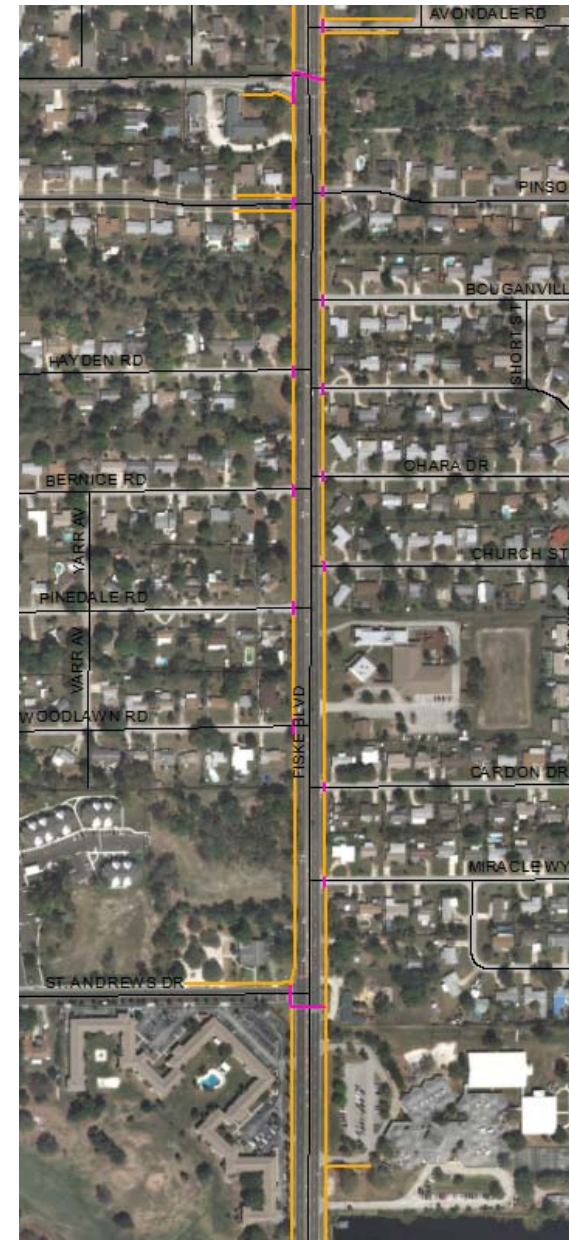

Transit Conditions

- Bus stops along SR 519 have bus stop signs and benches for seating
 - Most stops are located in areas where there is existing sidewalk
 - Majority of stops have accessibility challenges (e.g., lack of landing pad)

Bike/Ped Conditions

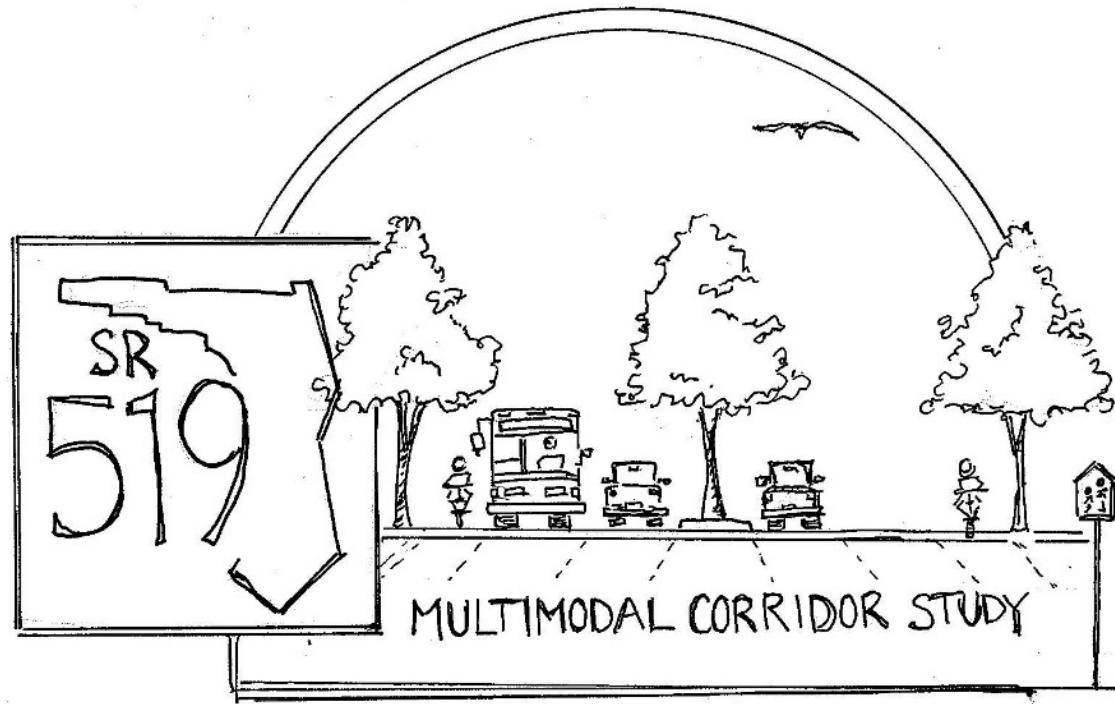

- Desktop review conducted using aerial photography and supplemented with video from field visit
- Sidewalks generally provided along both sides of the roadway except in the southern part of the Study Area
- Spacing between crosswalks often exceed half a mile
- No bike lanes identified along SR 519

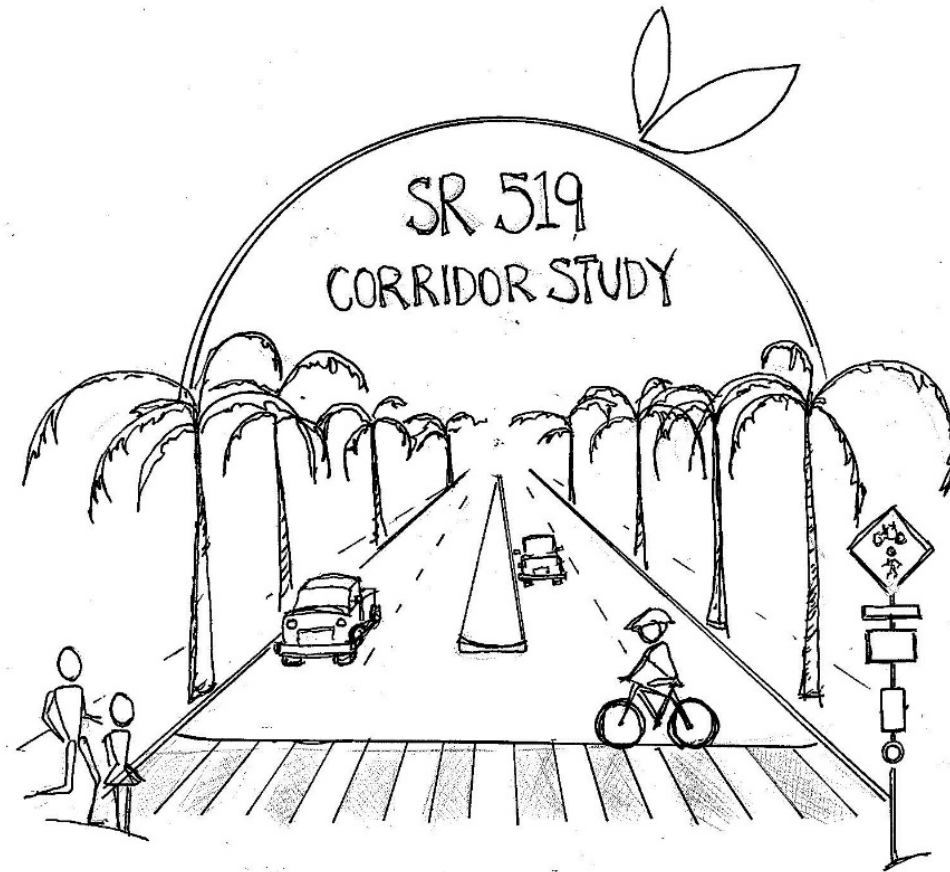

PVT Input

- What issues or conditions should the project team be aware of?
- What is the most effective way to engage the community?
- Should any other key stakeholders be represented on the Project Visioning Team?

The SR 519/Fiske Boulevard Project Visioning Team (PVT) Meeting #2 was held on Thursday, August 20, 2015 at the Community Resource Center in Rockledge, Florida. The objective of the PVT meeting was to accomplish the following goals:

- Discuss the project goals and objectives.
- Provide an overview to the PVT of the existing conditions analysis findings.
- Gain consensus on the draft Purpose and Need and Guiding Principles.
- Begin the discussion of potential alternatives for the corridor.

The session began with a presentation from John Moore, the FDOT Project Manager, and Rohan Sadhai with VHB. The PVT members were provided with a meeting agenda and a copy of the PowerPoint presentation. Mr. Moore began the meeting by introducing himself and a brief overview of the purpose of the Project Visioning Team meeting. Mr. Moore then gave the PVT members the opportunity to introduce themselves to the group. Following introductions, Mr. Moore continued the presentation discussing PVT responsibilities and the project background and goals. Mr. Sadhai continued the presentation with a description of the study area, tasks completed, CRA plans, and existing conditions analysis findings. Next, Mr. Sadhai covered the currently identified Issues and Opportunities, the Purpose and Need statement, and the Guiding Principles, allowing PVT members to add their comments. Mr. Moore explained the importance of PVT feedback and getting these guidelines correct. Lastly, Mr. Sadhai

presented some examples of potential alternatives that could be implemented along the Fiske Boulevard corridor, and the next steps for the planning study.

The following is a summary of the input received during the open discussion style presentation:

- City of Rockledge mentioned that street lighting will be added with and I-95 interchange project. An additional 11 lights will be added by the City within a year.
- City of Rockledge mentioned that there is available right-of-way to realign Roy Wall Boulevard to match the cross street.
- ECFRPC questioned the inclusion of a future corridor from OIA to Viera in the traffic evaluation. The Study team responded that the need for a corridor has been established, but an alignment has not been developed yet. While the general area of the corridor is known, specifics that are required to include it in the traffic model are not know. Also, this future corridor is not expected for the next 30 – 40 years, while our study does not look that far ahead.
- ECFRPC recommended that the study include information on sea level rise.
- Brevard County mentioned the recent approvals to trade residential for office in the Viera DRI. The County can provide updates to the study team as needed.
- Study Team asked the PVT for their opinion on the Viera DRI goal of build out year 2029. There was a general consensus that it will need to be extended.
- City of Rockledge mentioned that the corridor right-of-way, south of Barton Boulevard, is approximately 150 feet, with center turn lanes that are very wide. Suggested the extra lane widths be repurposed into a bicycle lane.
- City of Rockledge mentioned moving fence to provide for stacking at John F. Kennedy Middle School, as early as today (Aug 24th)
- City of Cocoa mentioned that another issue to be considered is the fire station access.
- SCAT stated that buses driving southbound get stuck at Hans Christian Andersen Elementary School due to the stacking near the school entrance.
- City of Rockledge commented that the 12-acre land near Roy Wall Boulevard and Fiske Boulevard is in discussions for development plans.
- ECFRPC suggested that once construction is complete, there should be an education and enforcement element added to the end of the study to teach law enforcement and the community how to use their new facilities.

- City of Rockledge requested that a maintenance agreement be included in the study to determine who maintains the right-of-way once the project is complete.
- City of Rockledge communicated their willingness to work with the State on items that the City is responsible. The City expressed interest in eliminating the open swales and ditches for safety, suggesting that the improvements could start with locations near schools, to accommodate the children of the community first.
- A question of who will use the sidewalks, the age of the community, and if golf carts should be considered was raised during the discussion. A general consensus is that the City of Rockledge is increasingly getting requests from neighborhoods to provide more facilities for golf carts, and that they should be considered for communities other than golf communities. The study team committed to check in with State standard on golf cart facilities.
- City of Cocoa commented that the photo in the presentation of the Danish offset was not aesthetically pleasing and people would not follow the concept. The study team assured the PVT group that this was just used for discussion purposes, and if this eventually became a recommendation, the final concept would be much more aesthetically pleasing.
- SCTPO suggested to use buffered bike lanes where possible. The study team commented that buffered bike lanes will be provided where possible, specifically where existing lane widths can be reduced.
- City of Rockledge warned that segments of foundation beneath the asphalt was not build correctly and have resulted in constant pot holes. The study team responded that this issue could be corrected as part of a 3R project.
- ECFRPC questioned truck traffic, which the study team answered as low.
- SCAT commented that the SCAT buses are 102" in width plus mirrors, so 11' travel lanes is comfortable but tight. Also mentioned that fire trucks are the same width.
- SCAT recommended checking with how service animals function at mid-block pedestrian refuges. They found that service animals do not go into crosswalk if cars are pulled across stop bar.
- SCAT mentioned that southbound buses constantly get stuck at the Pluckebaum Road intersection. Added that this only happens southbound, not northbound. Also included that the southbound Fiske Boulevard to southbound I-95 movement causes stacking at the bridge. The study team responded that signal phasing improvements will be suggested as part of this study.
- SCAT recommended a bicycle connection to Stadium Parkway, commenting that there are currently no crosswalks between Publix in Viera and Andersen.

MEETING AGENDA

Meeting Date: August 20th, 2015 **Time:** 1:30 pm to 3:30 pm

Project: SR 519 (Fiske Boulevard) Corridor Planning Study

Subject: Project Visioning Team Meeting #2

Meeting Location: Community Resource Center
123 Barton Boulevard, Rockledge, FL 32955

- I. **Introductions**
- II. **Project Background and Goals**
- III. **Existing Conditions Report Overview**
- IV. **Purpose and Need – Guiding Principles**
- V. **Potential Alternatives**
- VI. **Next Steps: Project Schedule**

- SCAT commented that the commute slide does not accurately tell the public transit story in the area, and suggests changing it for the Public Meeting. The Study Team responded that the slide shows working age residents, and does not include students that walk/bicycle to/from school.
- Brevard Public Schools commented that there are schools with students who fit within the walking distance standards, however because of the walkability level being so low, parents drop off the students.

Meeting #2
August 20, 2015

SR 519 (FISKE BOULEVARD) CORRIDOR PLANNING STUDY

Presented to
Project Visioning Team

Authority

This public meeting is being held in accordance with Chapter 120, Florida Statutes.

This project is being developed in accordance with the Civil Rights Acts of 1964 and 1968. Under Title VI and VIII of the Civil Rights Acts, any person(s) or beneficiary who believes they have been subjected to discrimination because of race, color, religion, sex, age, national origin, disability, or familial status may file a written complaint with:

FDOT's Equal Opportunity Office

605 Suwannee Street, MS 65

Tallahassee, Florida 32399-0450

Telephone: (850) 414-4747

Meeting Agenda

- I. Introductions
- II. Project Background and Goals
- III. Existing Conditions Report Overview
- IV. Purpose and Need – Guiding Principles
- V. Potential Alternatives
- VI. Next Steps: Project Schedule

FISKE BLVD
CORRIDOR STUDY

Project Visioning Team Overview

■ PVT Responsibilities

- Three (3) meetings during key project milestones
 - Meeting #1 – May 5, 2015
 - Meeting #2 – August 20, 2015
- Identify stakeholders that need to be engaged
- Provide input on the planning and concept development process,
- Recommend corridor alternatives to be advanced for further study.
- Share your local knowledge and history

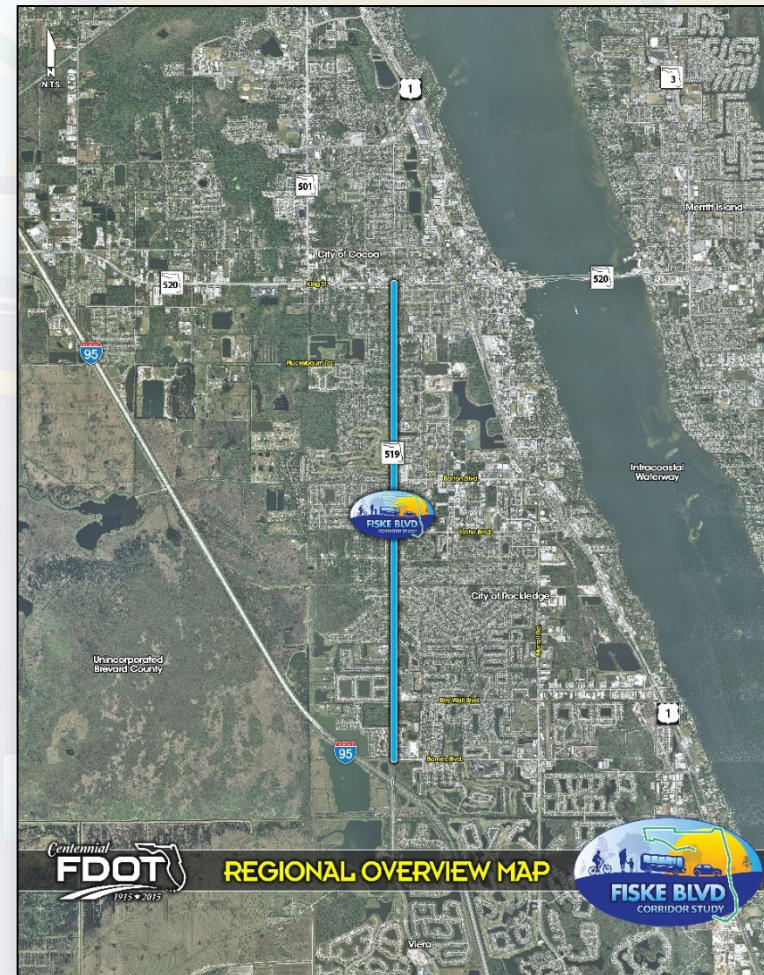

Project Background and Goals

- Project requested by the TPO and Brevard County to coordinate the development of a future vision for SR 519 that establishes a **multimodal approach** to providing for future transportation needs.
- Community-based evaluation to determine how best to meet the **needs of current and future users**.
- Establish a long-term plan to guide evolution of the corridor that appropriately correlates the **balance between land use and transportation planning**.

Study Area

- From Barnes Boulevard/I-95 NB Ramps to SR 520
- 4.2 miles
- Transitional character, varying cross sections
- Primary north-south route between I-95 and SR 520
- Viera connection to the south

Supporting Plans: 2013 CRA Plan Recommendations

Cocoa Diamond Square CRA

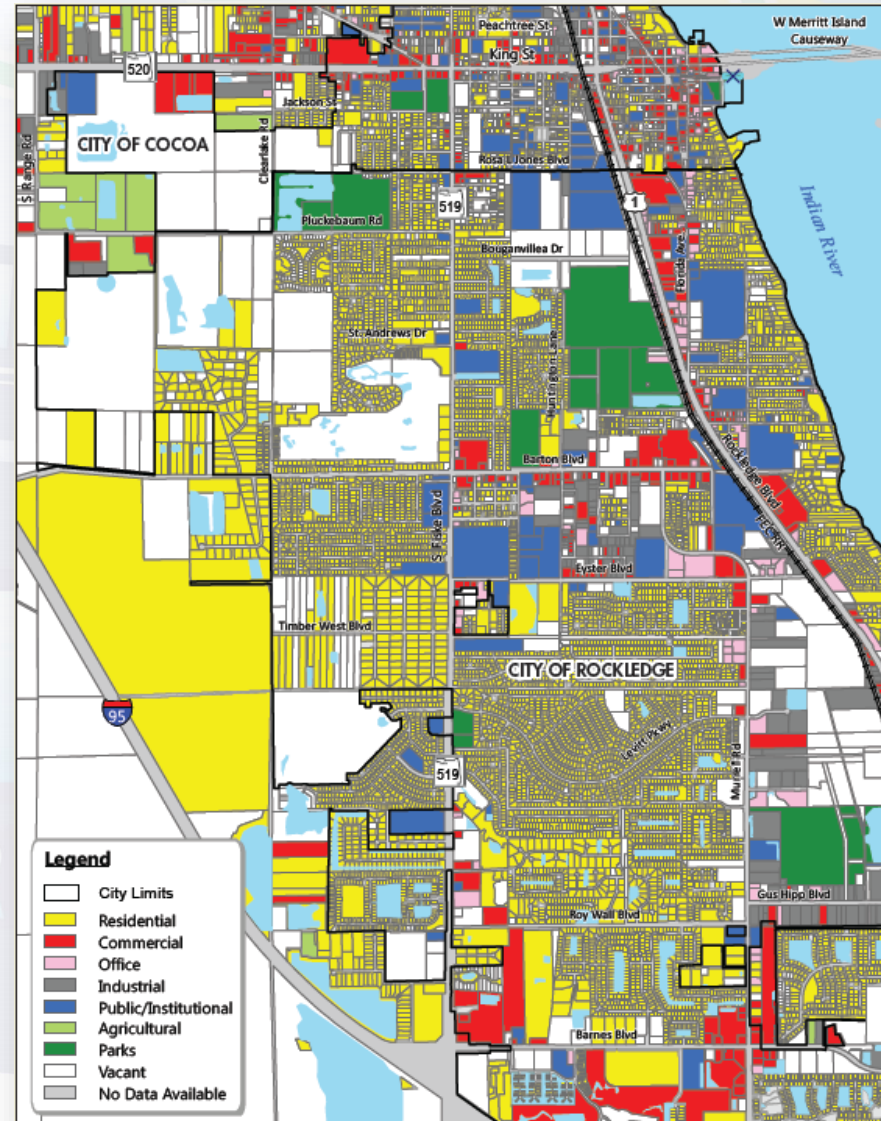

- Enhance streetscapes and pedestrian connectivity, and create neighborhood gateways
 - Need for a mid-block crossing at Holmes Street, just south of Provost Park
 - General coordination with FDOT to implement access management strategies, including reconfiguration of center medians, driveway access points and pedestrian crossings

Rockledge CRA

- Attract a new anchor tenant to the Village Green Shopping Center
- Encourage mixed-use development near JFK Middle School
- Improve the intersection of Fiske Boulevard and Barnes Boulevard, as it is "a significant intersection and serves as the southern entrance to the City of Rockledge."

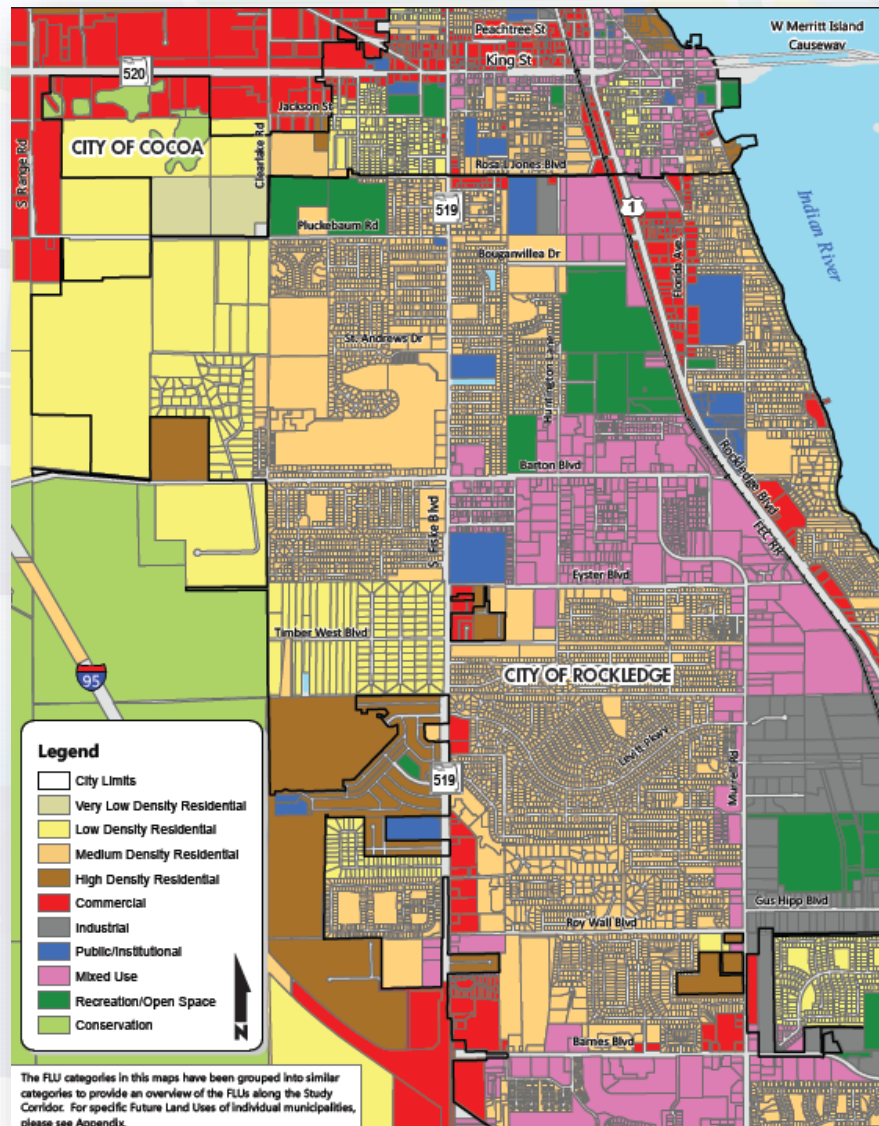

Existing Land Use

Land Use	Percentage (1/2-Mile Buffer)
Residential	40.6%
Commercial	7.5%
Office	0.6%
Industrial	1.1%
Public/Institutional	9.5%
Agricultural	4.6%
Vacant	26.9%
No DOR Code	9.2%

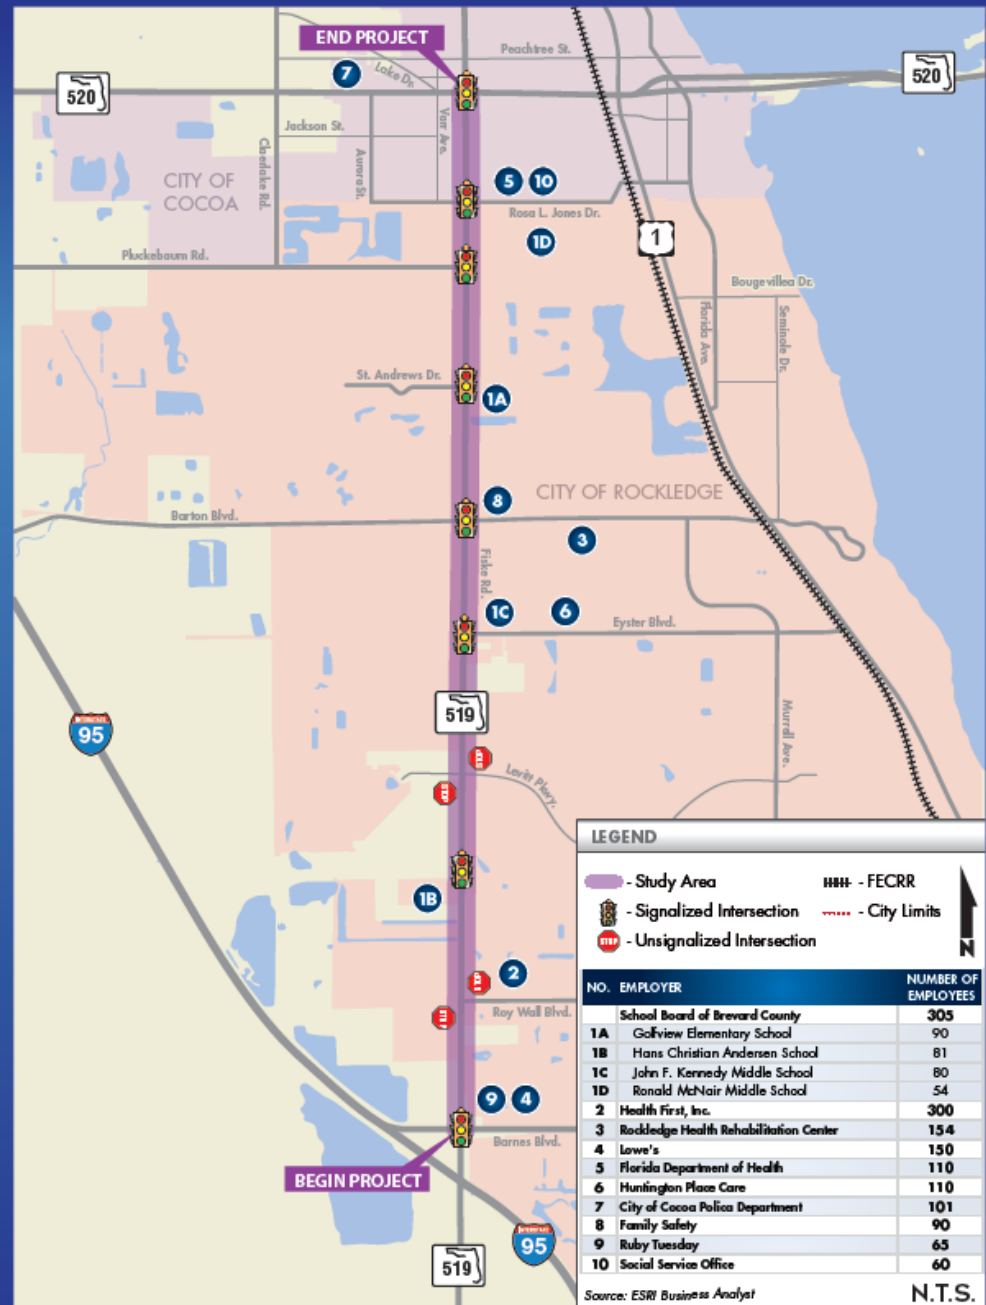

Future Land Use

Land Use	Percentage (1/2-Mile Buffer)
Residential	68.7%
Commercial	12.3%
Office	5.4%
Public/Institutional	5.0%
Open Space/ Recreational	8.6%

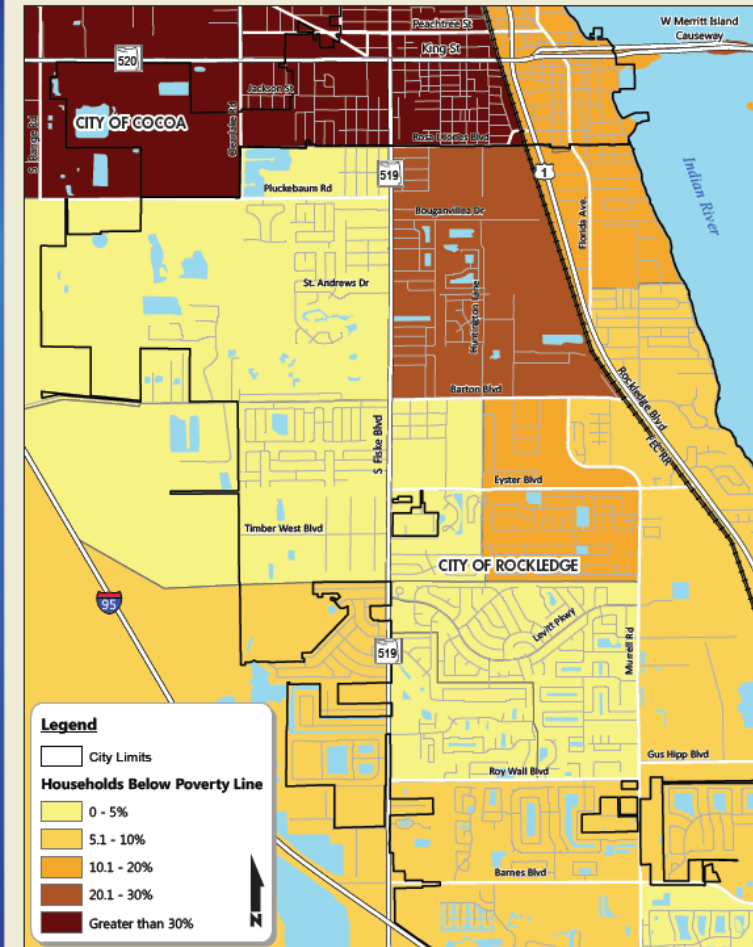

Major Employers

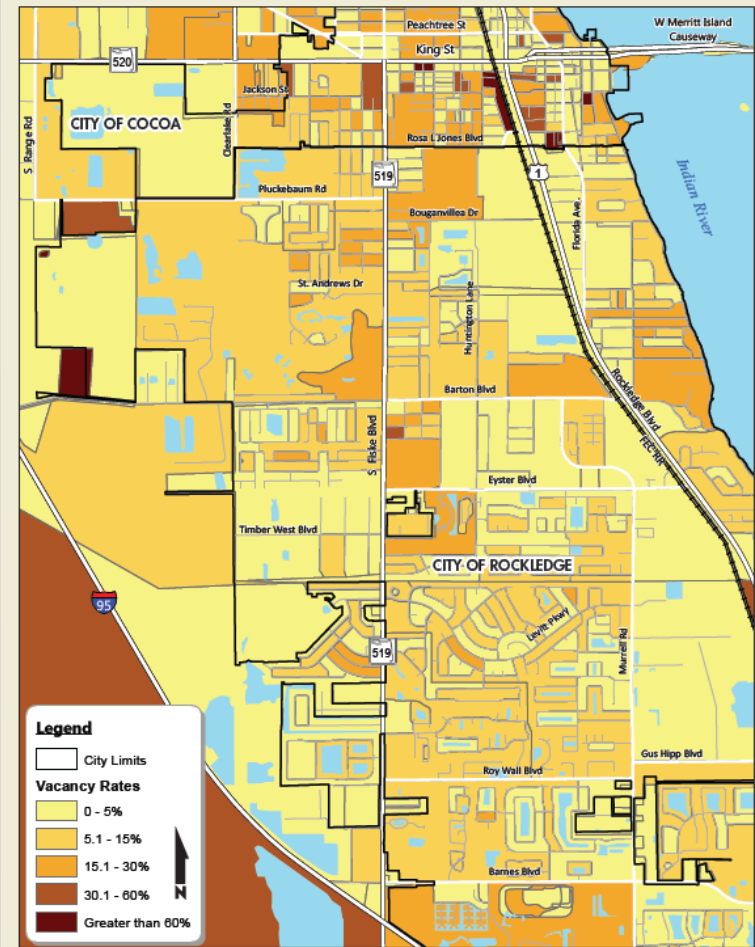

Employer	No. of Employees
School Board	305
Health First, Inc.	300
Rockledge Health Rehabilitation Center	154
Lowe's	150
Florida Department of Health	110
Huntington Place Care	110
City of Cocoa Police Department	101
Family Safety	90
Ruby Tuesday	65
Social Service Office	60

Low Income & Vacant Households

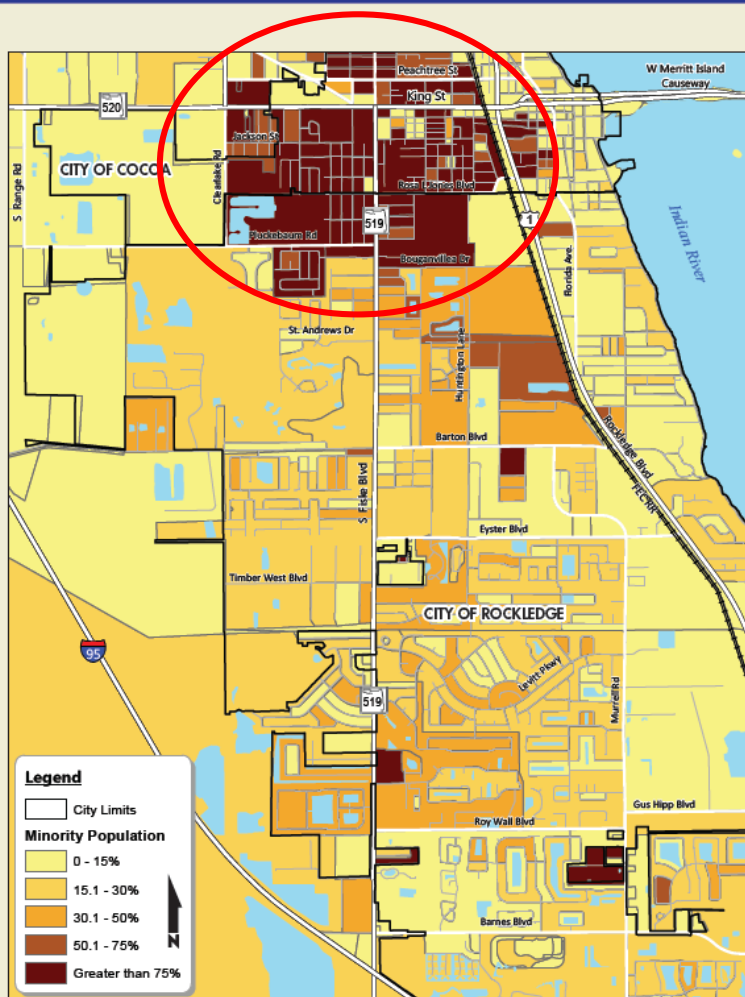

N.T.S.

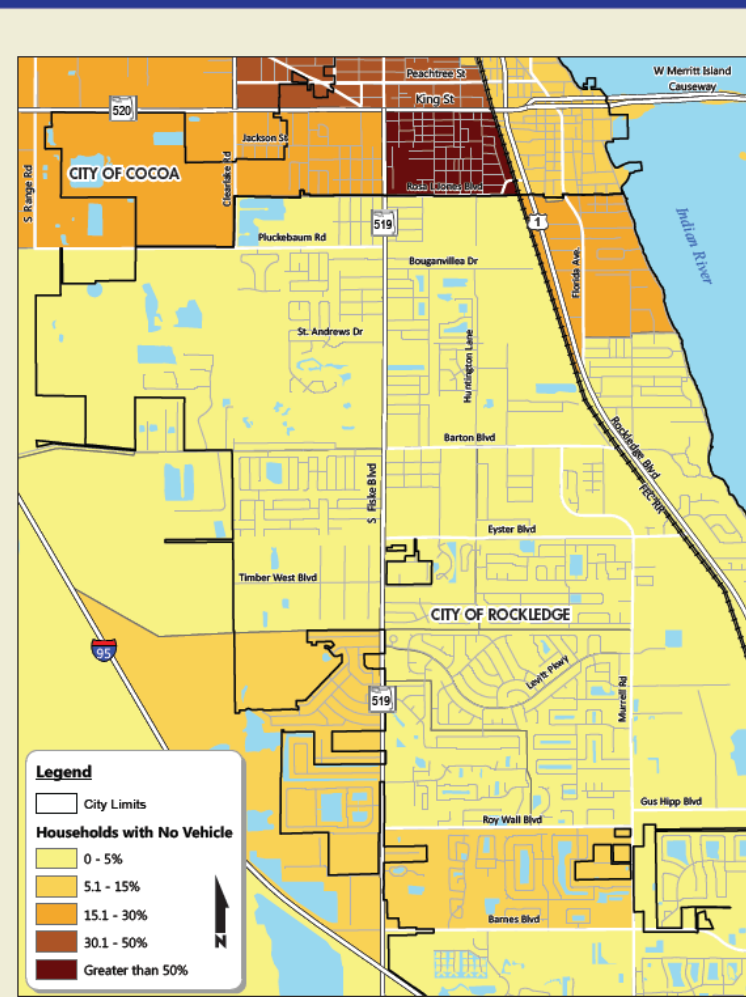

N.T.S.

Minority Population & Vehicle Ownership

N.T.S.

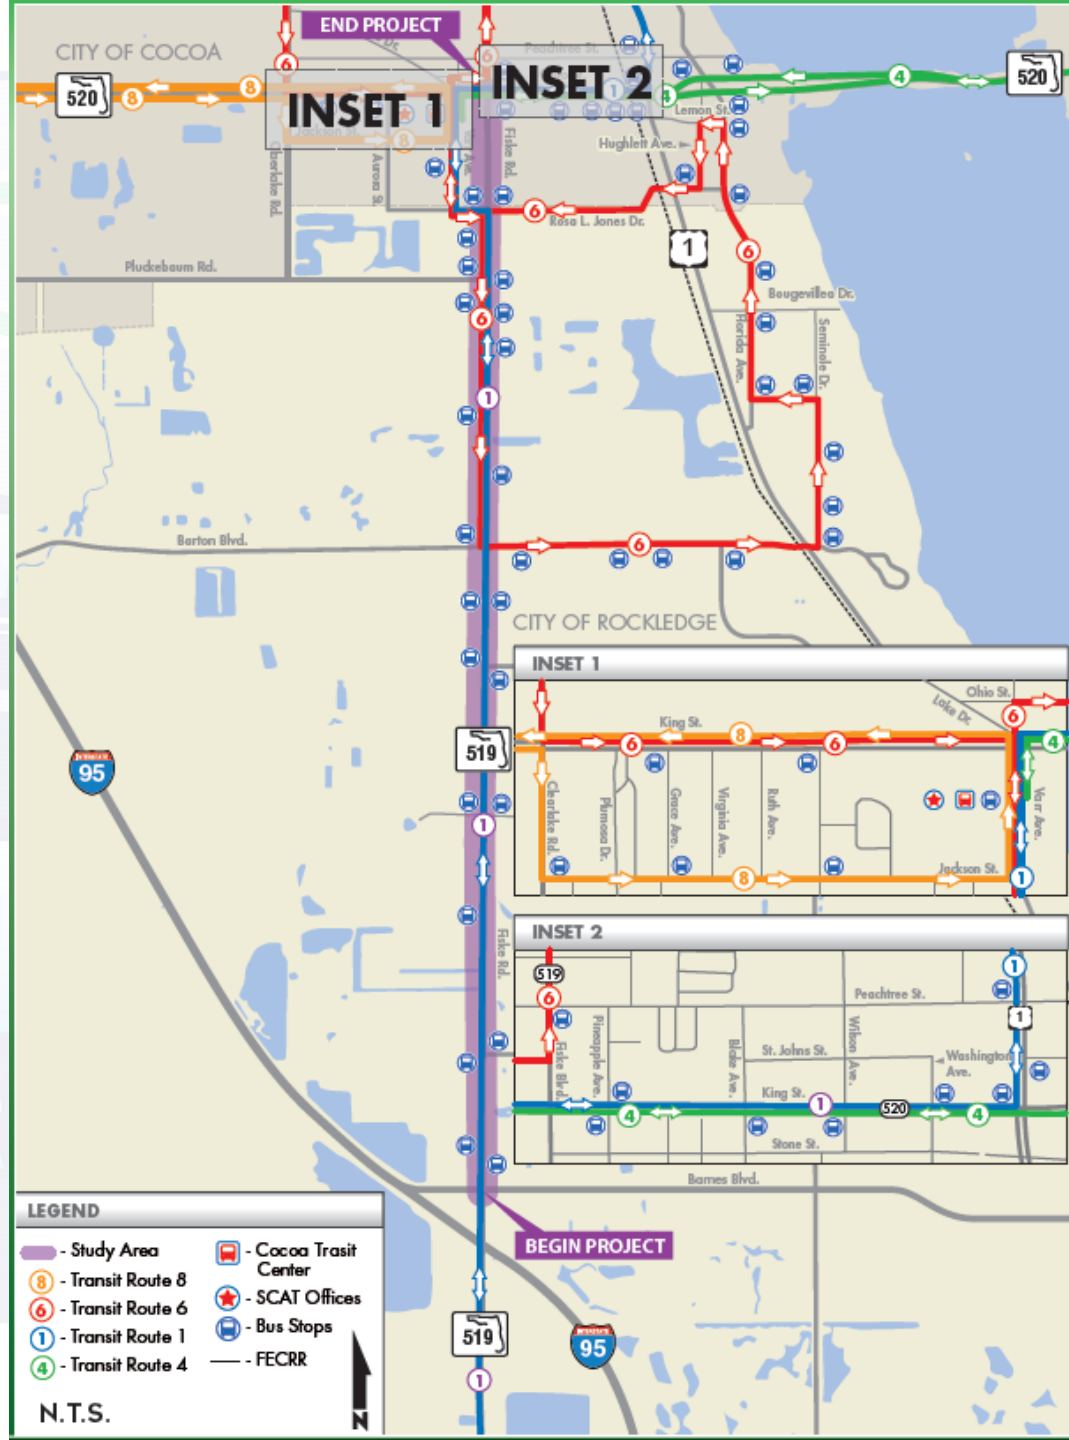

N.T.S.

Mode of Commute

- Commute Percent in Study Area
 - **Private Vehicle 85.5%**
 - Carpooled 7.4%
 - **Public Transit 0.8%**
 - **Bicycle 0.4%**
 - **Walking 1.1%**
 - Other Means 1.8%
 - Worked at Home 3.0%

Transit Conditions

Route	Service Frequency	FY 2013 Annual Ridership
1	30/60 min 120 min	237,209
4	15/60/15/60 Min 60 Min	338,214
6	15/30/60 Min 60 Min	261,626
8	Varies from 90 to 150 min	17,494

Transit Conditions

- Bus stops along SR 519 have bus stop signs and benches for seating
 - Most stops are located in areas where there is existing sidewalk
 - Majority of stops have accessibility challenges (e.g., lack of landing pad)

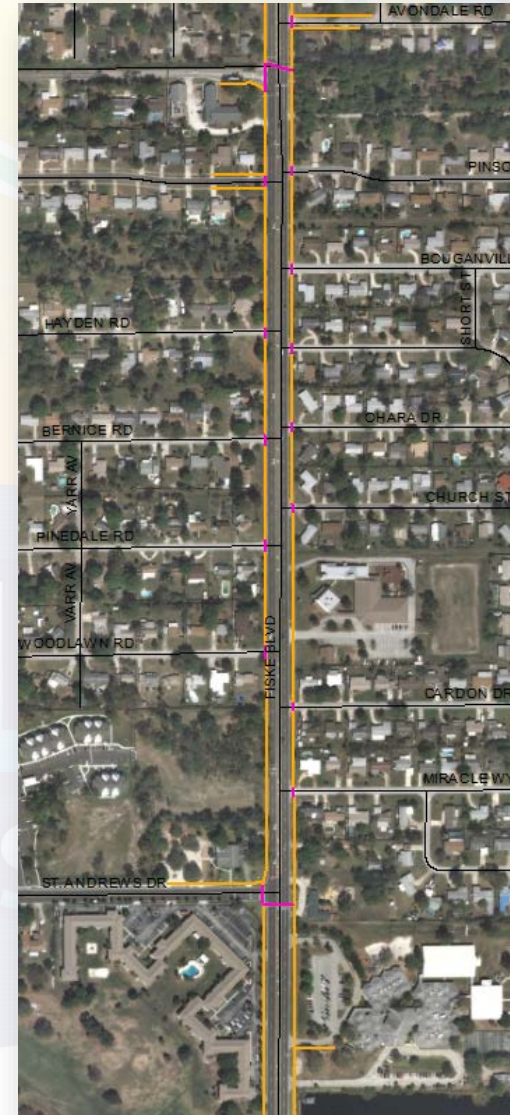

Typical Bus Stop

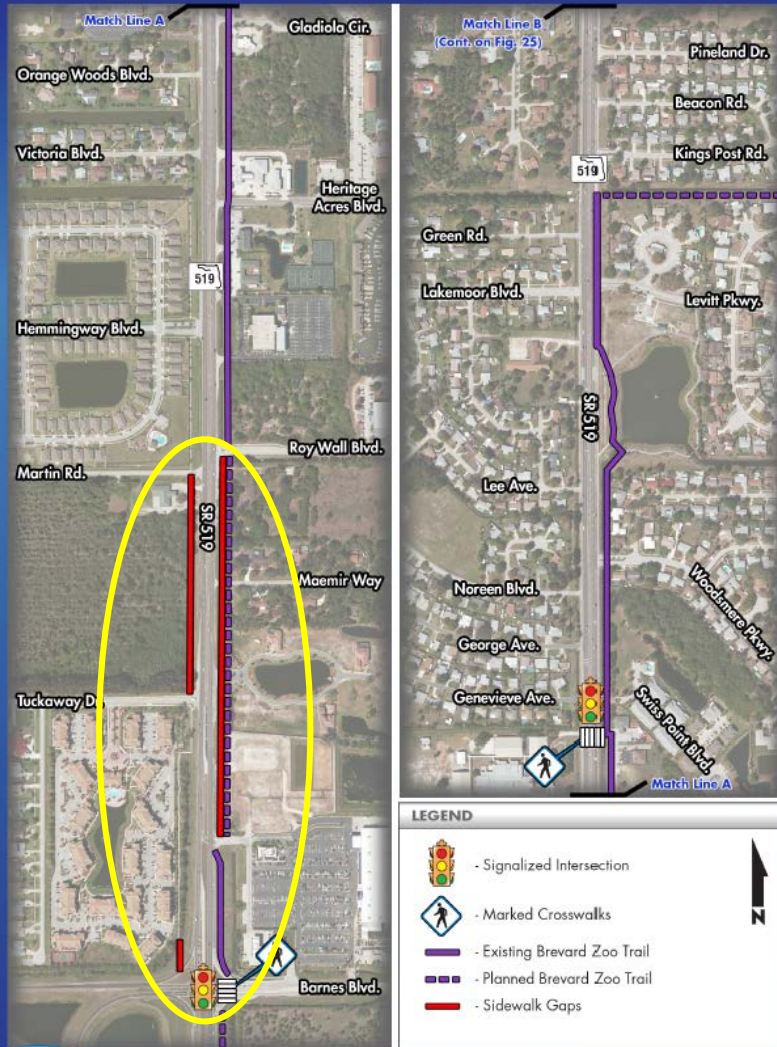

Bus Shelter at Fiske Boulevard/Barton Boulevard

Bike/Ped Conditions

- Aerial photography and field visit
- Sidewalks
 - Generally along both sides of the roadway
 - Except southern part of the Study Area
- Crosswalk spacing often exceeds half a mile
- No bike lanes identified along SR 519

Sidewalk Gaps

Safety Overview by Road Segment

- Total crashes = 128
- Bike/ped = 11
- Fatalities = 3
 - North of Orange Woods Boulevard
 - North of Rosa L. Jones Drive

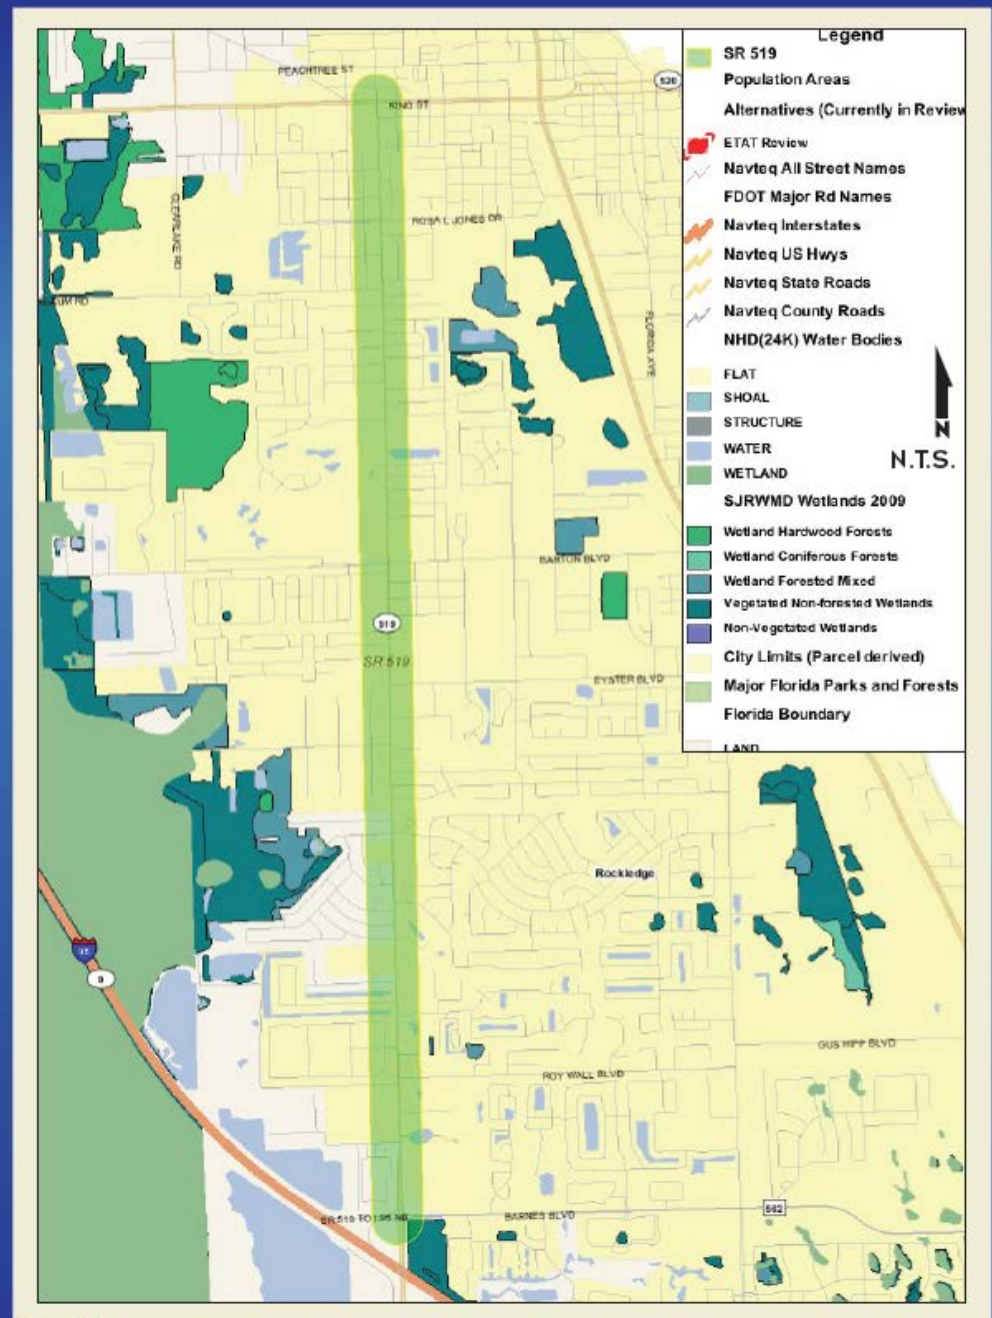

Safety Overview by Intersection

- Total crashes = 202
- Bike/pedestrian = 12
- Fatalities = 1
 - @ Pluckebaum Road

Environmental Analysis

- Reviewed soils, wetlands, floodplains, protected species, contaminated sites
- No environmental constraints**

Planned Improvements

- Space Coast TPO 2035 Long Range Transportation Plan
 - SR 519 as a **multi-modal corridor** with ITS improvements
- Space Coast TPO Transportation Improvement Plan
 - **No identified improvements**
- FDOT
 - **No identified improvements**

FISKE BLVD
CORRIDOR STUDY

Developments of Regional Impact

■ Viera DRI

- Approximately 20,646 acres of land and is a mixed-use development, proposed for:
 - 31,619 residential units
 - 3,169,961 square feet of office
 - 3,438,127 square feet of retail and service,
 - Hospital, stadium, movie theater, golf courses (72 total holes) and hotels
- Expiration date of December 29, 2029
- Planned in four phases

Issues & Opportunities

- Safety concerns
 - Three schools directly access the corridor
 - No dedicated bicycle facilities
 - Gaps in the sidewalk network
 - Long distances between pedestrian crossings
 - Minimal bus stop amenities/ADA access
 - Lack of lighting along southern portion of corridor
- Geometric consistency
 - Typical section
 - Access management

FISKE BLVD
CORRIDOR STUDY

Purpose and Need Statement

- **Purpose:** To provide an **enhanced multimodal transportation network** that promotes the creation of a more **walkable community**, improves **access to employment**, supports **economic development** goals and provides **safe and convenient** access to **users of all ages**.
- **Needs Statement:** An enhanced multimodal network is needed based on the desire for improved safety, improved accommodations for pedestrians/ bicyclists, and improved access to transit.

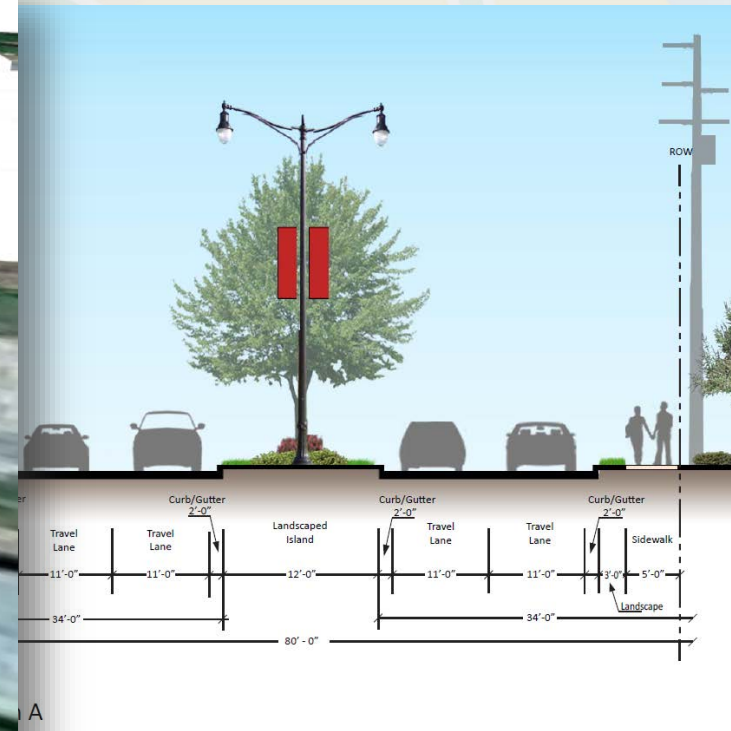

FISKE BLVD
CORRIDOR STUDY

What are the Corridor Guiding Principles?

- **Safety:** Provide better pedestrian/vehicle separation, improve pedestrian crossings and assess ADA compliance needs.
- **Pedestrian Mobility:** Enhance pedestrian facilities, provide bicycle facilities, and complete trail facilities.
- **Design Consistency:** Provide consistent typical sections and Access Management conformity.
- **Aesthetics:** Identify opportunity for improved planning (aesthetics and maintenance).
- **Transit:** Provide improved bus stop facilities and accommodate mode choices.

Potential Alternatives: Pedestrian Refuges

- Adds green space to median and pedestrian refuge

Potential Alternatives: “Danish” Offset Crosswalks

- High visibility crosswalk forces pedestrians to look towards oncoming traffic before crossing

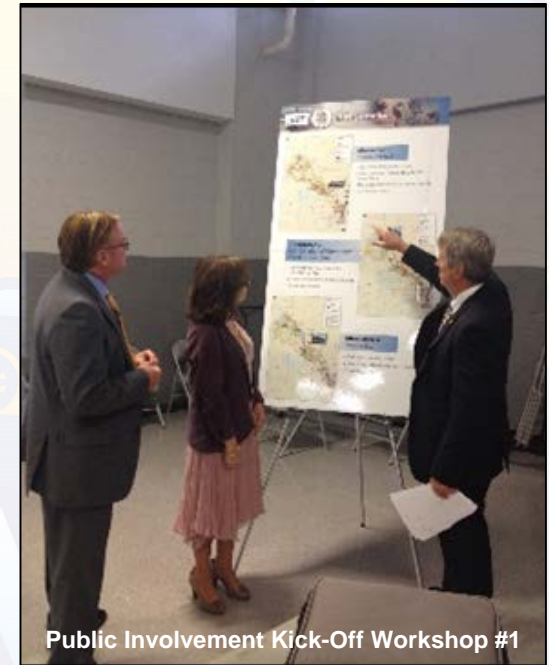

Theo Petritsch, Sprinkle Consulting

Next Steps:

2.0 Planning Phase – Define the Purpose and Need

- Needs Assessment (in progress)
- Future Conditions Summary (in progress)
- **Project Visioning Team Meeting #2 (today)**
 - Review existing conditions and key project issues
 - Identify potential improvement alternatives
- **Public Involvement Kick-Off Workshop #1**
Highlight existing and future conditions
 - Identify potential alternatives to be considered
 - Samples of similar projects or planning techniques
- Deliverable: Purpose and Need Report

Tuesday August 25
Rockledge City Hall

SR 519/Fiske Boulevard Project Visioning Team Meeting #3

ATTENDEES

Judy Pizzo – FDOT
Conroy Jacobs – Brevard County
Don Griffin – City of Rockledge
Alix Bernard – City of Rockledge
Ken Poole – City of Rockledge
Fred Milch – East Central Florida Regional Planning
Council

Georganna Gillette – Space Coast Transportation
Planning Organization
Joseph Chagnon – Space Coast Area Transit
Holly Pardi - Resident
Amphone Soupharath – VHB
Rohan Sadhai – VHB

The SR 519/Fiske Boulevard Project Visioning Team (PVT) Meeting #3 was held on Monday, November 2, 2015 at the Rockledge City Hall in Rockledge, Florida. The objective of the PVT meeting was to identify potential alternatives for multimodal improvements along the corridor.

The session began with an introduction from Judy Pizzo, the FDOT Project Manager, and Rohan Sadhai with VHB. Ms. Pizzo began the meeting by reviewing Title VI and related statutes with the PVT, and then gave a brief overview of the project. Mr. Sadhai continued the presentation with a summary of the August 25, 2015 Public Workshop. A copy of the meeting notes from that workshop has been posted on the project website for reference, at cflroads.com. The main take away from that workshop confirmed our initial findings and included the following:

- Hans Christian Andersen Elementary School – Congestion and queuing on Fiske Boulevard during school arrival and dismissal times
- Pluckebaum Road – Northbound left-turn lane queuing blocks side street access
- SR 520 – Northbound left-turn lane queuing blocks side street access
- Health First – Northbound left-turn causes backups, and access management issues with expansion
- Potential signal/roundabout at Roy Wall Boulevard and at Levitt Parkway
- Traffic operations and management issues
 - Center turn lane used for travel
 - Speeding

Mr. Sadhai then reiterated the Purpose and Need statement and the Guiding Principles that need to be addressed by any proposed alternative. Mr. Sadhai then gave a brief overview of initial alternatives,

followed by discussion and input from the PVT members. Following is a summary of the input received during the open discussion style presentation:

- Corridor wide improvement options
 - Pedestrian accommodations
 - Close sidewalk gaps
 - Reduce crossing distances along Fiske Boulevard between signals
 - Provide advance warning systems to alert drivers when a crosswalk is being utilized
 - Bring crossing locations up to ADA standards
 - Corridor-wide signal optimization
 - Traffic calming measures
 - Narrow lanes
 - Raised medians at specific locations
 - Small radii at intersections
 - Tree plantings near road edge and in landscaped medians
 - Bus stop enhancements
 - Provide enhanced bus stop features, including shelters and benches
 - Bring bus stop location up to ADA standards
 - Lighting near Provost Park
- Spot improvements
 - Barnes Boulevard/I-95 Ramps and Fiske Boulevard intersection
 - Short-term improvements in alignment with Barnes Boulevard widening project
 - Two left-turn lanes in the southbound direction, by adding a southbound left-turn lane and a receiving lane on east leg
 - Long-term improvements to accommodate future I-95 northbound traffic from Viera
 - Two left-turn lanes in the eastbound direction, by adding an eastbound left-turn lane
 - Two left-turn lanes in the northbound direction, by adding a northbound left-turn lane and a receiving lane on west leg
 - Roy Wall Boulevard and Fiske Boulevard intersection
 - Traffic signal
 - Would require realignment of Martin Road and Roy Wall Boulevard
 - Needs a full signal warrant study
 - Roundabout
 - Could be both an entry gateway for the City of Rockledge and a traffic calming/traffic controlling feature
 - Would require a great deal of education with the public
 - Potential for access to Phillips Landing subdivision from Martin Road

- Hans Christian Anderson Elementary School
 - On-site improvements
 - Create more on-site stacking on south side of school. City has been in discussions with School Board. The School Board was not represented at today's meeting. The City of Rockledge prepared an interim stacking plan and presented it at today's meeting. The plan will be reviewed and included as an alternative solution.
 - Off-site improvements
 - Place school markers/signage in logical locations to give drivers enough time to react to the school zone. Add speed limit and school zone signs.
 - Educate parents/school officials on drop-off and pick-up procedures
- Levitt Parkway and Fiske Boulevard intersection
 - Traffic signal
 - Could include the realignment of Lakemoor Boulevard and Levitt Parkway
 - Needs a full signal warrant study
 - Roundabout
 - Could be a traffic calming/traffic controlling feature
 - Would require a great deal of education with the public
 - Located about 1-mile north of Roy Wall Boulevard. The two roundabouts could work together to create a speed reduction zone along the corridor.
- Pluckebaum Road and Fiske Boulevard intersection
 - Modify signal timing
 - Intersection Improvements
 - Pull back northbound stop line
 - Align Crosswalk
 - Crosswalk on both sides of Fiske Boulevard
 - Reduce radius of southbound right-turn onto Pluckebaum Road
- Provost Park/Stone Street/SR 520 and Fiske Boulevard intersection
 - Right-in/out only at Stone Street
 - Formalized median
 - Mid-block crossing to allow access to Provost Park
 - Wide multi-use path and/or formalized parking and drop-off/pick-up area on west side of Fiske Boulevard for park access

Following the open discussion of alternatives, PVT members were invited to mark-up a roll plot of the corridor and discuss alternatives in more detail. This included using the <http://streetmix.net> online tool to make changes to the typical section, and see the impacts on the right-of-way and drainage swales.

Prior to the roll plot exercise, Mr. Sadhai gave an overview of the right-of-way along the corridor. There are three distinct segments:

- 200 to 300 feet from Barnes Boulevard to Roy Wall Boulevard (200 feet was used for the exercise)
- 150 feet from Roy Wall Boulevard to Eyster Boulevard
- 100 feet from Eyster Boulevard to SR 520

Typical sections were identified for each segment.

Some of the key discussion items from the roll plot and StreetMix exercise include the following:

- Have a consistent 40 mph speed limit along the corridor
- Provide a combination of on-street bicycle lanes and wide off-street multiuse trails for those areas where the right-of-way does not allow for on-street bicycle lanes
- Extend Brevard Zoo Trail north to connect to SR 520
- Add buffer between bicycle lanes and travel lanes
- Add buffer between sidewalks and travel lanes
- Widen all sidewalks to a minimum of five feet
- Provide median islands as traffic calming features at appropriate locations along the corridor
- Develop alternatives for the roundabouts at Levitt Parkway and at Roy Wall Boulevard
- Address sight vision issue resulting from bus shelter at the intersection of Barton Boulevard and Fiske Boulevard for eastbound traffic

Following the interactive activity, the PVT meeting ended. Please keep checking the CFLRoads website for new information.

MEETING AGENDA

Meeting Date: November 2, 2015 **Time:** 1:30 pm to 3:30 pm

Project: SR 519 (Fiske Boulevard) Corridor Planning Study

Subject: Project Visioning Team Meeting #3

Meeting Location: Rockledge City Hall
1600 Huntington Lane, Rockledge, FL 32955

- I. **Introductions**
- II. **Project Update**
- III. **Presentation**
- IV. **Working Session**
- V. **Next Steps: Project Schedule**

Meeting #3
November 2, 2015

SR 519 (FISKE BOULEVARD) CORRIDOR PLANNING STUDY

Presented to
Project Visioning Team

FM No. 437241-1-12-01

Title VI and Related Statutes

Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability or family status. Persons wishing to express their concerns relative to FDOT compliance with Title VI may do so by contacting **Jennifer Smith, FDOT District Five Title VI Coordinator** by phone at (386) 943-5367, or via email at Jennifer.Smith2@dot.state.fl.us.

Persons with disabilities who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact **Judy Pizzo, FDOT Project Manager**, by phone at (386) 943-5167, or via email at Judy.Pizzo@dot.state.fl.us at least seven (7) days prior to the meeting. If you are hearing or speech impaired, please contact us by using the Florida Relay Service, 1-800-955-8771 (TDD) or 1-800-955-8770 (Voice).

2

Meeting Agenda

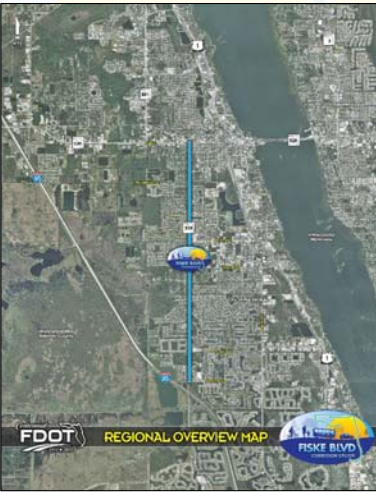

- I. Project Overview
- II. Public Meeting Summary
- III. Initial Alternatives Brainstorming
 - a. Guiding Principles
 - b. StreetMix – Typical Cross Section
 - c. Specific Area Alternatives
- IV. Next Steps

3

Study Area

- From Barnes Boulevard/I-95 NB Ramps to SR 520
- 4.2 miles
- Transitional character, varying cross sections
- Primary north-south route between I-95 and SR 520
- Viera connection to the south

4

Issues & Opportunities

- Safety concerns
 - Three schools directly access the corridor
 - No dedicated bicycle facilities
 - Gaps in the sidewalk network
 - Long distances between pedestrian crossings
 - Minimal bus stop amenities/ADA access
 - Lighting along southern portion of corridor
- Geometric consistency
 - Inconsistent typical section
 - Access management

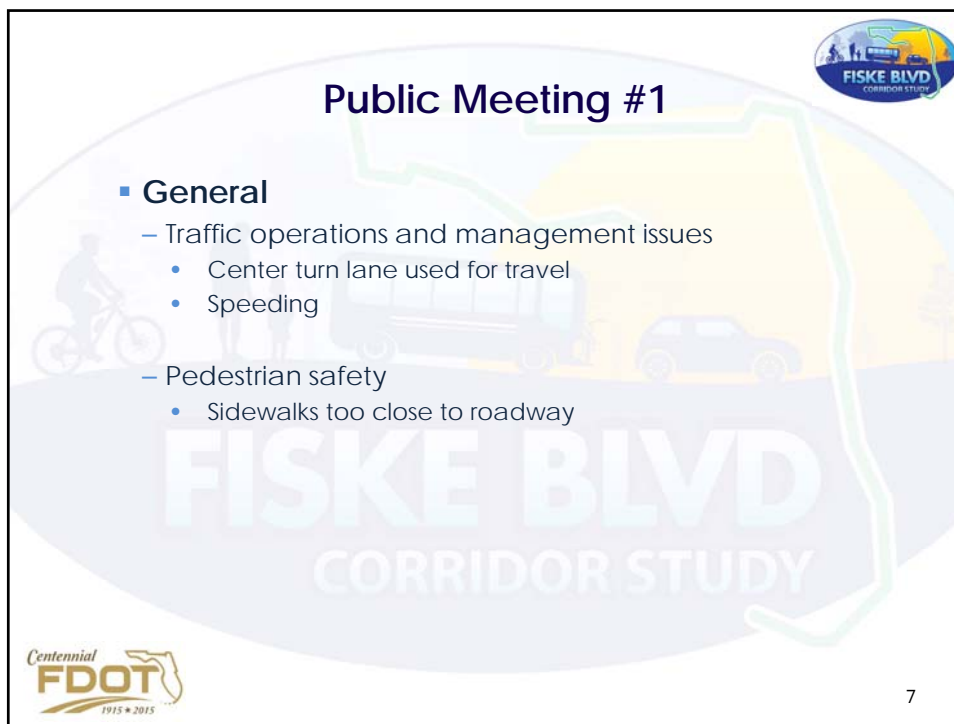

5

Public Meeting Announcement

Tuesday, August 25, 2015
5:30 p.m. to 8:30 p.m.
Rockledge City Hall
1600 Huntington Lane • Rockledge, FL 32955

6

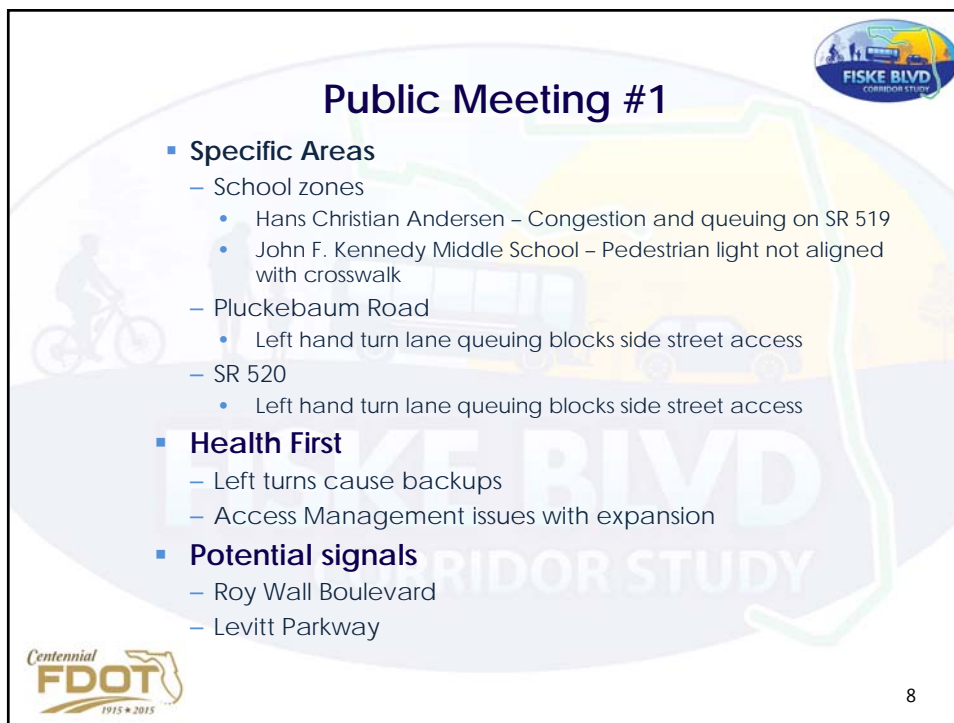

Public Meeting #1

FISKE BLVD CORRIDOR STUDY

- **General**
 - Traffic operations and management issues
 - Center turn lane used for travel
 - Speeding
 - Pedestrian safety
 - Sidewalks too close to roadway

Centennial FDOT 1915 * 2015

7

Public Meeting #1

FISKE BLVD CORRIDOR STUDY

- **Specific Areas**
 - School zones
 - Hans Christian Andersen – Congestion and queuing on SR 519
 - John F. Kennedy Middle School – Pedestrian light not aligned with crosswalk
 - Pluckebaum Road
 - Left hand turn lane queuing blocks side street access
 - SR 520
 - Left hand turn lane queuing blocks side street access
- **Health First**
 - Left turns cause backups
 - Access Management issues with expansion
- **Potential signals**
 - Roy Wall Boulevard
 - Levitt Parkway

Centennial FDOT 1915 * 2015

8

Purpose and Need Statement

- **Purpose:** To provide an **enhanced multimodal transportation network** that promotes the creation of a more **walkable community**, improves **access to employment**, supports **economic development** goals and provides **safe and convenient** access to **users of all ages and abilities**.
- **Needs Statement:** An enhanced multimodal network is needed based on the desire for improved safety, improved accommodations for pedestrians/ bicyclists, and improved access to transit.

FISKE BLVD
CORRIDOR STUDY

9

Alternatives should address:

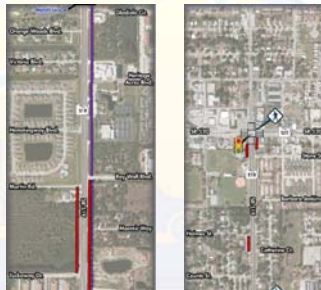

Guiding Principles	Goals	Objectives
Safety	Provide better pedestrian/vehicle separation	Reduction in sidewalks that are located at the edge of curb
	Install roadway street lighting to improve nighttime visibility	Reduction in miles of roadway without street lighting
	Improve pedestrian crossings	Increase in number of facilities and crossing that are ADA compliant Increase the visibility of marked crossings
Bike/Pedestrian Mobility	Enhance pedestrian facilities	Eliminate gaps in sidewalks
	Provide bicycle facilities	Creation of dedicated bicycle lanes
	Complete planned trail facilities	Connect local facilities to existing bicycle lanes and trails
Design Consistency	Provide consistent typical cross sections	Increase number of miles with consistent lane geometry
	Increase level of compliance with access management standards	Reduction in access facilities not in compliance with access management standards
Aesthetics	Identify opportunity for improved planning (aesthetic and maintenance)	Establish partnerships between Cities and business owners (including Viera)
		Develop gateway and themed signage
Transit	Provide improved bus stop facilities	Upgrade bus stops to meet ADA standards
		Provide shelters/benches at bus stops
	Accommodate mode choices	Provide connections from sidewalk to bus stop

10

Corridor Wide Improvement Options – Pedestrian Accommodations

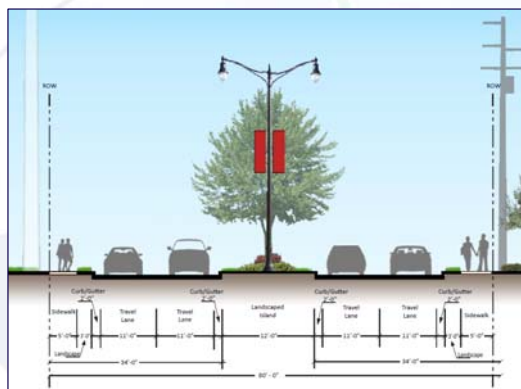

- Close sidewalk gaps
- Large gaps in crosswalks crossing SR 519
- Provide mid-block crossings in strategic areas to maximize use
- Provide adequate advance warning to alert drivers when the crosswalk is being utilized
- ADA standards at crossings

11

Corridor Wide Improvement Options – Traffic Calming Measures

- Narrow lanes, Raised medians and islands, Neckdowns at intersections, and Mid-block crossings help reduce pedestrian crossing distances.
- Small radii at intersections and channelization of traffic help reduce speeds and crossing distances.
- Trees planted near the road edge and in the medians help beautify the streetscape and visually narrow the street which encourages slower speeds.

12

Corridor Wide Improvement Options – Bus Stop Enhancements

- Enhance bus stop features (Shelters and Benches)
- Update Bus Stop locations to current ADA standards
- Potential for bus bays if typical section is repurposed

Source: Image from Field Video taken by VHB or Google Street View

Source: Image from Field Video taken by VHB or Google Street View

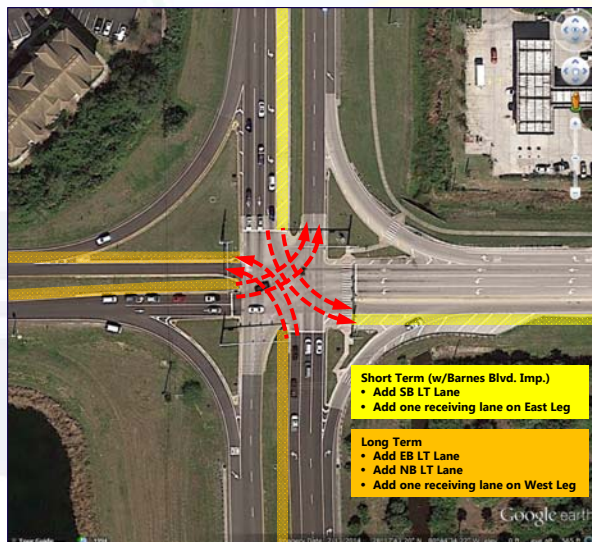

Spot Improvement Options – Roy Wall Boulevard

1. Barnes Boulevard/I-95
2. Roy Wall Boulevard Intersection
3. Hans Christian Anderson Elementary School
4. Levitt Parkway Intersection
5. Pluckebaum Road Intersection
6. Provost Park/Stone Street/SR 520 Intersection

Spot Improvement Options – Barnes Boulevard/I-95

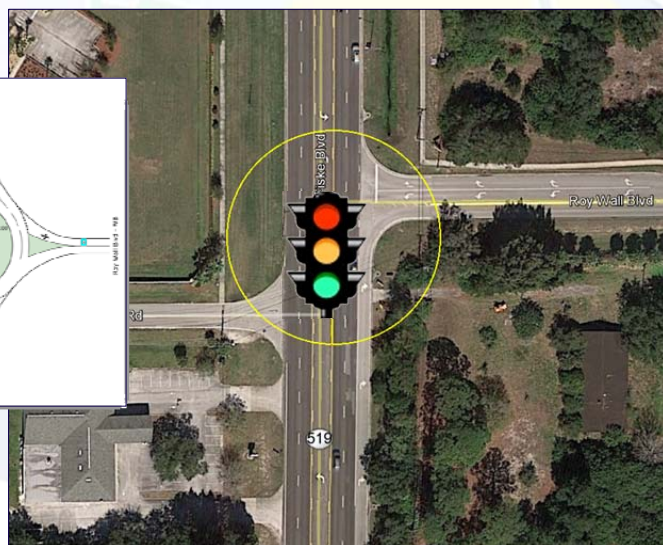

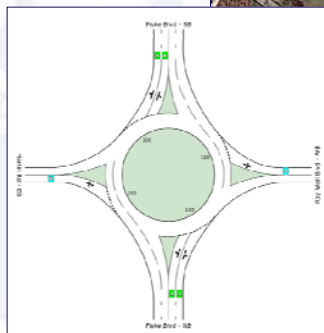

- Short Term (w/Barnes Blvd. Imp.)**
 - Add SB LT Lane
 - Add one receiving lane on East Leg
- Long Term**
 - Add EB LT Lane
 - Add NB LT Lane
 - Add one receiving lane on West Leg

15

Spot Improvement Options – Roy Wall Boulevard

Spot Improvement Options – Hans Christian Anderson

- On-Site Improvements
- Off-Site Improvements???

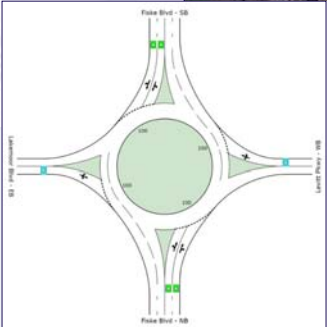

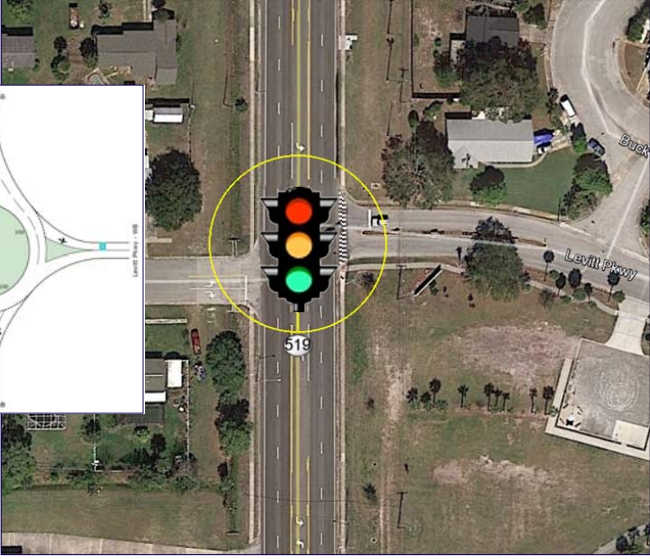

Centennial FDOT 1915 * 2015

Google earth

This slide features an aerial view of the Hans Christian Anderson area. A yellow rectangular highlight is placed over a section of the road, likely indicating a spot for improvement. The surrounding area includes residential buildings, a large open field, and a road intersection. The Centennial FDOT logo is in the bottom left, and the FISKE BLVD CORRIDOR STUDY logo is in the top right.

Spot Improvement Options – Levitt Parkway

Centennial FDOT 1915 * 2015

This slide features an aerial view of Levitt Parkway. A traffic light icon is overlaid on the road, with a yellow circle around it, indicating a spot for improvement. To the left, there is a diagram of a roundabout intersection with four approaches labeled 'Fiske Blvd - SB', 'Levitt Parkway - NB', 'Fiske Blvd - NB', and 'Levitt Parkway - SB'. The Centennial FDOT logo is in the bottom left, and the FISKE BLVD CORRIDOR STUDY logo is in the top right.

Spot Improvement Options – Pluckebaum Road

- Modify signal timing
- Intersection Improvements
 - Pull back NB Stop Bar
 - Align Crosswalk
 - Crosswalk on both sides of SR 519
 - Tighten up SB right-turn radii on Pluckebaum Road

Spot Improvement Options – Provost Park/Stone Street/SR 520

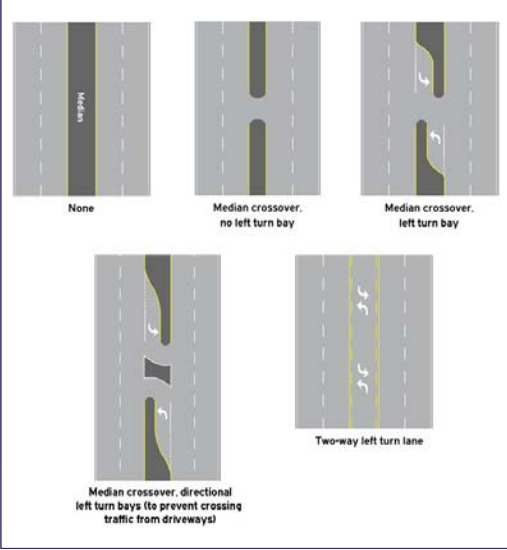

1. Right-in/out only at Stone Street
2. Formalized median
3. Mid-block Crossing
4. Wide multi-use path

Site Specific Improvement Options – Median Treatment Alternatives

None Median crossover, no left turn bay Median crossover, left turn bay

Median crossover, directional left turn bays (to prevent crossing traffic from driveways)

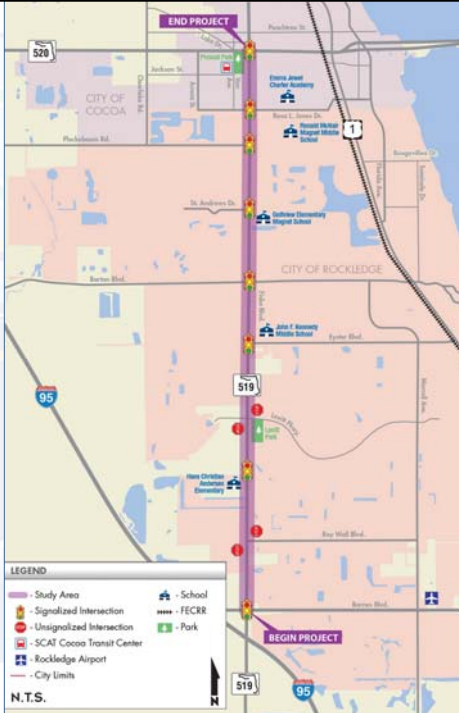

Two-way left turn lane

21

Roll Plot Exercise

Where do we need?

- Sidewalks?
- Trails?
- Bus stop improvements?
- Pedestrian crossings?
- Median treatments?
- Traffic calming measures?

Patrick O'Neill – City of Rockledge	Melody Butler – VHB
Don Griffin – City of Rockledge	Amphone Soupharath – VHB
Alix Bernard – City of Rockledge	Tyler Johnson – VHB
Jim McKnight – City of Rockledge	Sandra Guerrero – VHB
Joe LaSata – City of Rockledge	Rohan Sadhai – VHB
Kimberly Prosser – Brevard County	

The SR 519/Fiske Boulevard Public Involvement Meeting #1 was held on Tuesday, August 25, 2015 at the City of Rockledge City Hall chambers in Rockledge, Florida. The objective of the meeting was to accomplish the following goals:

- Introduce the public to the overall project, and the goals and objectives.
- Provide an overview of the existing conditions analysis findings.
- Gain consensus on the Purpose and Need and Guiding Principles.
- Receive input on issues along the corridor not identified in the existing conditions analysis.
- Begin the discussion of potential alternatives to address identified issues.

The session began with a presentation from John Moore, the FDOT Project Manager, and Rohan Sadhai with VHB. Meeting attendees were provided with a meeting agenda, comment form and a brochure with general information about the corridor and the study. Several poster boards and a banner were displayed around the room, including the following: Welcome board, Why are You Here board, Title VI and Related Statutes board, Regional Overview board, Issues and Opportunities board, and a banner of Existing Conditions (accident data and roadway level-of-service data).

A sign-in sheet was provided for meeting attendees. There were approximately 60 to 70 attendees.

The public meeting began with an open house at 5:30 PM. Attendees were encouraged to discuss their thoughts and concerns about the study corridor with the project team. At 6:00 PM the formal presentation began. It was led by John Moore, FDOT, and Rohan Sadhai, VHB.

Mr. Moore welcomed the attendees and thanked everyone for coming. He explained that the project and meeting are being completed according to Title VI and Title VII Civil Rights Acts and explained the process for someone wishing to file a complaint regarding these Acts. He explained the planning process of the corridor study and that the purpose of this meeting was to solicit input from the public to help determine the issues and opportunities along the corridor. Mr. Moore also stated that this meeting would include a discussion of the project's purpose, need and guiding principles. Mr. Moore then gave an overview of the SR 519 (Fiske Boulevard) corridor and discussed why the project was being completed.

An attendee asked for clarification of the term "multimodal". Mr. Moore explained that historically, transportation planning focused solely on the automobile, and explained that multimodal planning focuses on not only the personal vehicle, but also on pedestrians, bicyclists, transit users and other modes of transportation. Mr. Sadhai clarified that this study is not for the widening of Fiske Boulevard, and explained that a main component of the study is to analyze and provide alternatives and recommendations to enhance the multimodal system along the corridor.

Mr. Sadhai discussed the first stages of the planning project, including the Public Involvement Plan, the Project Visioning Team Meeting and the Existing Conditions Report. An attendee asked if the team was aware of the expansion of Health First. Mr. Sadhai responded that the team was aware of the expansion plans and that it was included in the future conditions analysis. He also stated that this expansion is involved in the discussion about Roy Wall Boulevard later in the presentation.

An attendee stated that Hans Christian Anderson Elementary School has approximately 700 students, not 900 as was reported. The woman identified herself as the Principal of the school and said that she could get numbers on how many students walk/bike to school. Later in the meeting, it was noted by a representative from Brevard County Public Schools, that the approximately 900 student number is the amount of student stations, which is the capacity of the school as determined by the State and not the current enrollment. It was also noted that not many students ride a bus to school, because the majority of students live within the two-mile radius of schools along the corridor (bus service is provided for students beyond a two-mile radius). This leads to many parents dropping their children off, which causes queuing issues on Fiske Boulevard. The topic was confirmed by many attendees and was included as a discussion topic later in the presentation.

Mr. Sadhai continued with the presentation. An attendee asked for clarification of "ITS" and suggested spelling out acronyms. Mr. Sadhai explained Intelligent Transportation Systems (ITS).

When discussing the Viera Development of Regional Impact (DRI) located south of the study corridor, Mr. Sadhai described what is meant by a Development of Regional Impact. He noted that the Viera DRI is not

as developed as planned for at this point in time. Attendees were surprised by the amount of approved development.

An attendee pointed out that there are more than three schools along Fiske Boulevard, Trinity Lutheran School and Rockledge Christian School. Mr. Sadhai agreed, and said that there are three public schools with direct access to Fiske Boulevard, and that the team was aware of and had identified and documented the other public and private schools within and along the study area.

An attendee asked how sidewalks could be described as “adequate” if they are right next to the street. She continued that she would prefer a buffer to feel safer. Mr. Sadhai explained that there are sidewalks along both sides of Fiske Boulevard for the majority of the study corridor and that this coverage of sidewalks is what helped determine the “adequate” description. Sidewalk buffers would be considered during the alternatives development phase of the project. It was also noted that utility poles are too close to the street and are dangerous. Mr. Sadhai acknowledged the comment.

In response to a question about geometric consistency, Mr. Sadhai described that the center turn lane varies in width along the corridor, from 12 feet in places to 17 feet in others. Multiple attendees noted that people often use the center lane as a travel or even a passing lane, and explained how drivers will turn left, or pull into the center lane and travel over ¼-mile before attempting to merge into the travel lanes. They said that this causes problems for people who are travelling in the opposite direction attempting to use the center turn lane to turn left from Fiske Boulevard. This issue was raised multiple times during the course of the workshop. They also noted that people travel in excess of the speed limit very often and asked if the project team has measured speeding. Mr. Sadhai stated that speed data has not been collected. Mr. Moore said that FDOT has the ability do a speed assessment. Attendees responded that speeding is a problem all day, especially between 7:30-9:00 AM and 2:00-5:30 PM. They added that the southern portion of the corridor, near the I-95 ramp is the primary location they see speeding as an issue because people exit I-95 and continue travelling very fast. An attendee asked who has jurisdictional responsibility for Fiske Boulevard because this can cause confusion for enforcement issues, and said that police are needed. A staff member from the City of Rockledge stated that the City of Cocoa Police, Brevard County Sheriff, and Florida Highway Patrol can all issue tickets from Rosa L. Jones Boulevard to the north. The City of Rockledge Police, Brevard County Sheriff and Florida Highway Patrol can issue tickets from Rosa L. Jones Boulevard south to Roy Wall Boulevard. The Brevard County Sheriff and the Florida Highway Patrol can issue tickets South of Roy Wall Boulevard.

An attendee asked if jurisdictional consistency could be an outcome of the study. Another added that people use the right lanes not as a merge, but in order to pass vehicles. Mr. Sadhai responded that the study will include short-term recommendations and that enforcement could be one of these short-term recommendations.

An attendee noted that getting out of Health First is very difficult due to traffic backups. Other attendees raised similar issues and said that the queuing from Anderson Elementary School blocks side streets so people cannot turn onto Fisk Boulevard.

An attendee asked if there was any truth to the rumor that FDOT wants to raise the speed limit on Fiske Boulevard. Mr. Sadhai and Mr. Moore both responded that they are unaware of this rumor. Mr. Moore added that in order for that to happen, FDOT would need to complete a detailed speed study, which is different than the speed analysis described when discussing the speeding issue. He also said that these studies do not usually raise speed limits. A City of Rockledge staff member also responded that with the Barnes Boulevard project, the City had to actually reduce the speed limit from 45 MPH to 40 MPH because of the state monies involved in the funding. Mr. Sadhai added that the objective is to create a corridor that is less conducive to speeding.

Mr. Sadhai continued discussing the issues and opportunities, including:

- Safety concerns
 - Three schools directly access the corridor
 - No dedicated bicycle facilities
 - Gaps in the sidewalk network
 - Long distances between pedestrian crossings
 - Minimal bus stop amenities/ADA access
- Geometric consistency
 - Typical section
 - Access management
- Desire for enhanced aesthetics along the corridor
- Traffic conditions
 - Fiske Boulevard and Barnes Boulevard/I-95
 - Fiske Boulevard and Roy Wall Boulevard Intersection
 - Congestion at the Hans Christian Anderson Elementary School
 - Fiske Boulevard and Levitt Parkway
 - Fiske Boulevard and Pluckebaum Road Intersection
 - Fiske Boulevard and Provost Park/Stone Street

An attendee noted that roads don't always align across Fiske Boulevard, so that putting in a signal would be difficult. He specifically identified the intersection of Fiske Boulevard and Levitt Parkway. Mr. Sadhai responded that FDOT had completed a signal warrant study at that location and that the study concluded that a signal was not warranted at the time. Attendees expressed frustration at this. Mr. Sadhai said that the numbers can only provide part of the story and that we are here tonight to gain input from the people who live in the neighborhoods because they have experiences and insight that cannot be derived from numbers and data.

Multiple attendees reiterated that it is hard to turn left onto Fiske Boulevard because vehicles are driving too fast in the opposite direction, and that many vehicles drive in the center lane. Mr. Sadhai noted that one alternative that could be considered is to put a median in certain locations to prevent this, and asked the audience for their thoughts about a median. Many attendees expressed that they did not like this idea because they would not be able to turn left from their street onto Fiske Boulevard. It should be noted that after the presentation, in one-on-one discussions during the open house, when it was explained how a median could operate, many residents agreed with the concept.

Mr. Sadhai continued discussing the following guiding principles:

- Safety: Provide better pedestrian/vehicle separation, improve pedestrian crossings and assess ADA compliance needs.
- Pedestrian Mobility: Enhance pedestrian facilities, provide bicycle facilities, and complete trail facilities.
- Design Consistency: Provide consistent typical sections and Access Management conformity.
- Aesthetics: Identify opportunity for improved planning (aesthetics and maintenance).
- Transit: Provide improved bus stop facilities and accommodate mode choices.

During this discussion, an attendee noted that a pedestrian refuge, or median, as described in the presentation, as well as decreased travel lane widths can work as traffic calming measures, which may help to reduce the vehicle speeds, but do not decrease the LOS. Mr. Sadhai agreed and said that the project team will be analyzing potential traffic calming measures. An attendee said that she had been in communities where crosswalks light up to alert drivers of pedestrians. Mr. Sadhai said that this is an alternative that may be analyzed to determine the cost and feasibility of such an improvement. Mr. Sadhai added that the pedestrian refuge could be considered where people are already crossing mid-block, in locations where there are no crosswalks, which would make the crossing distances shorter since there is a refuge between the two directions of traffic.

Mr. Sadhai continued to discuss the next steps of the planning process in the presentation.

An attendee asked who is paying for the improvements. Mr. Moore responded that this is an FDOT project and since Fiske Boulevard is a State-owned road, state and federal dollars are available as funding sources.

Another attendee asked who the recommendations would be going to. Mr. Moore responded that the alternatives would be reviewed by FDOT, the Cities of Cocoa and Rockledge, and the PVT, and then back to the public for final comments.

An attendee asked if a community grocery store could be an anchor store for a commercial development and said that it would act as a community gathering place. A City of Rockledge staff member responded that that particular issue is not a part of the corridor study and invited the woman to talk to City staff about this issue after the presentation.

Attendees discussed the possibility of an overpass. Mr. Moore said that he is okay with the idea of an overpass, but that it has to be in a sensible, relatable location. He continued that an overpass needs to be in a place where it functions to bring people over the road, instead of being seen as an obstacle and an eyesore, as he has heard them often described in other places. An attendee responded that there should be an overpass at the schools. Mr. Moore said that this is an alternative that can be analyzed during the next steps of the planning process. Another attendee asked about tunnels. Mr. Moore responded that tunnels are very expensive and that the water table can be a significant problem in this area.

One attendee noted that the blinking yellow light at John F. Kennedy Middle School is actually north of the crosswalk where there is a crossing guard for the children going to school. This causes backups at both the light and the crosswalk and can be dangerous. Mr. Moore and Mr. Sadhai agreed to look at this issue.

An attendee asked how long the improvements will take and said that other projects take too long to complete. Mr. Sadhai answered that this planning level study will have multiple recommendations. He continued that some of these will be short term improvements, which are usually smaller, sometimes operational improvements that can be implemented very quickly, and that others will be mid- and long-term recommendations. These recommendations, will have to be funded, designed and constructed and usually are not fully implemented until multiple years after the planning study is complete.

An attendee said that stakeholder outreach is a two-way street and asked why there was only one school principal at the event. He continued that the project team needs to do more outreach. Mr. Sadhai noted that there have been previous outreach meetings with numerous public agencies as part of the Project Visioning Team (PVT) and separate interviews. In addition, over 4,500 meeting notification mailers were mailed out along the corridor to invite members of the public (businesses and residents) that were not part of previous meetings and discussions to come out and provide their thoughts about the corridor. Mr. Moore followed by stating that one of the purposes of this meeting is to make sure that the project team is talking with the correct stakeholders and ask those in attendance who is missing, and who else needs to be at the meeting, so that further outreach can happen as the process moves forward. The attendee responded and asked if anyone from the City or School Department was invited. City of Rockledge staff and a member from Brevard Public Schools identified themselves and said that they have been involved in the process, including the site visit and PVT meetings. They also noted that the City and Brevard County Schools have been working together on some of the issues already discussed at this meeting. The attendee said that this alleviated some of his concern.

An attendee expressed frustration that the project team is asking for input, but already presenting solutions. Mr. Sadhai reiterated that alternative concepts are not being proposed. The two concepts presented were presented only to get the attendees thinking of possible solutions and gain input on what they feel might be appropriate alternatives for Fiske Boulevard. The attendee responded that he felt like the alternatives presented were already pre-determined solutions.

The Principal of Hans Christian Andersen Elementary School stated that the Fiske Boulevard Corridor Planning Study Existing Conditions Report already had recommendations in it. She cited one recommendation about providing a drop off zone where parents would drop off their kids and the kids would then walk to Hans Christian Anderson School. Mr. Sadhai explained that the Existing Conditions Report did not have recommendations for the Fiske Boulevard Study. It was determined that this item was part of the adopted Space Coast TPO Long Range Transportation Plan and pertained to the potential of a Walking School Bus Program at unidentified Brevard County Schools. The Principal also asked what the criteria to prioritize the recommendations are. Other attendees added to this, expressing concern that they will provide their input on the alternatives, and the final recommendations will be what FDOT wants, ignoring the public concerns; and will the public be able to say yes or no to the final recommendations. Mr. Moore responded that the Purpose, Need and Guiding Principles will be the criteria that is used to balance recommendations. He continued that if the public approves of the Guiding Principles the way they have been presented, these will provide the direction for the project team moving forward. It was also noted that alternatives and recommendations also have to be financially feasible. At this time Ms. Judy Pizzo, FDOT Project Manager, introduced herself as the new Project Manager for this study, as Mr. Moore is moving to another department within FDOT. She responded to the previous comments by stating that it is her job to sell the public's ideas and wants to the other departments at FDOT. She said that there are no preconceived notions or ideas coming into this project and that it is the attendees' and stakeholders' corridor, and that public input will guide the alternatives analysis and development of recommendations.

An attendee said that it was good that the project team visited the corridor when the schools let out for the day, as this causes significant issues along the corridor. They added that it is also important to look at the corridor when Health First employees leave work, because there are many issues and concerns at this time as well.

An attendee asked if Health First had been approved by the City for expansion. Alexandra Bernard, City Planner for the City of Rockledge, answered that Health First did go through the City's site plan review process. During that process the access from Roy Wall Boulevard, and the potential for a right out only from the existing access onto Fiske Boulevard, were discussed as components of the site plan. Another City staff member also noted that in regards to a possible signal at Roy Wall Boulevard, the Philip's Landing subdivision can add an access point to Martin Road from where the mailboxes currently are. A resident of that community said that they were told that the City did not allow the developer to put an access point there. The City staff member said that the City did not prohibit an access point to Martin Road and actually said that the developer can put one in at any time. Another attendee expressed frustration that the City was going to put a signal at Roy Wall Boulevard and not at Levitt Parkway. A City staff member responded that this is not what was being said, and that it is just a potential. The staff member, Mr. Sadhai and Mr. Moore all stated that before a signal would be put in at Roy Wall Boulevard, a signal warrant study would need to be completed. Ms. Pizzo, Mr. Moore and Mr. Sadhai concluded the presentation and thanked the attendees for coming out and sharing their thoughts, and invited them to stay for one-on-one conversations with the project team.

The project team answered questions and had conversations with attendees in an open house format. Attendees also completed comment cards.

The Public Workshop concluded at 8:30 PM.

SOME THING MUST BE DONE ABOUT ANDERSON TRAFFICE blocking side streets. I do NOT KNOW WHAT TIME SCHOOL IS DISMISSED, I do KNOW THE CARS BLOCK GENEVIEVEAS EARLY AS 1:00 PM.

UNLESS WE GET SOME LAW ENFORCEMENT ON FISKE NOTHING YOU DO WILL HELP THE PROBLEM. I TRAVEL FISKE AT DIFFERENT TIMES ALMOST EVERY DAY. I HAVE NOT SEEN ANY ENFORCEMENT VEHICLES IN WEEKS.

CARS AND TRUCKS GO AT LEAST 65+70 MPH IN SCHOOL AREAS. EVEN SCHOOL BUSES SPEED IN THOSE AREAS.

ROAD RAGE IS ALSO A PROBLEM. DRIVERS CUT PEOPLE OFF AND WILL NOT MOVE OVER FOR VEHICLES TO GET OUT OF TURN LANES THAT IS THE MAIN PROBLEM AT HEALTH FRIST.

MOST DRIVERS NEED TO READ THE FLORIDA HANDBOOK LAW ENFORCEMENT INCLUDED. THEY DRIVE IN RAIN WITH NO LIGHTS ON.

1. DON'T KNOCK DOWN PHILLIPS LANDING WALL TO ALIGN ROY WALL & MARTIN ROAD. INSTEAD, USE LAND ON EAST SIDE OF FISKE. ~~WALL~~. KNOCKING DOWN THAT WALL PUTS THE ROAD LITERALLY ON TOP OF THE COMMUNITY POOL.
2. ADDRESS TRAFFIC CONGESTION AT SCHOOL TIME, HOPEFULLY ELIMINATE CARS TOTALLY BLOCKING THE TURN LANES CLEAR BACK TO PHILLIPS LANDING OPEN!
3. IF VIERA "INCREASES" RESIDENCES BY 31K OR SO BY 2029, SHOUDNIT FISKE BE WIDENED?
4. HAVE ROCKLEDGE & COCOA PDS ENFORCE SPEED LIMITS MORE ON FISKE - UNMARKED CARS NEEDED PROBABLY. EVERYONE SLOW DOWN WHEN SEEING POLICE CARS.
5. PEDESTRIAN BRIDGE(S) CLOSE TO SCHOOLS TO AVOID CHILDREN CROSSING FISKE.

The width of sidewalk, placement from curb and plantings to make walking and biking more inviting
Could lines be buried as we widen sidewalks.

The open ditches are not appealing get filled with trash - mosquitos
Boardwalk type of path for sidewalk could that work over the ditches

Like the center walkway ped crossing would like to see lighted crosswalk -
Thank you for including the community

Your comments are important! Please use the space below to express your input about this project.

- With the high number of children & parents going to the schools adjacent to FISKE, can pedestrian walk ways be constructed similar to the ones on US1 north of Cocoa. Doing so would make the cross over from east to west and west to east pedestrian safe traffic much much safer.
- The intersection Phillips Highway and Fiske Blvd. just on to FISKE result in many "head to head" confrontations.
- NEED MORE LIGHTING FOR ROAD EDGES AND INTERSECTIONS.

Check the yellow blinking light in front
of Kennedy - N. bound
It's in front of the school north of
the cross walk + red light.

I was told a few years ago the
DOT had to change it. - as
long as you are working with
them you can bring this up.
It is a safety factor!

Sadhai, Rohan

From: Gumm, Corrina <corrina.gumm@brevardcounty.us>
Sent: Friday, September 04, 2015 2:56 PM
To: Sadhai, Rohan
Cc: Denninghoff, John P; Holmes, Andrew; Prosser, Kimberly; Toro, Deanna; Swanson, Devin A; Moore, John P. (John.Moore@dot.state.fl.us)
Subject: RE: SR 519/Fiske Boulevard - Public Meeting Summary

Dear Mr. Sadhai,

Thank you for sharing the meeting summary with us. I regret that I was unable to attend this meeting on August 25th to see the presentation. I see that there was a lot of good discussion, including a question from one of the attendees on what "ITS" is. I am interested in learning more about what ITS improvements may be under consideration.

The purpose for my email today is to submit the following Public Comment in response to the email from John Moore dated July 22, 2015. In his letter, he had requested that written comments be submitted to you no later than September 4, 2015.

Brevard County has identified a need for the Emergency Operations Center (located near the intersection of Pennsylvania Ave and Cedar St) to have two FDOT camera feeds, so that they can better manage large-scale incidents with the additional information provided via traffic cameras. This future Fiske Boulevard improvement project would provide a great opportunity for fiber optic cable to be run from the I-95/Fiske Interchange up to Pennsylvania Avenue, which runs directly to the EOC. This would benefit ITS as well as the obvious EOC use, as it would provide a complete loop for at least a portion of I-95 (SR 520 to Fiske) and a redundant link to the FDOT Variable Message Sign on I-95 between Fiske and SR 520.

Let me know if you have questions and please add me to your email distribution list for this project.

Regards,

Corrina Gumm, P.E.
Traffic Operations Program Manager
Brevard County Public Works

On August 24, 2015, I attended a meeting in Rockledge City Hall concerning State Route # 519. I have a major concern about the amount of time that presenters gave to develop the materials that were presented at this meeting. For example, I believe that the elaborate charts/ maps and impact study on the back table were almost like "smoke and mirrors" perhaps cookie cutters from other Florida projects or even other states. The most important chart seems to be missing. That would be a list of the concerns of the stakeholders about needed changes along the roadway.

The research about the Fiske Road corridor seems to only involve a bus trip of a few hours. Which we all know could have been obtained from Google Maps pedestrian view. In February when the project was started, a short questionnaire could have been sent to all the stakeholders in the area to get a preliminary view of the problems and or concerns. Then the August meeting would have had a little more substance rather than pretty form.

The meeting was led by John Moore (FDOT) who introduced himself as the project manager. Then at the end of the meeting, Judy Pizzo (FDOT) (who had just arrived at the meeting) laughingly introduced herself as the project manager. She then fist bumped John on the upper arm and "lol" about him leaving her the project. I wonder why her name is on all the information as a project manager and why she didn't give the presentation. One of the meeting's purposes was to build report with the stakeholders. Rapport was built with John, but now there's a new project manager who really isn't that new since her name is on all the paperwork and even the PowerPoint.

The personnel from FDOT seemed surprised at how many people attended the meeting and perhaps did not know how interested and concerned we really are. Following is a list of my concerns for the Fiske Road corridor project:

1. The priorities seem to be undefined. There seems to be the same amount of emphasis placed on aesthetics as safety. My principal concern is concerning safety of all the schools both public and private on Fiske Road. Only the public schools were mentioned, but the several private schools are also a huge concern. My second safety concern is for access from neighborhoods to State Route #519.

2. Rockledge officials attended the meeting but we're not really allowed to comment much. The DOT representatives didn't seem to know about any improvements that Rockledge had planned. Such as extending Gus Hip Road to meet Martin Road. Spending a little more time with Rockledge officials to find out about the enforcement on 519 and other factors might be advisable.

3. Will the DOT representatives speak to any of the businesses on Fiske Road especially Health First? Are they aware of how many employees are at each business and the amount of traffic congestion (especially Health First area)?

4. Preconceived solutions. Many members of the audience thought that the representatives had already made preconceived solutions, such as eliminating the middle lane and not considering the lady's suggestion of a traffic light at Levitt Park. Overall, the audience seemed to feel that everything was already planned and money was already loaded in some way and that we were just a sort of second thought

5. Bike path related. I have concerns about the way the bike path was introduced as I feel it should be separated from the roadway because of the high traffic on Fiske Road as well as the speeders.

6. Inferred usage of medians. If medians are added to the project, please don't add any trees or large shrubs to further block visibility and add unnecessary expense to this project. Making the project "pretty" is my lowest priority for the project.

In conclusion, it is a very good idea to involve the stakeholders in decisions. However, their input should have been included from the beginning of the project in February as well as the August meeting. Also, several suggestions from the stakeholders did not seem to be taken seriously and dismissed with the comment that past studies showed it not necessary. I thought this was a new study to improve Fiske Road. Further making me wonder about this project and its seriousness about stakeholders input.

Regards,

Mary Ann Schuenger

Rockledge, FL 32955

Meeting #1
August 25, 2015

SR 519 (FISKE BOULEVARD) CORRIDOR PLANNING STUDY

Public Involvement Workshop

Authority

This public meeting is being held in accordance with Chapter 120, Florida Statutes.

This project is being developed in accordance with the Civil Rights Acts of 1964 and 1968. Under Title VI and VIII of the Civil Rights Acts, any person(s) or beneficiary who believes they have been subjected to discrimination because of race, color, religion, sex, age, national origin, disability, or familial status may file a written complaint with:

FDOT's Equal Opportunity Office

605 Suwannee Street, MS 65

Tallahassee, Florida 32399-0450

Telephone: (850) 414-4747

Meeting Agenda

- I. Introductions
- II. Project Background and Goals
- III. Existing Conditions Report Overview
- IV. Purpose and Need – Guiding Principles
- V. Potential Alternatives
- VI. Next Steps: Project Schedule

FISKE BLVD
CORRIDOR STUDY

Community Overview

- Two (2) meetings with key milestones
 - Public Kick-off Workshop – August 25, 2015
 - Alternatives Workshop – late 2015/early 2016
- Provide input on the planning and concept development process
- Provide input on corridor alternatives
- Share your local knowledge and history

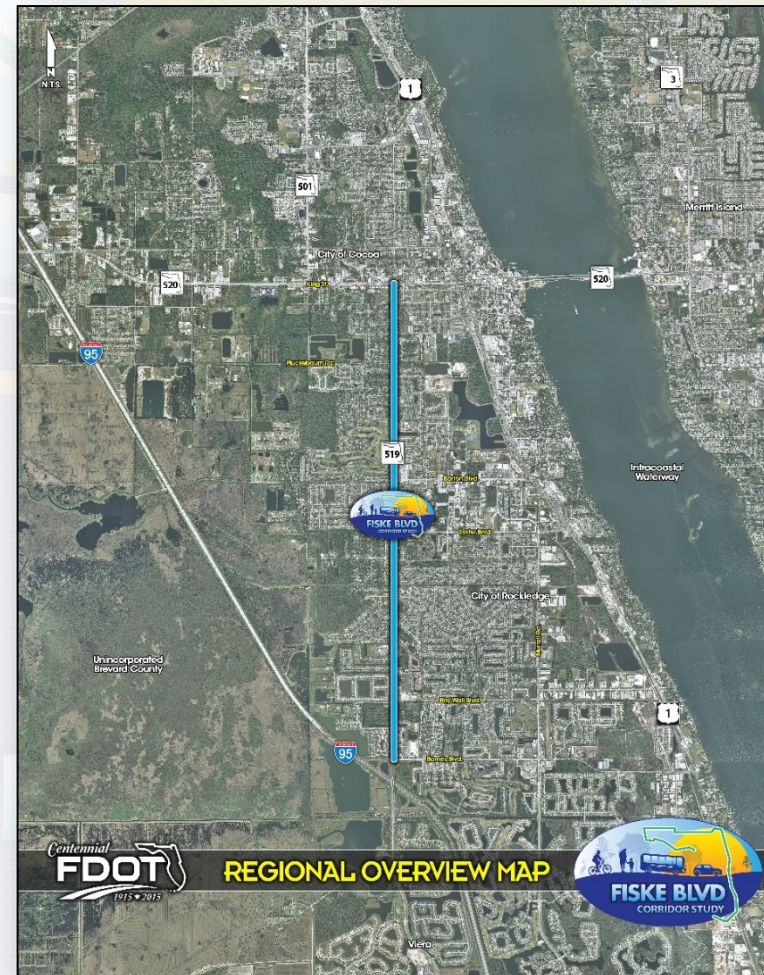

Project Background and Goals

- Project requested by the TPO and Brevard County to coordinate the development of a future vision for SR 519 that establishes a **multimodal approach** to providing for future transportation needs.
- Community-based evaluation to determine how best to meet the **needs of current and future users**.
- Establish a long-term plan to guide evolution of the corridor that appropriately correlates the **balance between land use and transportation planning**.

Study Area

- From **Barnes Boulevard/I-95 NB Ramps** to **SR 520**
- 4.2 miles
- Transitional character, varying cross sections
- Primary north-south route between I-95 and SR 520
- Viera connection

Supporting Plans: 2013 CRA Plan Recommendations

Cocoa Diamond Square CRA

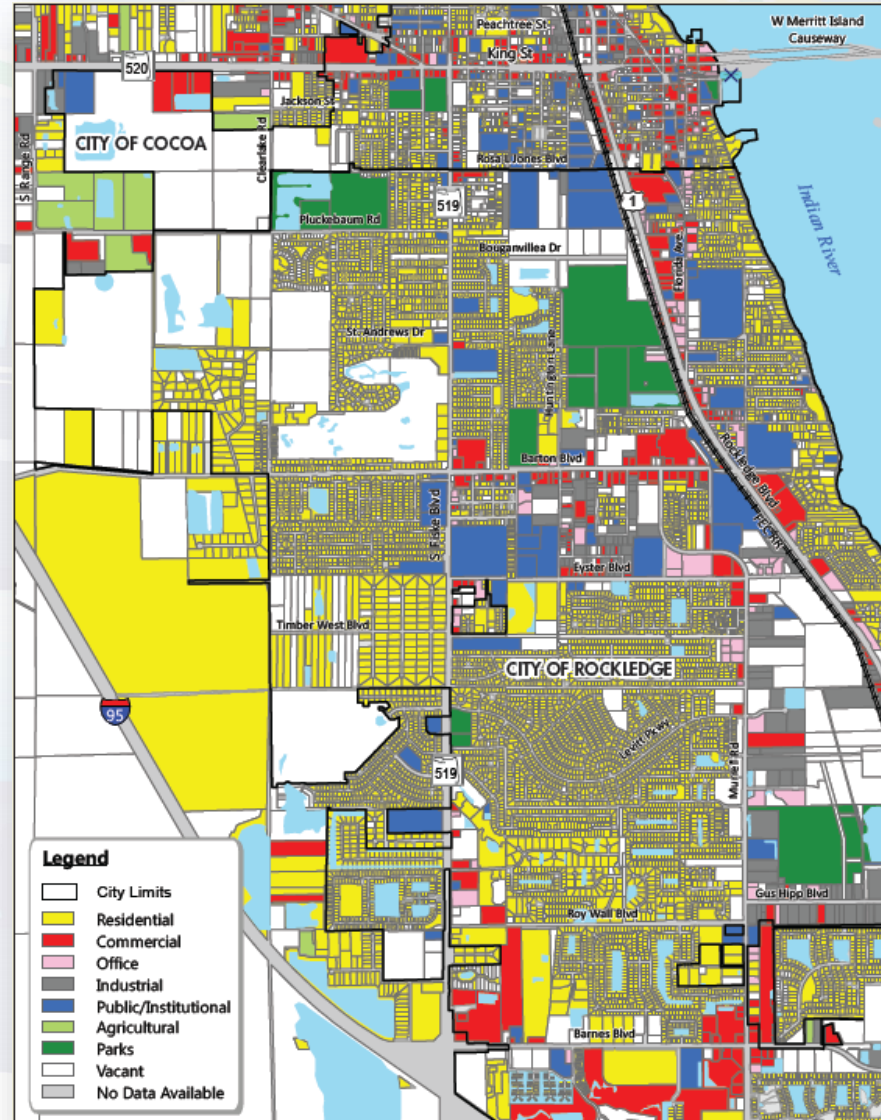

- Enhance streetscapes and pedestrian connectivity, and create neighborhood gateways
 - Need for a mid-block crossing at Holmes Street, just south of Provost Park
 - General coordination with FDOT to implement access management strategies, including reconfiguration of center medians, driveway access points and pedestrian crossings

Rockledge CRA

- Attract a new anchor tenant to the Village Green Shopping Center
- Encourage mixed-use development near JFK Middle School
- Improve the intersection of Fiske Boulevard and Barnes Boulevard, as it is "a significant intersection and serves as the southern entrance to the City of Rockledge."

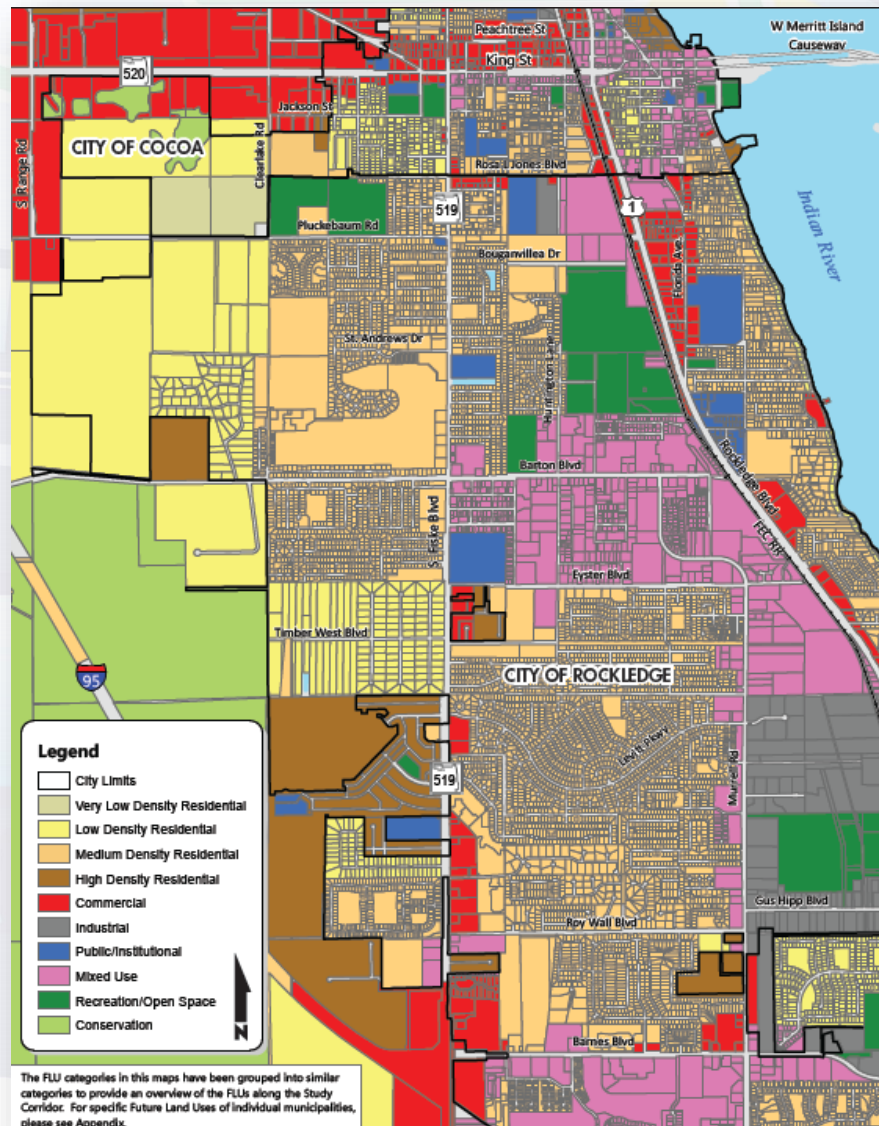

Existing Land Use

Land Use	Percentage (1/2-Mile Buffer)
Residential	40.6%
Commercial	7.5%
Office	0.6%
Industrial	1.1%
Public/Institutional	9.5%

Transit Conditions

Route	Service Frequency	FY 2013 Annual Ridership
1	30/60 min 120 min	237,209
4	15/60/15/60 Min 60 Min	338,214
6	15/30/60 Min 60 Min	261,626
8	Varies from 90 to 150 min	17,494

Transit Conditions

- Bus stops along SR 519 have bus stop signs and benches for seating
 - Most stops are located in areas where there is existing sidewalk
 - Majority of stops have accessibility challenges (e.g., lack of landing pad)

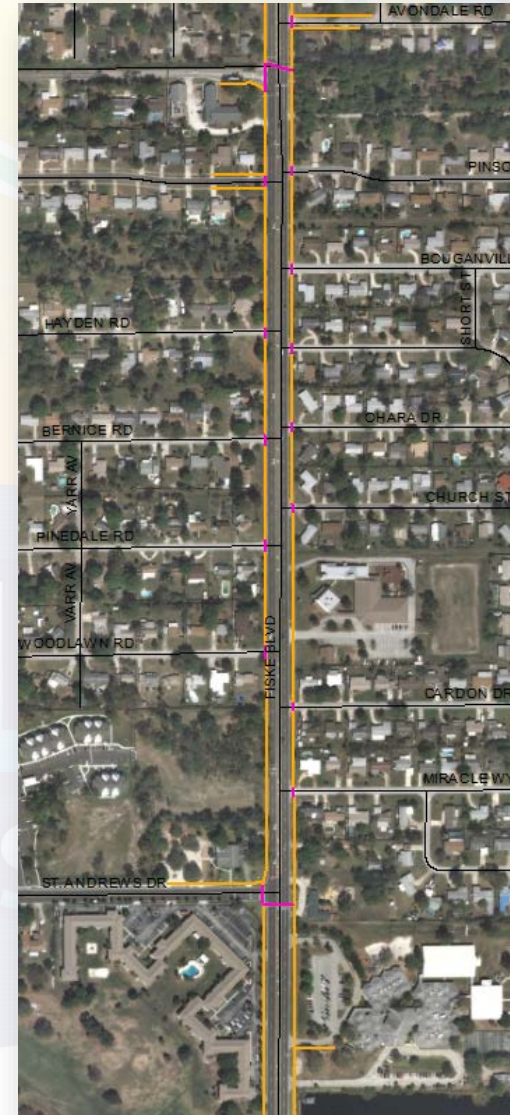

Typical Bus Stop

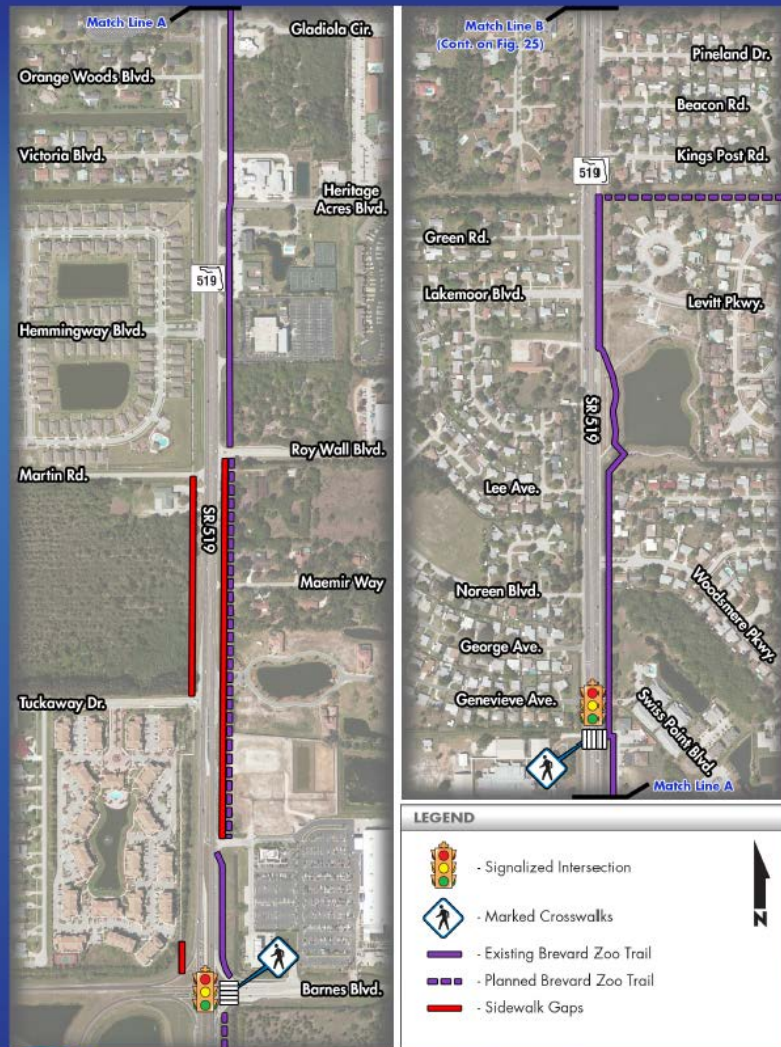

Bus Shelter at Fiske Boulevard/Barton Boulevard

Bike/Ped Conditions

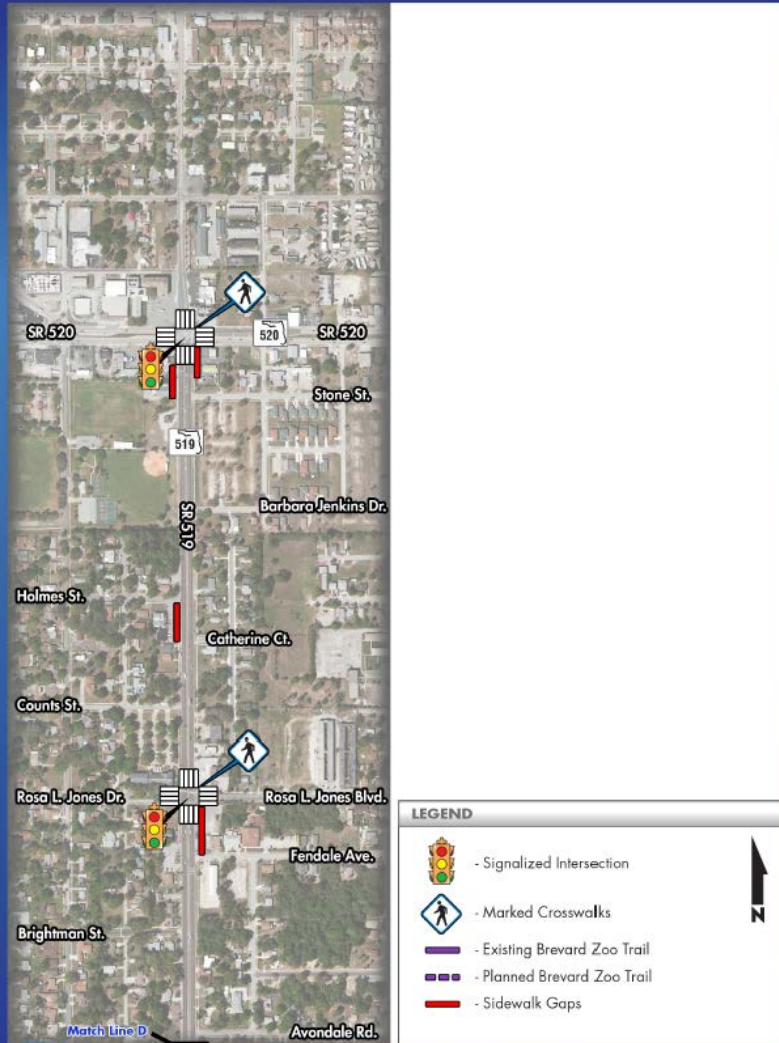

- Aerial photography and field visit
- Sidewalks
 - Generally along both sides of the roadway
 - Except southern part of the Study Area
- Crosswalk spacing often exceeds ½- mile
- No bike lanes identified along SR 519

 - **No identified improvements**

FISKE BLVD
CORRIDOR STUDY

Developments of Regional Impact

■ Viera DRI

- Approximately 20,646 acres of land and is a mixed-use development, proposed for:
 - 31,619 residential units
 - 3,169,961 square feet of office
 - 3,438,127 square feet of retail and service,
 - Hospital, stadium, movie theater, golf courses (72 total holes) and hotels
- Expiration date of December 29, 2029
- Planned in four phases

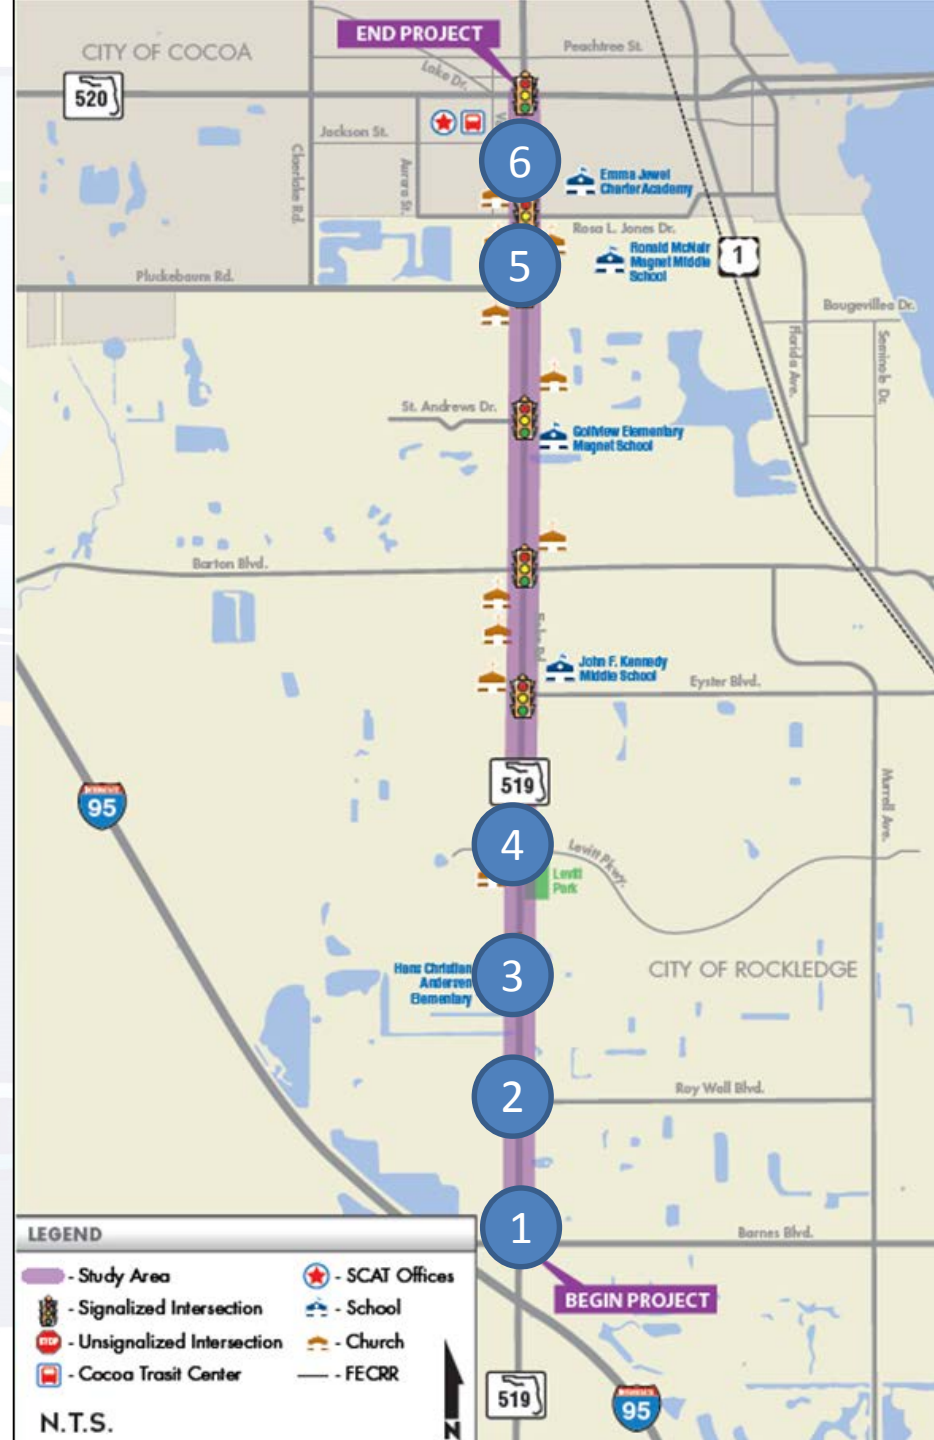

Issues & Opportunities

- Safety concerns
 - Three schools directly access the corridor
 - No dedicated bicycle facilities
 - Gaps in the sidewalk network
 - Long distances between pedestrian crossings
 - Minimal bus stop amenities/ADA access
 - Lack of lighting along southern portion of corridor
- Geometric consistency
 - Typical section
 - Access management

FISKE BLVD
CORRIDOR STUDY

Issues & Opportunities

- Desire for enhanced aesthetics along the corridor
- Traffic conditions
 1. Barnes Boulevard/I-95
 2. Fiske Boulevard and Roy Wall Boulevard Intersection
 3. Congestion at the Hans Christian Anderson Elementary School
 4. Levitt Parkway
 5. Fiske Boulevard and Pluckebaum Road Intersection
 6. Provost Park/Stone Street

N.T.S.

Purpose and Need Statement

- **Purpose:** To provide an **enhanced multimodal transportation network** that promotes the creation of a more **walkable community**, improves **access to employment**, supports **economic development** goals and provides **safe and convenient** access to **users of all ages and abilities**.
- **Needs Statement:** An enhanced multimodal network is needed based on the desire for improved safety, improved accommodations for pedestrians/ bicyclists, and improved access to transit.

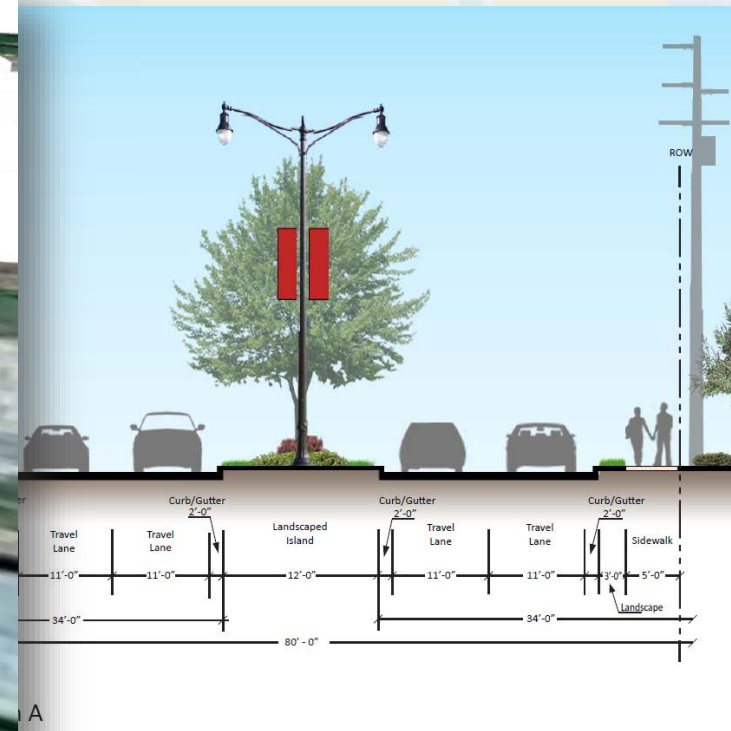

FISKE BLVD
CORRIDOR STUDY

What are the Corridor Guiding Principles?

- **Safety:** Provide better pedestrian/vehicle separation, improve pedestrian crossings and assess ADA compliance needs.
- **Pedestrian Mobility:** Enhance pedestrian facilities, provide bicycle facilities, and complete trail facilities.
- **Design Consistency:** Provide consistent typical sections and Access Management conformity.
- **Aesthetics:** Identify opportunity for improved planning (aesthetics and maintenance).
- **Transit:** Provide improved bus stop facilities and accommodate mode choices.

Potential Alternatives: Pedestrian Refuges

- Adds green space to median and pedestrian refuge

Potential Alternatives: “Danish” Offset Crosswalks

- High visibility crosswalk forces pedestrians to look towards oncoming traffic before crossing

The SR 519/Fiske Boulevard Public Involvement Meeting #2 was held on Tuesday, March 15, 2016 at the Cocoa Civic Center located at 430 Delannoy Ave, Cocoa, FL 32922. The objective of the meeting was to accomplish the following goals:

- Provide an overview of the overall project, and the goals and objectives.
- Provide an overview of the Purpose and Need and Guiding Principles.
- Introduce the public to the conceptual alternatives.
- Receive input on the conceptual alternatives.

A sign-in sheet was provided for meeting attendees. There were approximately 32 attendees. The public meeting began with an open house at 5:30 PM. Meeting attendees were provided with a comment form and a brochure with general information about the corridor and the study. Several poster boards and a banner were displayed around the room, including the following: Welcome board, Title VI and Related Statutes board, Regional Overview board, Issues and Opportunities board, a banner of Existing Conditions (accident data and roadway level-of-service data), and boards showing the specific improvements at locations along the corridor.

Attendees were encouraged to discuss their thoughts and concerns about the study corridor and the proposed alternatives with the project team. At 6:00 PM the formal presentation began. It was led by Judy Pizzo, FDOT, and Rohan Sadhai, VHB.

Ms. Pizzo introduced the project and discussed the corridor study project development process, the partner agencies involved, and a project overview. She then continued to explain the project's Purpose and Need, and provided a summary of public involvement and issues identified by the public and Project Visioning Team (PVT)

including that the center turn lane is used for travel, speeding, sidewalks, congestion at the Hans Cristian Andersen School, Pluckebaum Road, Provost Park, Health First access points and potential signals at SR 519 intersections with Roy Wall Boulevard and Levitt Parkway.

Ms. Sadhai discussed on-going projects along the SR 519 corridor. These include:

1. The widening of Barnes Boulevard being constructed by Brevard County
2. Coordination between the School Board, the City of Rockledge and Hans Christian Andersen School to increase on-site improvements to reduce congestions and queuing on SR 519 during schools pick-up and drop-off times
3. The Health First expansions, including a new access from the site on Roy Wall Boulevard
4. The planning and construction of a sidewalk on the south side of Provost Park to accommodate the existing pedestrian traffic being conducted by the City of Cocoa
5. The widening of Stadium Parkway associated with the Viera Development of Regional Impact (DRI), located south of the study corridor.

An attendee asked if SR 519 continued into Viera. Mr. Sadhai answered that no it is not, and that the Viera DRI is not within the study limits.

Mr. Sadhai discussed the typical cross sections, both existing and proposed, of the study corridor. He explained that the recommended concept is to reduce the travel lanes to 11 feet in width and the center turn lane to a 12-foot center lane with 14-foot medians to accommodate left turn lanes. He explained that this concepts will help improve safety along the corridor and address the speeding and center-turn lane issues identified by the residents. He also explained that neither this concept, nor any of the site specific concepts involve road widening. He said that for the most part, curbs will not be relocated, but in some instances this is necessary for sidewalk or lane improvements; however, he noted that no recommended concept involves the taking of property that is outside of the State-owned right-of-way.

Mr. Sadhai then discussed the site specific recommended concepts, starting with the intersection of SR 519 and Barnes Boulevard, including short and long term improvements of adding left turn lanes to accommodate future traffic conditions. An attendee said that the I-95 ramps are already backed up to turn left onto Fiske Boulevard and asked why a second left turn lane is in the long-term improvements. Mr. Sadhai said that currently Barnes Boulevard is being widened to four-lanes and the construction is on-going. He also explained that there is a new interchange with I-95 on Viera Boulevard and that once complete, these improvements may alleviate issues at this intersection, so the conditions at the intersection will need to be re-evaluated once the on-going projects are completed. An attendee asked when the Barnes Boulevard construction will be complete. A City of Rockledge staff member answered that the construction is anticipated to be completed in June 2017.

Mr. Sadhai then discussed the recommended concept for the SR 519 and Roy Wall Boulevard intersection, consisting of realigning Martin Road and constructing a roundabout. He explained that roundabouts help to reduce traffic speeds and improve safety. Mr. Sadhai also discussed the access management improvements for the Health First and Phillips Landing sites, including a median that will restrict Health First's access along SR 519 to right-in/right-out, making their main access along Roy Wall Boulevard. He continued that this will also mean that there will be no left turn out of Phillips Landing onto SR 519 northbound, but that there is a dedicated left turn into Phillips Landing.

An attendee said that with the amount of traffic on Fiske Boulevard and the fact that drivers are not courteous, there may not be enough distance between the entrance of Phillips Landing and the roundabout to merge into the correct lane to make a U-turn to go north. Mr. Soupharath said that it is important to remember that there will be improvements along the whole corridor aimed to reduce speeding, which will help with the flow of traffic at the

intersection. Mr. Sadhai added that there is the potential for another connection on Martin Road for the Philips Landing subdivision meaning that they will be able to go into roundabout from Martin Road to go north of SR 519. A City of Rockledge staff member noted that this potential connection is still owned by the Homeowners Association (HOA), and that the City of Rockledge, Brevard County and the HOA will need to work together if this connection will happen. An attendee expressed concern that the subdivision currently only has one way in and one way out, and that adding another connection point will bring in a criminal element and cause security issues. Mr. Sadhai and Mr.

Soupharath answered the original question that there is sufficient distance for drivers to merge into the correct lane and that by removing the center lane, there will not be the queuing issues along the road that currently exist.

An attendee asked if there is a dedicated left turn lane into Phillips Landing. Mr. Sadhai confirmed that the recommended concept includes a dedicated left turn into Phillips Landing.

Mr. Sadhai then discussed the on-site improvements at Hans Christian Andersen School, explaining that the City of Rockledge, and School Board are currently working on improvements to increase vehicle stacking on-site. A City of Rockledge staff member explained that the engineering is being done now to move the queuing on site. He also said that there will still be police to man the crossings and the area at the school in response to a comment from an attendee.

An attendee noted that the vehicles stacking in the left turn lane cause issues, and asked how the on-site improvements will help if the vehicles still cannot make the left turn into the school site. Mr. Sadhai answered that with the queuing on-site and the design there will be room to accommodate these vehicles and that the turnaround time for vehicles waiting is pretty quick.

Mr. Sadhai then discussed the recommended concept for the SR 519 and Levitt parkway intersection, specifically the construction of a roundabout. He also said that according to a previous study, there is not enough traffic at this intersection to warrant a traffic signal, leading to the roundabout being the preferred concept.

An attendee asked if the chevrons were midblock crossings. Mr. Sadhai answered yes, and explained that these crossings have refuges between the directions of traffic leading to an easier and safer crossing for pedestrians. He also noted that bike lanes and sidewalks were incorporated into the design of the roundabout.

An attendee said that he understood that a traffic signal is not warranted, and then asked how much a signal costs to construct compared to a roundabout. Mr. Soupharath said that a general estimate could be around \$500,000 for the roundabout and \$200,000 for a signal, but that the signal would also need additional operating and maintenance costs.

An attendee asked if the 300 new employees at Health First would warrant a signal at Roy Wall Boulevard. Mr. Soupharath said that the 2020 and 2040 traffic projections included redistribution of traffic from Health First based on the new entrance, and added that though at the peak hour, the number of vehicles may warrant a signal, this number is not consistent throughout the day, and that the 8-hour average does not warrant a signal.

An attendee noted that the church south of the roundabout, Hope United Church of Christ, is a polling place for voters. Attendees agreed that they were concerned with the removal of the left turn lane into the church because vehicles would then queue in the travel lane. Mr. Sadhai thanked the man for his comment and said that the team can look at providing a left turn lane for the church.

An attendee asked how bicycles use the roundabout. Mr. Soupharath said that there are two options, a cyclist can either merge into traffic when the bike lane ends before the roundabout and then use the roundabout as a vehicle, or a cyclist can use the bike ramp up to the sidewalk that is provided and continue through the roundabout on the sidewalk as a pedestrian. Ms. Pizzo added that since speeds will be reduced to 25 miles per hour to enter the roundabout, cyclists will be able to merge more safely into the vehicle lane, than if it was at a higher speed.

An attendee asked if the crosswalks at the roundabout would be electronic crosswalks. Mr. Sadhai said that they would not.

Mr. Sadhai then discussed the recommended improvements for the SR 519 / Pluckebaum Road intersection. He explained that the current design of the intersection makes the intersection unsafe because the stop bar is too far forward, causing cars to either wait in the intersection or continue through when they do not have the right of way. He also said that the radius of the right turn from Pluckebaum Road onto SR 519 is very large and causes vehicles to act as if it is a yield instead of a stop, leading to unsafe conditions for vehicles, cyclists and pedestrians. He said that by reducing this radii, relocating the stop bar at the intersection and adding a crosswalk, the improvements aim to make the intersection safer for all users.

Attendees agreed that this is a dangerous intersection for vehicles and pedestrians and that there have been a lot of pedestrian crashes here. An attendee said that it is because cars turning right onto Fiske Boulevard do not look for pedestrians.

Mr. Sadhai then discussed the recommended improvements for area of the corridor near Provost Park, including adding a pedestrian refuge to make pedestrian crossings safer and address identified access management and congestion issues at the SR 519 / Stone Street intersection.

An attendee asked how expensive is a lighted pedestrian crossing and if this was an option. Ms. Pizzo answered that a lighted pedestrian crossing was analyzed, but in consultation with team engineers, it was determined that the crossing is located too close to the intersection of SR 519 and SR 520.

An attendee asked if a fence could be built south of the project to protect the homeowners from trash that blows onto their property from the park. Ms. Pizzo and Mr. Sadhai explained that this is out of the scope of this FDOT project, and invited the attendee to provide a written comment that would be passed along to the City of Cocoa.

An attendee said that the right turn onto SR 520 backs up even more than the left turn lanes, and causes delays because the queue backs all the way into the through lane at Stone Street. Ms. Pizzo and Mr. Sadhai explained that due to the intersection with Stone Street the right turn lane cannot be extended. Mr. Soupharath said that the team had analyzed the turning movements during the traffic analysis. Ms. Pizzo said that the team can look at the possibility of making the through lane allow right turns too and optimize the signals.

An attendee asked the City of Rockledge employees if it is possible to close the Stone Street entrance. A City of Rockledge staff member said that that would be a City of Cocoa decision, and noted that residents were upset when the east side of Stone Street was closed. Mr. Sadhai explained further. He said that closing Stone Street is not an option and the east end had been closed by the railroad and that residents were very concerned that their access from SR 519 would be removed.

An attendee asked about economic development along the corridor and what plans exist. Ms. Pizzo said that there are no firm plans that the project team is aware of yet. Mr. Sadhai explained that the Future Land Use along most of the corridor is residential, and is not anticipated to be changed.

An attendee asked if there is enough bike traffic to justify putting bike lanes along Fiske Boulevard, and suggested that the pavement remain for vehicles and that no lanes be taken away. Ms. Pizzo explained that it is not proposed that travel lanes are removed, just that the pavement is resurfaced. She explained that the recommendation is to narrow the lanes, but that it would not result in reduced capacity along the corridor. A City of Rockledge staff member noted that nobody walked along Barton Boulevard before sidewalks were installed, but now that they are there, there are many people who walk along Barton Boulevard. He added that in order for the project to receive FDOT money, bicycle facilities must be addressed. Mr. Sadhai added that this idea also goes back to the original purpose of the project. He explained that the need for a multimodal corridor that addresses the safety of all users was a critical component of the study that was requested by the Space Coast Transportation Planning Organization (TPO) and that the TPO decided this based concerns that they received from residents.

An attendee said that putting bike lanes on the road doesn't make it safer for bicyclists because now the cars are right next to them. Mr. Sadhai explained that the bicycle lanes would be buffered and that there would be visual cues (e.g. striping) that alert drivers that they are not allowed in the bicycle lane. He also said that for most of the corridor, the bicycle lanes would be seven feet wide, including a five-foot lane and a two-foot buffer.

An attendee asked how far the bicycle lanes will go. Mr. Sadhai said that they are recommended on both sides of the road along the entire study area.

An attendee addressed other attendees and said that Brevard is one of the most dangerous counties in the nation for bicyclists and pedestrians. She added that bicycles are vehicles and have a right to the roadway as much as cars. She then asked the project team how the bike lanes will be buffered. Ms. Pizzo and Mr. Sadhai said that the two-foot buffer will most likely be striping.

A representative from Space Coast Area Transit (SCAT) said that he appreciated that the lanes were not narrowed below 11 feet due to buses, and then expressed that there is some concern over buses and the roundabouts.

An attendee said that in the 1980s Fiske Boulevard had bike lanes, and is happy to see them returning, especially since they are even wider now.

An attendee asked if left run movements out of the schools were looked at. Mr. Sadhai said that there are no medians recommended except where discussed in the presentation. The attendee added that she is still concerned with left turns out of the Hope Church. Mr. Sadhai said that the team will take a look at this location for a possible dedicated left turn lane.

An attendee asked how far north the median by Health First will go. Mr. Sadhai showed the extents on a map, and said that it is up to Heritage Acres Boulevard.

An attendee expressed concerns with the roundabouts because of the roundabout in Viera. Mr. Soupharath explained that the team is aware of that roundabout and said that when a roundabout is designed properly, trucks and buses

are able to navigate the roundabout without problem. Mr. Sadhai said that roundabouts have been shown to be safer and indicated that the project team had flyers with information if attendees were interested. An attendee said that even when roundabouts have 6 lanes they can function very well if they are designed properly.

An attendee asked about the next steps for the project. Ms. Pizzo explained that this is a planning only study. She also said that FDOT would then work with the Cities and Space Coast TPO to put recommended improvement into their top priorities and to look for short term improvements. Mr. Sadhai added that after this study, there would be a concept development phase to lay out the entire corridor.

An attendee asked how long it would take for the improvements once the plan is approved. Mr. Soupharath said that there would need to be funding and the engineering would need to be completed, but once the project is designed and funded, the construction could possibly be done in approximately one year.

An attendee asked what will be in the middle of the roundabout. Mr. Soupharath said that it could be landscaping, trees, or a gateway feature. Ms. Pizzo explained that the FDOT will provide grass, and if the City wants to add more, they can. A City of Rockledge staff member noted that the City would intend to add more landscaping. Mr. Soupharath also said that around the landscaped area, there would be a feature similar to stamped pavement, or another visual cue to indicate that it is not a travel lane, but said that this is so trucks and emergency vehicles can navigate the roundabout.

An attendee asked if the funding for the construction was going to be all public. Mr. Sadhai said that it is unlikely there would be private funding for the construction of the roundabouts.

An attendee asked what the speed limit is going to be. Mr. Sadhai and Mr. Soupharath explained that the speed limits are not changing along the corridor, except for the entrances to the roundabouts, necessitated by the design and for safety.

An attendee asked if the presentation would be available online. Ms. Pizzo said that it would and then explained how attendees can access project information online, and provide comments to the project teams.

Ms. Pizzo thanked the attendees and ended the question and answer session. The remaining time was spent in an open house format.

The public workshop ended at 7:30 PM.

RE: **State Road (SR) 519 (Fiske Boulevard) from Barnes Boulevard/ I-95 northbound ramps to SR 520**
Brevard County, Florida
Financial Project ID: 437241-1-12-01

Dear Elected Official:

On behalf of the Florida Department of Transportation (FDOT), I invite you to attend a public alternatives meeting regarding a corridor planning study along State Road (SR) 519 (Fiske Boulevard) from Barnes Boulevard / Interstate 95 northbound ramps to SR 520. This is the second public meeting to be held as part of a community-based evaluation to determine how best to meet the needs of the traveling public. The purpose of this public meeting is to present and explain the potential improvement strategies, seek public and agencies input, and provide interested persons an opportunity to provide feedback and comments to the study team.

The public alternatives meeting is scheduled for Tuesday, March 15, 2016 at the Cocoa Civic Center, 430 Delannoy Avenue, Cocoa, Florida 32922. It begins with an open house at 5:30 p.m. and includes a presentation at 6:00 p.m. The meeting ends at 7:30 p.m. Staff members will be available to discuss the study and answer any questions you may have. Participants may provide public comments at any time during the meeting. Written comments may also be submitted at this meeting. If submitted by mail, please send your comments no later than March 25, 2016 to Rohan Sadhai, Vanasse Hangen Brustlin, Inc., 225 East Robinson Street, Suite 300, Orlando, Florida 32801.

Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability or family status. Persons wishing to express their concerns relative to FDOT compliance with Title VI may do so by contacting Jennifer Smith, FDOT District Five Title VI Coordinator by phone at 386-943-5367, or via email at Jennifer.Smith2@dot.state.fl.us.

Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Rohan Sadhai, Vanasse Hangen Brustlin, Inc. at 407-839-4006 or via email at rsadhaj@vhb.com at least seven days prior to the meeting. If you are hearing or speech impaired, please contact us by using the Florida Relay Service, 1-800-955-8771 (TDD) or 1-800-955-8770 (Voice).

For information pertaining to this project, please contact Judy Pizzo, MS, GISP, FDOT Planning Project Manager at Judy.Pizzo@dot.state.fl.us. Media inquiries should be directed to Public Information Officer Steve Olson, 386-943-5497, Steve.Olson@dot.state.fl.us.

Sincerely,

Noranne Downs, P.E.
FDOT District Five Secretary

RE: **State Road (SR) 519 (Fiske Boulevard) from Barnes Boulevard / I-95 northbound ramps to SR 520**
Brevard County, Florida
Financial Project ID: 437241-1-12-01

Dear Government Leader:

On behalf of the Florida Department of Transportation (FDOT), I invite you to attend a public alternatives meeting regarding a corridor planning study along State Road (SR) 519 (Fiske Boulevard) from Barnes Boulevard / Interstate 95 northbound ramps to SR 520. This is the second public meeting to be held as part of a community-based evaluation to determine how best to meet the needs of the traveling public. The purpose of this public meeting is to present and explain the potential improvement strategies, seek public and agencies input, and provide interested persons an opportunity to provide feedback and comments to the study team.

The public alternatives meeting is scheduled for Tuesday, March 15, 2016 at the Cocoa Civic Center, 430 Delannoy Avenue, Cocoa, Florida 32922. It begins with an open house at 5:30 p.m. and includes a presentation at 6:00 p.m. The meeting ends at 7:30 p.m. Staff members will be available to discuss the study and answer any questions you may have. Participants may provide public comments at any time during the meeting. Written comments may also be submitted at this meeting. If submitted by mail, please send your comments no later than March 25, 2016 to Rohan Sadhai, Vanasse Hangen Brustlin, Inc., 225 East Robinson Street, Suite 300, Orlando, Florida 32801.

Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability or family status. Persons wishing to express their concerns relative to FDOT compliance with Title VI may do so by contacting Jennifer Smith, FDOT District Five Title VI Coordinator by phone at 386-943-5367, or via email at Jennifer.Smith2@dot.state.fl.us.

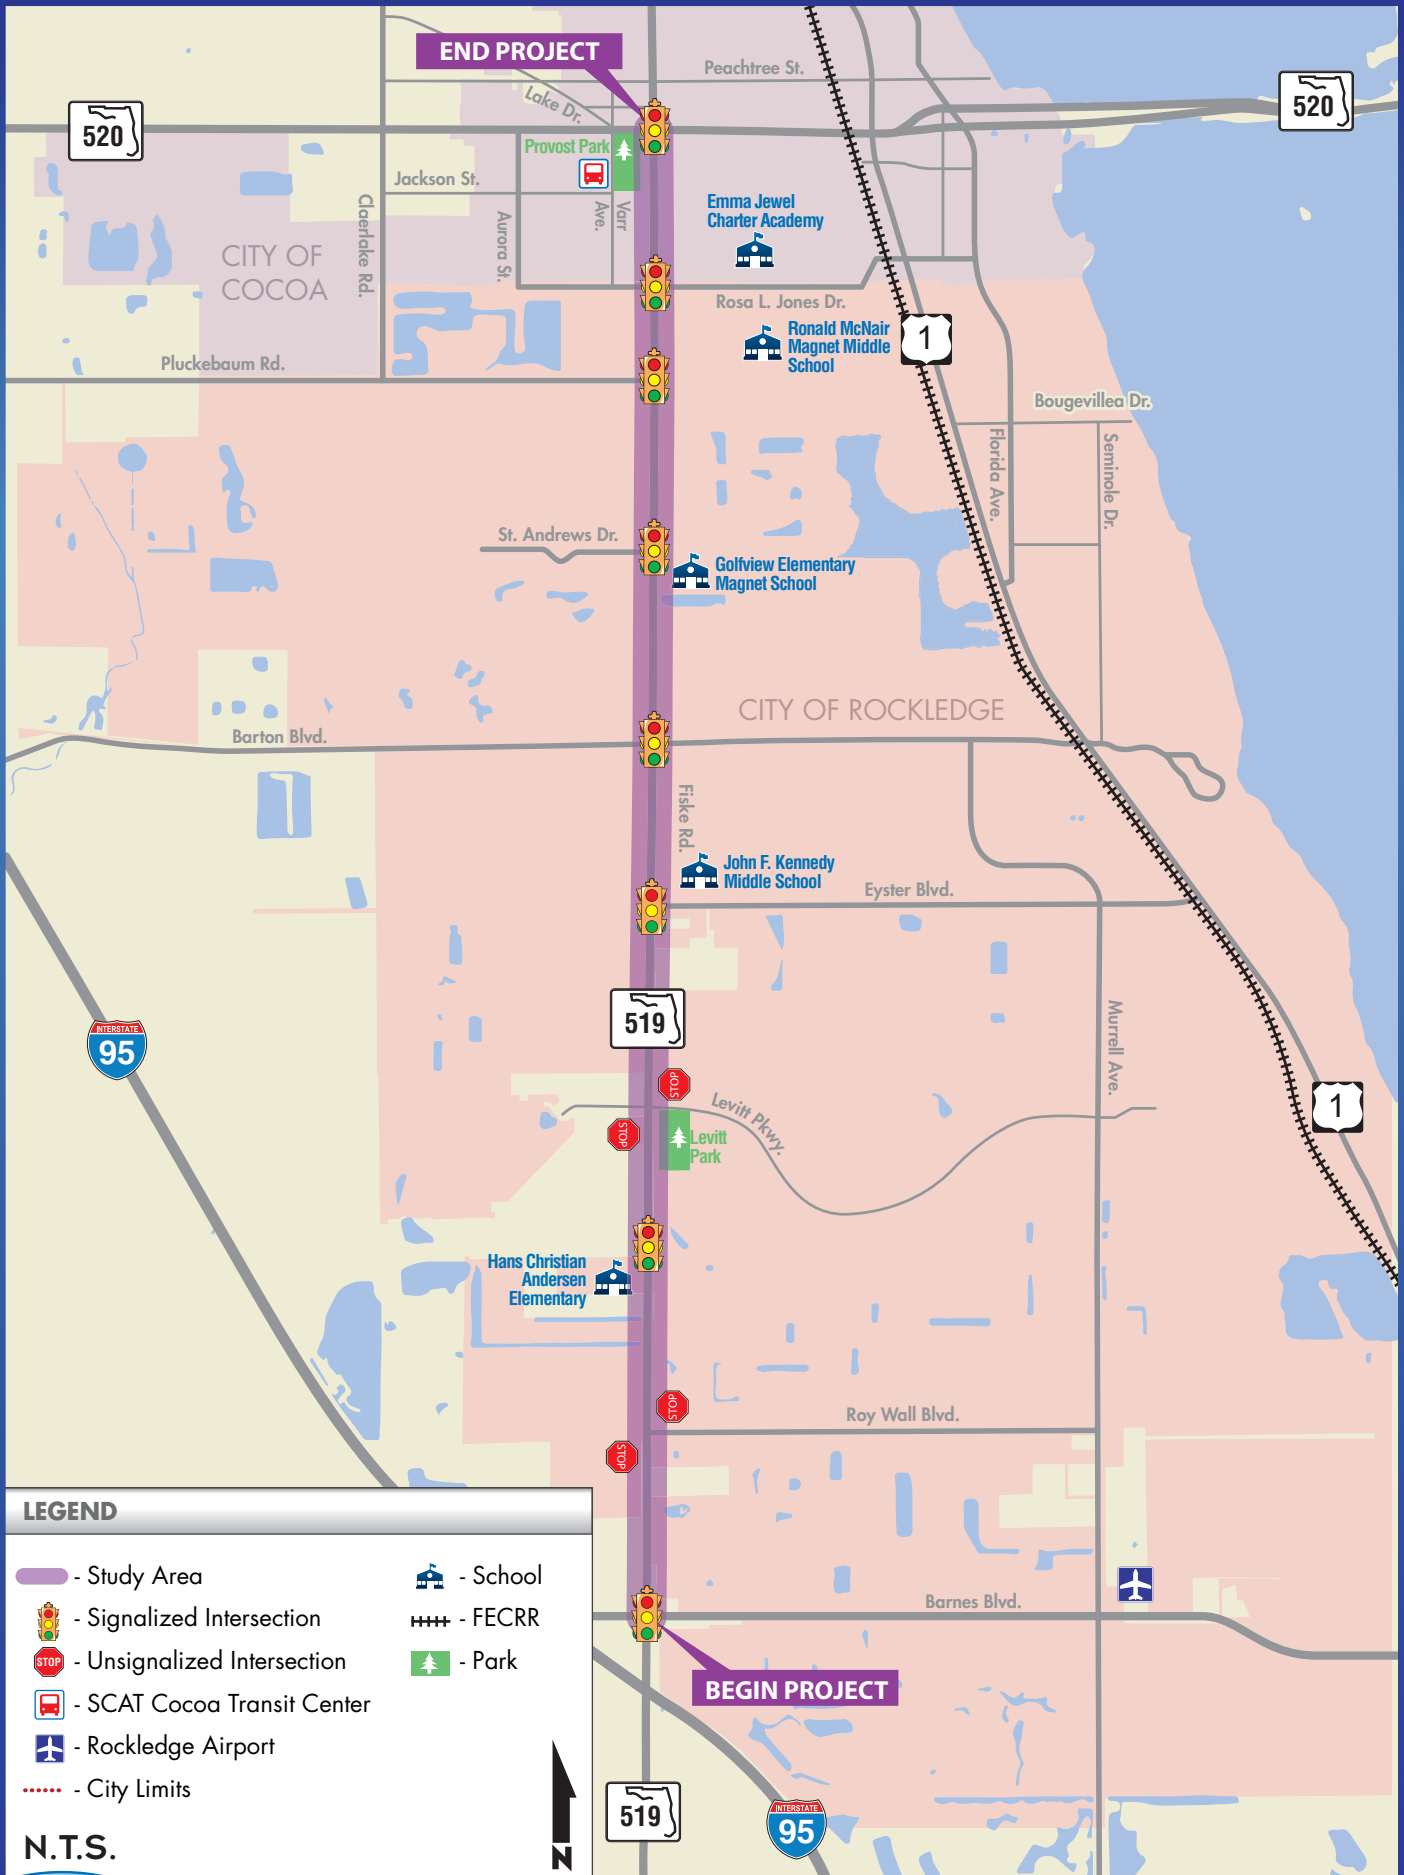

Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Rohan Sadhai, Vanasse Hangen Brustlin, Inc. at 407-839-4006 or via email at rsadhaj@vhb.com at least seven days prior to the meeting. If you are hearing or speech impaired, please contact us by using the Florida Relay Service, 1-800-955-8771 (TDD) or 1-800-955-8770 (Voice).

For information pertaining to this project, please contact Judy Pizzo, MS, GISP, FDOT Planning Project Manager at Judy.Pizzo@dot.state.fl.us. Media inquiries should be directed to Public Information Officer Steve Olson, 386-943-5497, Steve.Olson@dot.state.fl.us.

Sincerely,

Judy Pizzo, MS, GISP
FDOT Planning Project Manager

Come and Join Us!

Public Alternatives Meeting SR 519 (Fiske Boulevard) Planning Study

The Florida Department of Transportation (FDOT) is conducting a corridor planning study for SR 519 (Fiske Boulevard from Barnes Boulevard/ I-95 northbound ramps to SR 520). The purpose of this public alternatives meeting is to present and explain the potential improvement strategies, seek public and agencies input, and provide interested persons an opportunity to provide feedback and comments to the study team.

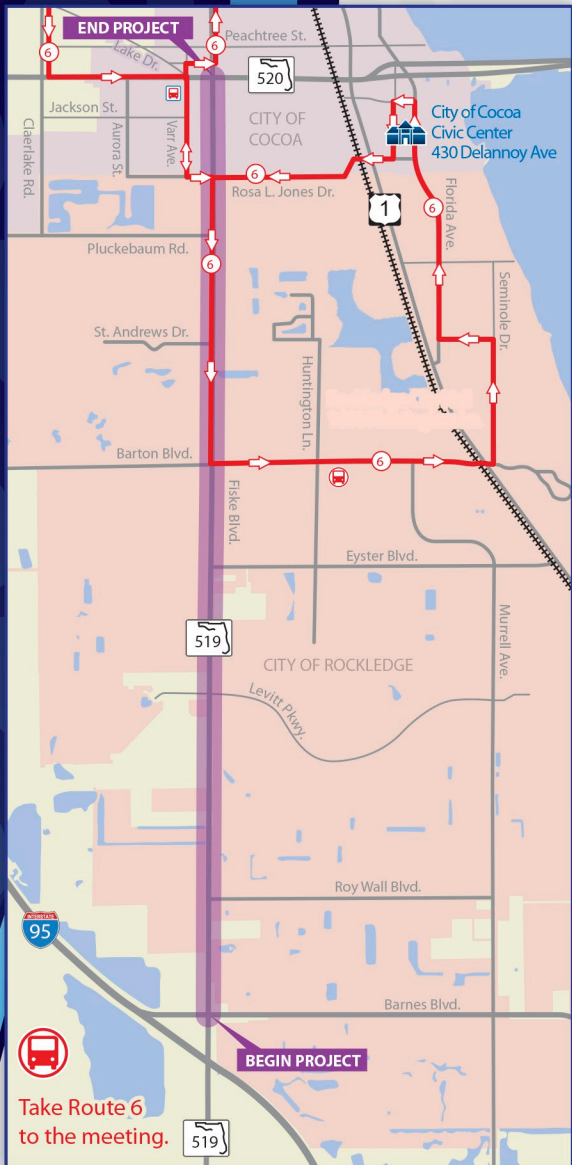

This is the second public meeting to be held as part of a community-based evaluation to determine how best to meet the needs of the traveling public. FDOT encourages you to attend and provide input and ideas for SR 519 (Fiske Boulevard) to be considered in the resulting corridor recommendations.

Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability or family status. Persons wishing to express their concerns relative to FDOT compliance with Title VI may do so by contacting Jennifer Smith, FDOT District Five Title VI Coordinator by phone at (386) 943-5367, or via email at Jennifer.Smith2@dot.state.fl.us.

Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Rohan Sadhai, Vanasse Hangen Brustlin, Inc. at (407) 839-4006 or via email at rsadhai@vhb.com at least seven days prior to the meeting. If you are hearing or speech impaired, please contact us by using the Florida Relay Service, 1-800-955-8771 (TDD) or 1-800-955-8770 (Voice).

If you have any questions regarding the project or meeting, please contact:

Judy Pizzo, MS, GISP
FDOT Planning Project Manager, FDOT District 5
719 South Woodland Boulevard, DeLand, FL 32720
Phone: (407) 482-7880
Email: Judy.Pizzo@dot.state.fl.us

PLEASE VISIT THE PROJECT WEBSITE AT www.cflroads.com

You are invited to attend a public alternatives meeting for the State Road 519 (Fiske Boulevard) Corridor Planning Study. The purpose of this public meeting is to present and explain the potential improvement strategies, explain the study process, seek public and agencies input, and provide interested persons an opportunity to provide feedback and comments to the study team. This is the second public meeting to be held as part of a community-based evaluation to determine how best to meet the needs of the traveling public. The meeting will begin as an open house at 5:30 p.m. with a presentation at 6:00 p.m., and will conclude at 7:30 p.m.

SR 519 (FISKE BOULEVARD) CORRIDOR PLANNING STUDY

FM No. 437241-1-12-01

Alternatives Workshop

Title VI and Related Statutes

Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability or family status. Persons wishing to express their concerns relative to FDOT compliance with Title VI may do so by contacting **Jennifer Smith, FDOT District Five Title VI Coordinator** by phone at 386-943-5367, or via email at Jennifer.Smith2@dot.state.fl.us.

Persons with disabilities who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact **Judy Pizzo, FDOT Planning Project Manager**, by phone at 386-943-5167, or via email at Judy.Pizzo@dot.state.fl.us at least seven (7) days prior to the meeting. If you are hearing or speech impaired, please contact us by using the Florida Relay Service, 1-800-955-8771 (TDD) or 1-800-955-8770 (Voice).

Meeting Agenda

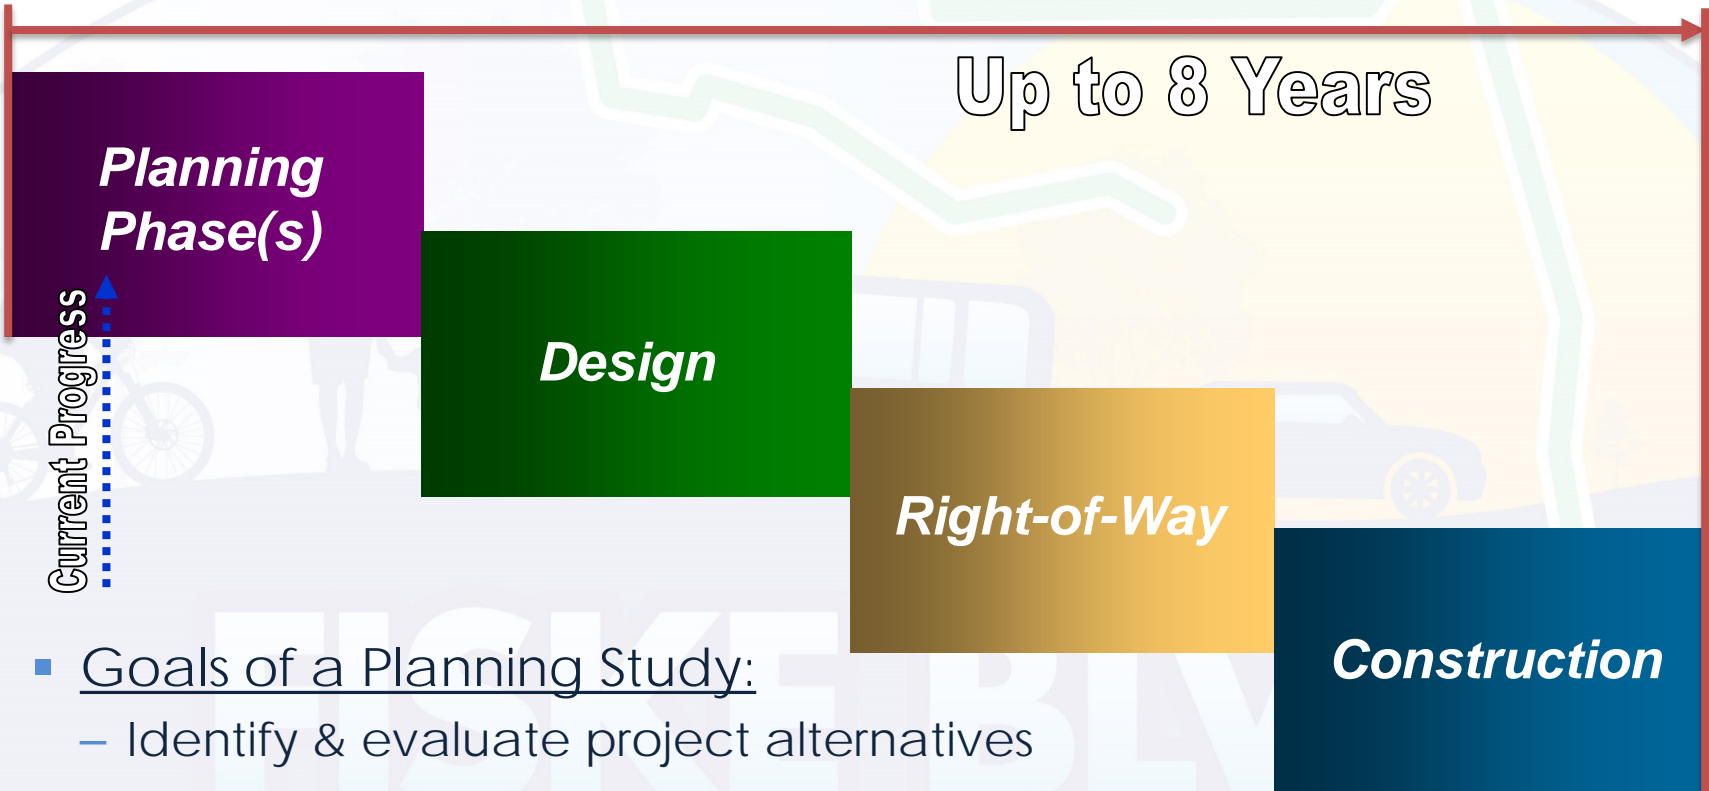

- I. Project Overview
- II. Purpose of the Study
- III. Public Involvement Conducted
- IV. Stakeholder Input
- V. On-Going/Proposed Projects
- VI. Initial Considerations
- VII. Improvement Strategies

FISKE BLVD
CORRIDOR STUDY

Project Background and Goals

Up to 8 Years

- Goals of a Planning Study:
 - Identify & evaluate project alternatives
 - Incorporate input from the public & stakeholders
 - Identify next steps (additional study, or design)
- Timing is dependent on available funding

Purpose of the Study

Project **requested by the SCPTO** for the Cities of Cocoa and Rockledge to coordinate the development of a future vision for SR 519 that establishes a **multimodal approach** for providing future transportation needs.

Community-based evaluation to determine how best to meet the **needs of current and future users**.

Establish a long-term plan to guide evolution of the corridor that appropriately correlates the **balance between land use and transportation planning**.

Purpose and Need Statement

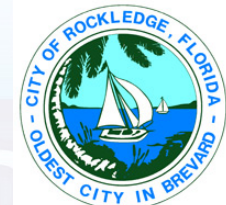

- **Purpose:** To provide an **enhanced multimodal transportation network** that promotes the creation of a more **walkable community**, improves **access to employment**, supports **economic development** goals and provides **safe and convenient** access to **users of all ages and abilities**.
- **Needs Statement:** An enhanced multimodal network is needed based on the desire for improved safety, improved accommodations for pedestrians/ bicyclists, and improved access to transit.

FISKE BLVD
CORRIDOR STUDY

Project Visioning Team

- PVT Responsibilities
 - Three (3) meetings during key project milestones
 - Meeting #1 – May 5, 2015
 - Meeting #2 – August 20, 2015
 - Meeting #3 – November 2, 2015
 - Identify stakeholders that need to be engaged
 - Provide input on the planning and concept development process,
 - Recommend corridor alternatives to be advanced for further study
 - Share local knowledge and history

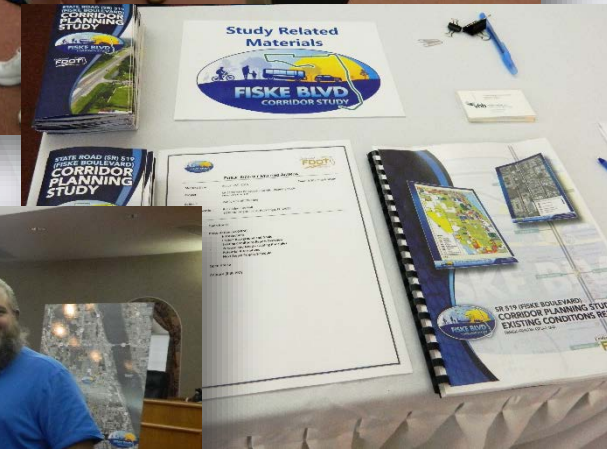

Project Overview

- Study Area
 - Barnes Boulevard/I-95 NB Ramps to SR 520
 - 4.2 miles
- Transitional character, varying cross sections
 - Generally 5-lanes
 - Urban and rural
 - Land use – Residential with Institutional and minor commercial
- Primary north-south route between I-95 and SR 520
- Viera to the south

Public Involvement To-Date

1. Kick-off/PVT Meeting/Tour on May 5, 2015
2. Project Visioning Team Meetings
 - August 20, 2015
 - November 2, 2015
3. Public Kickoff Meeting – August 25, 2015
4. Other Meetings
 - City of Cocoa – November 25, 2015
5. Three FDOT Internal Meetings – February thru March 2016
6. **Public Workshop #2 (Alternatives Workshop) – March 15, 2016**

Summary of Public Involvement Input

■ General

- Center turn lane used for travel
- Speeding
- Sidewalks too close to roadway

■ Specific Areas

- Hans Christian Andersen – Congestion and queuing on SR 519
- Pluckebaum Road – intersection configuration
- SR 520/Provost Park – NB left turn lane queue blocks side street access

■ Health First

- Left turns cause backups
- Access Management issues with expansion

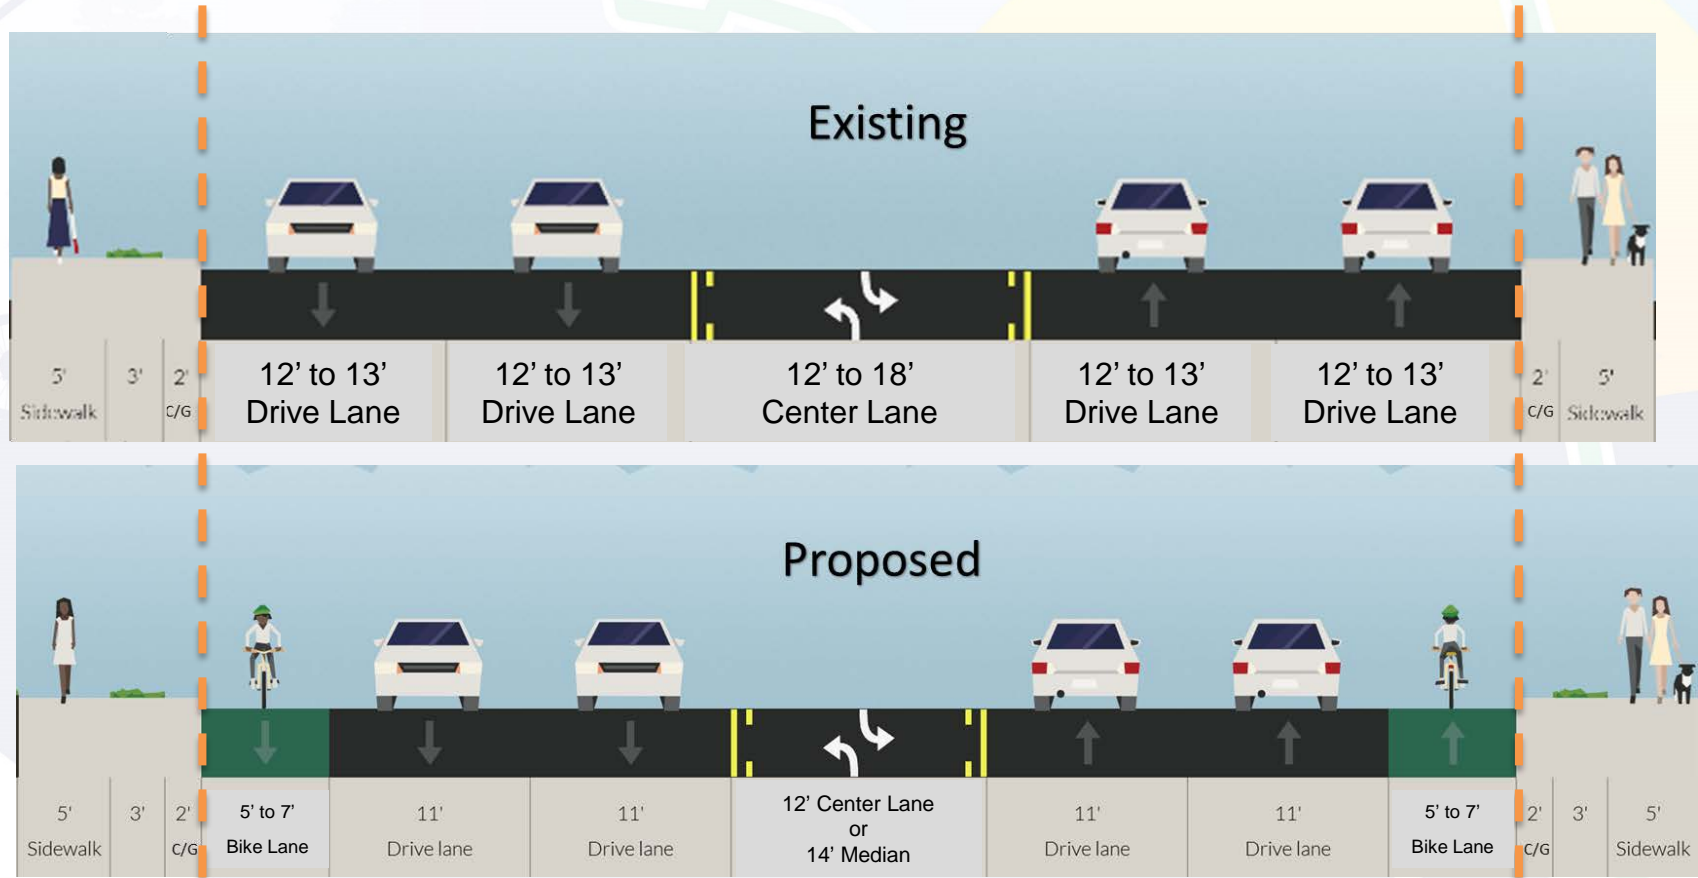

■ Potential Signals

- Roy Wall Boulevard
- Levitt Parkway

On-Going/Proposed Projects

- Barnes Boulevard widening
 - Under construction by County
- Hans Christian Andersen Elementary School
 - School Board, City of Rockledge and Hans Christian Andersen are discussing on-site improvements
 - Drop-off and pick-up strategies being implemented by City of Rockledge
- Health First
 - On-site expansion with access to Roy Wall Boulevard
- Provost Park
 - City of Cocoa is planning on constructing a sidewalk on south side of park to accommodate the existing pedestrian traffic

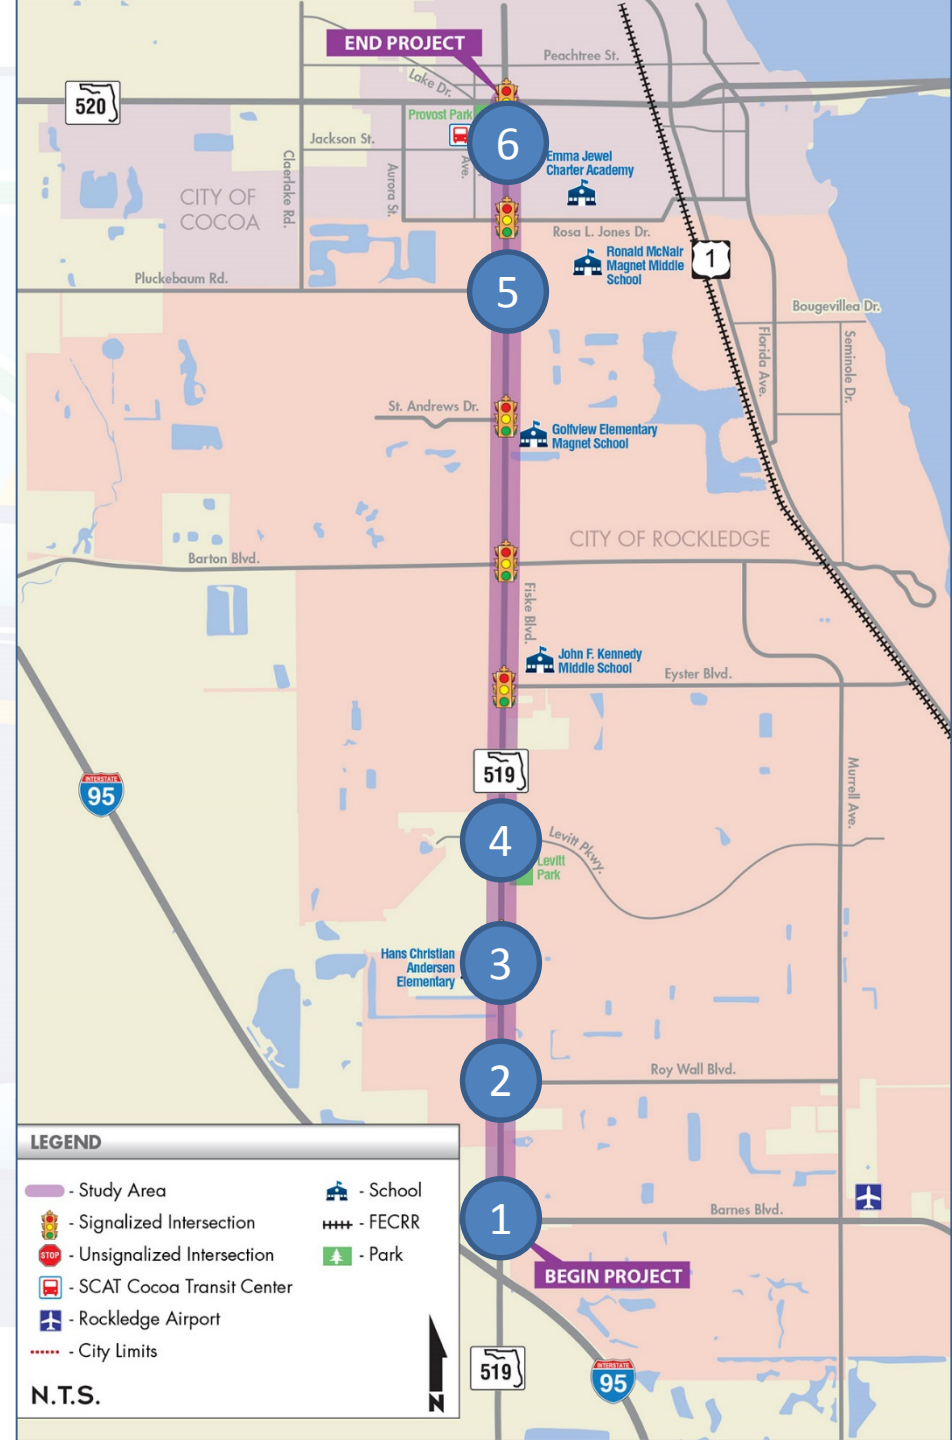

Typical Corridor Section

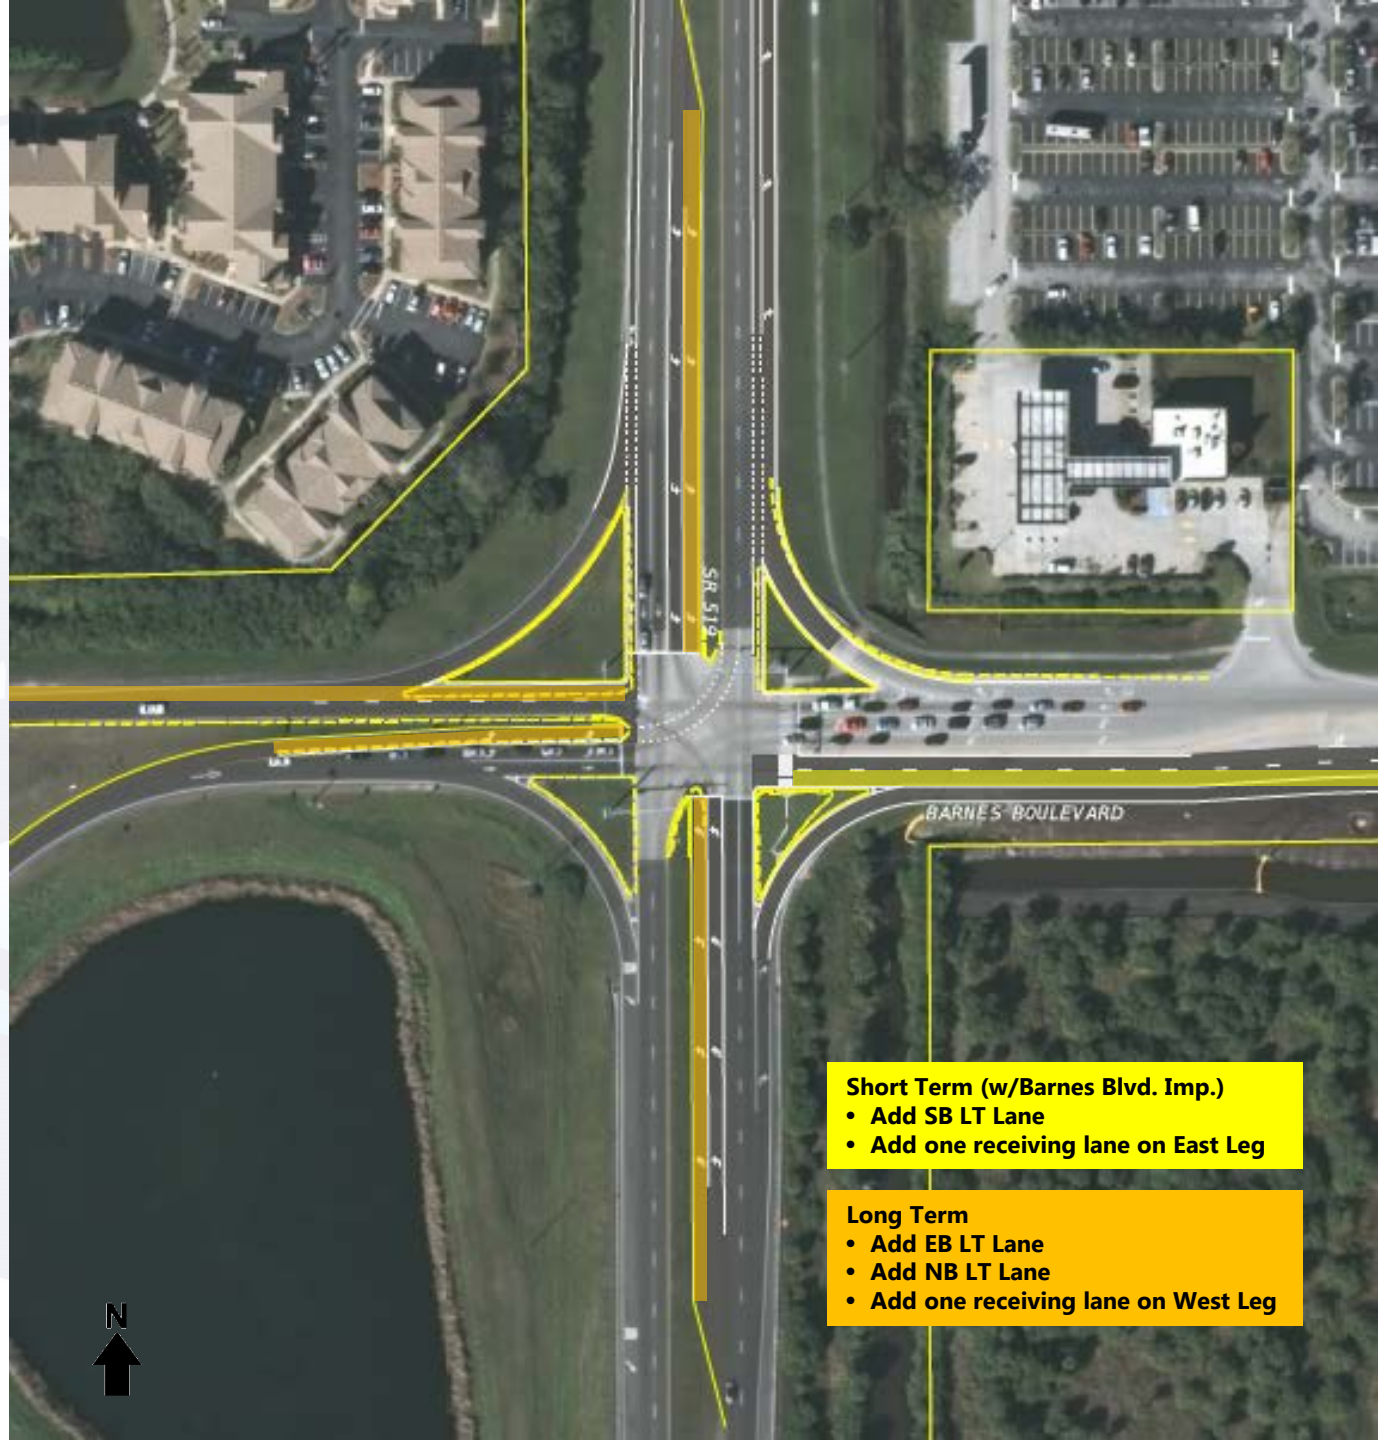

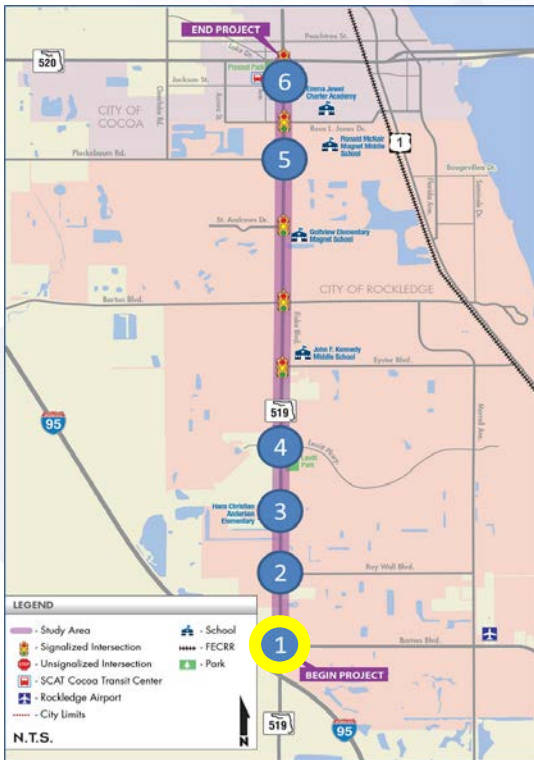

Note: The locations with 5-foot bicycle lanes will require a variance.
 No ROW impacts based on Brevard County Parcel Data.

Spot Improvements

1. Barnes Boulevard/I-95
2. Roy Wall Boulevard Intersection
3. Hans Christian Anderson Elementary School
4. Levitt Parkway
5. Pluckebaum Road Intersection
6. Provost Park/Stone Street /SR 520

Barnes Boulevard

Short Term (w/Barnes Blvd. Imp.)

- Add SB LT Lane
- Add one receiving lane on East Leg

Long Term

- Add EB LT Lane
- Add NB LT Lane
- Add one receiving lane on West Leg

Roy Wall Boulevard

Phillips Landing

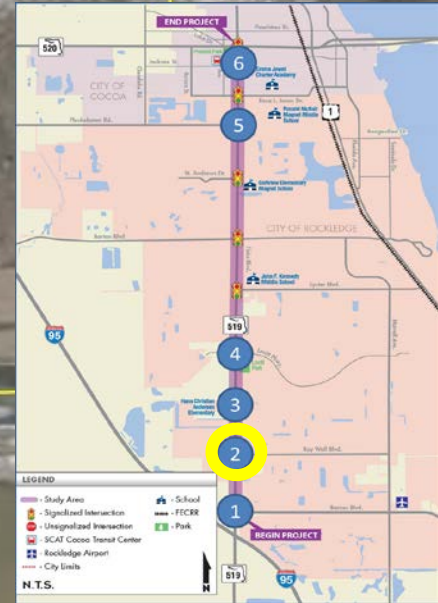

Roundabout / gateway feature

SR 519

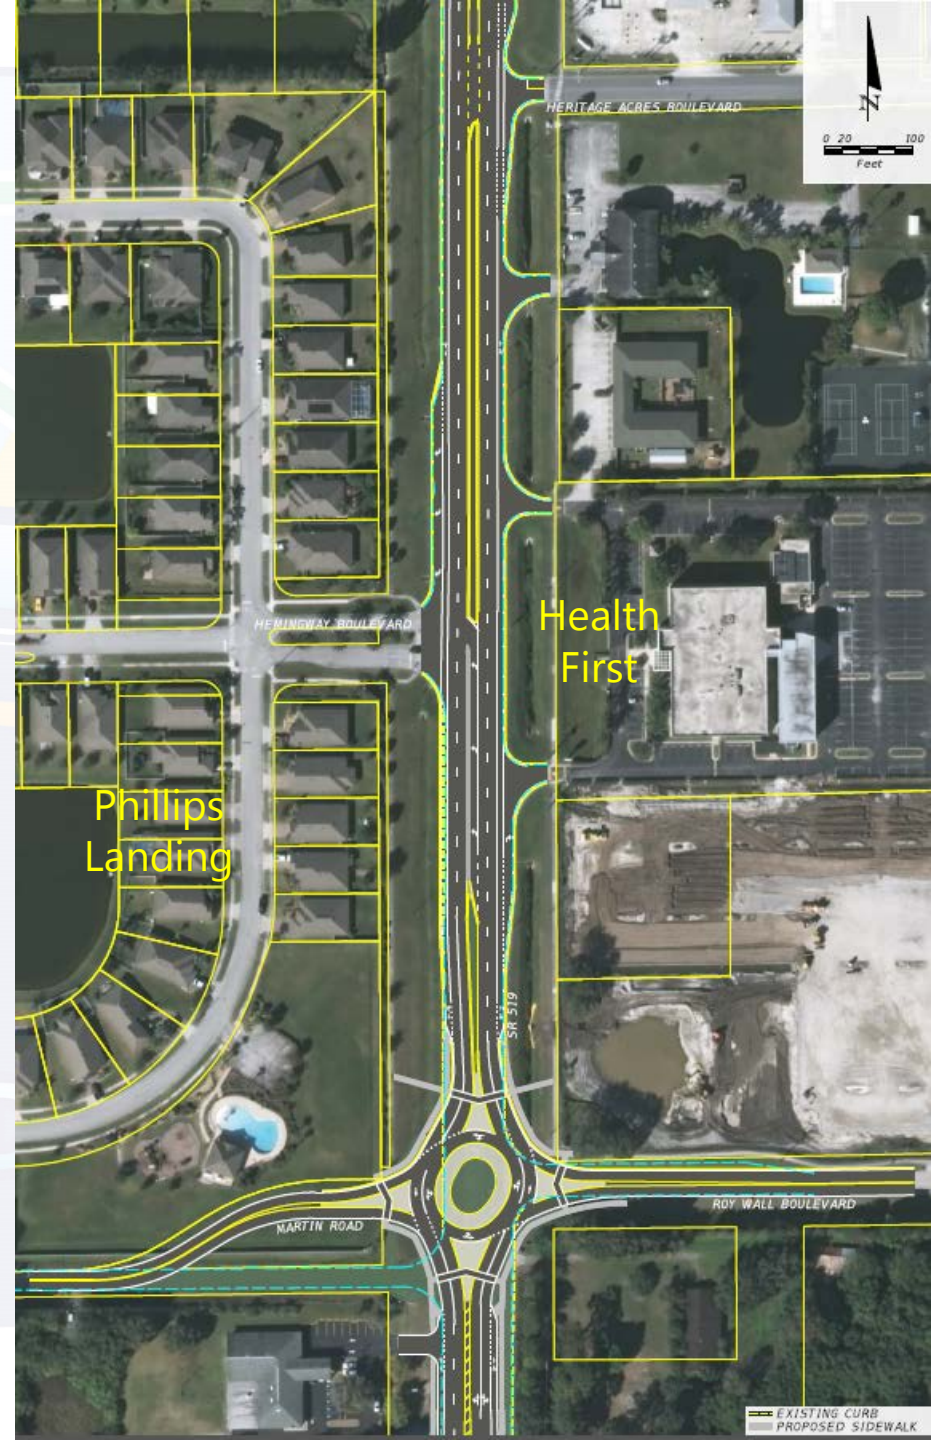

MARTIN ROAD

ROY WALL BOULEVARD

Health First

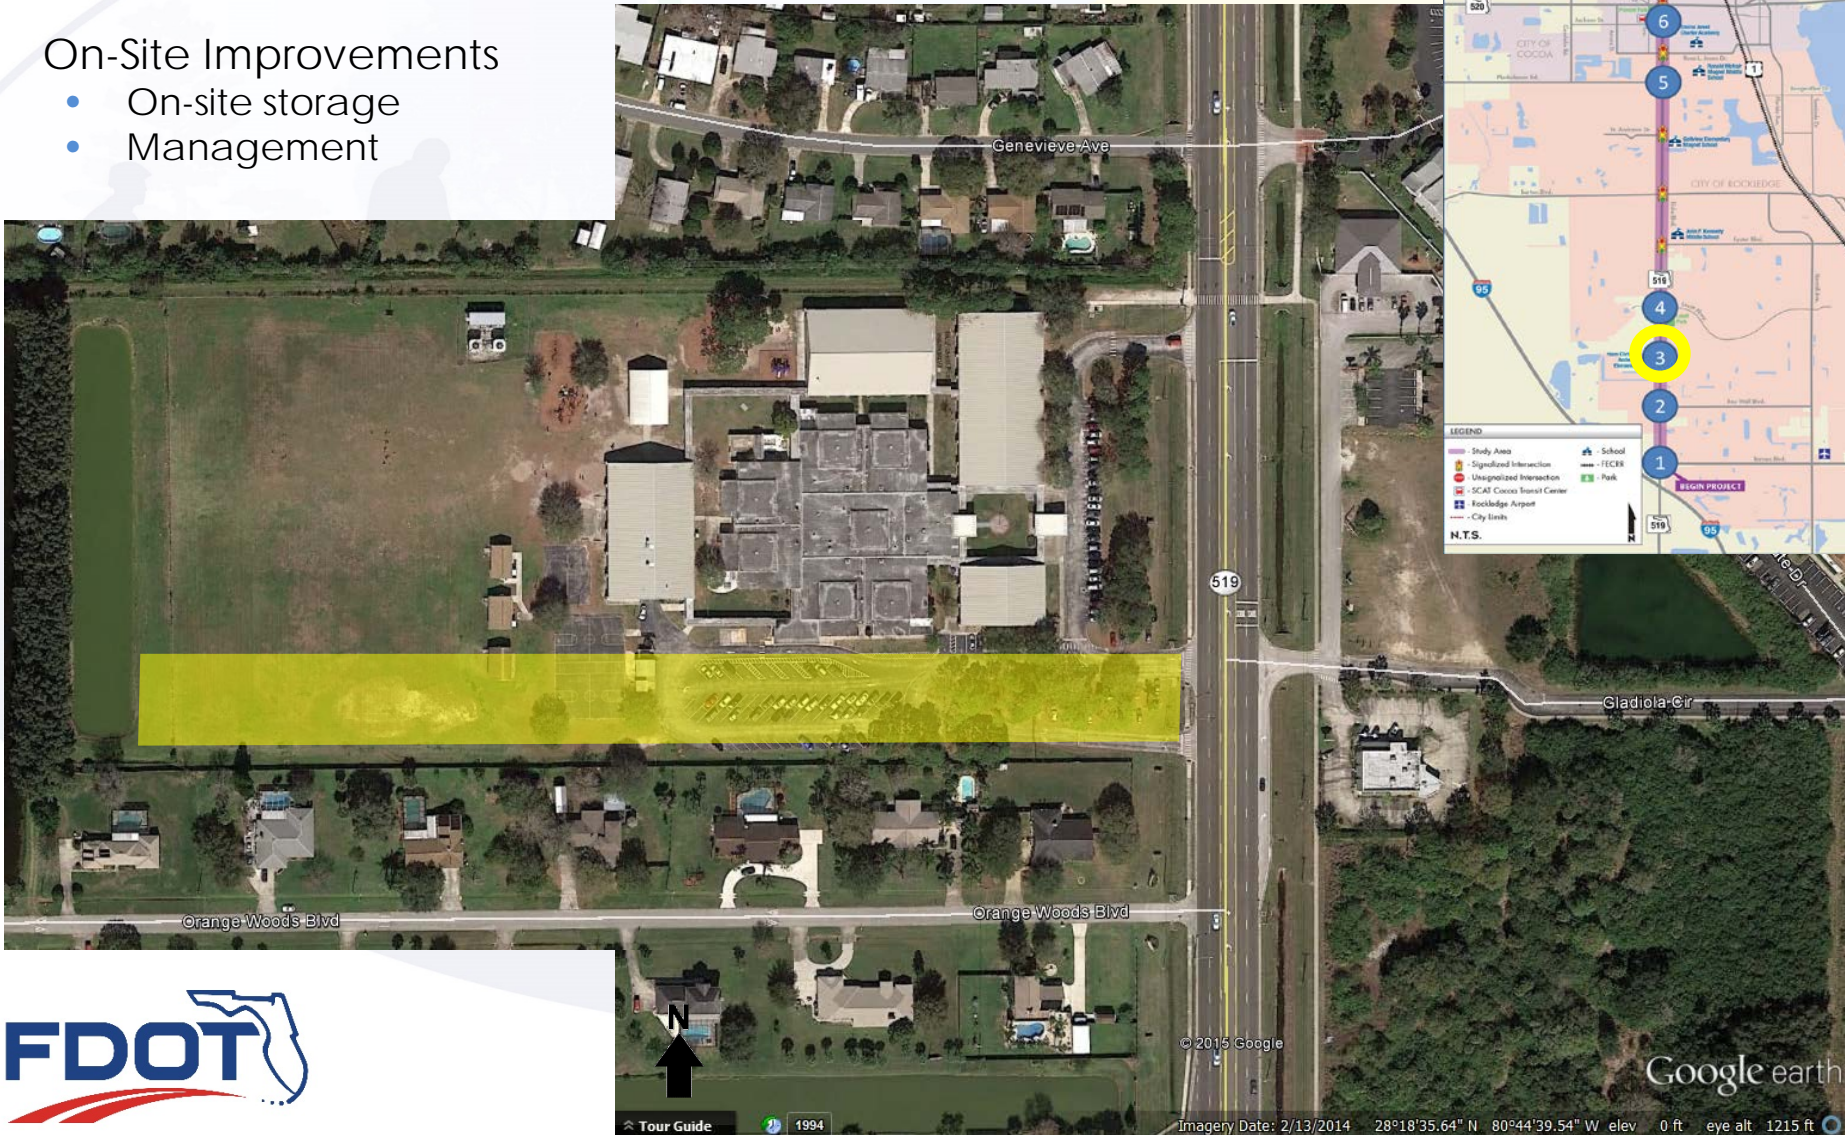

Roy Wall Boulevard Access Management

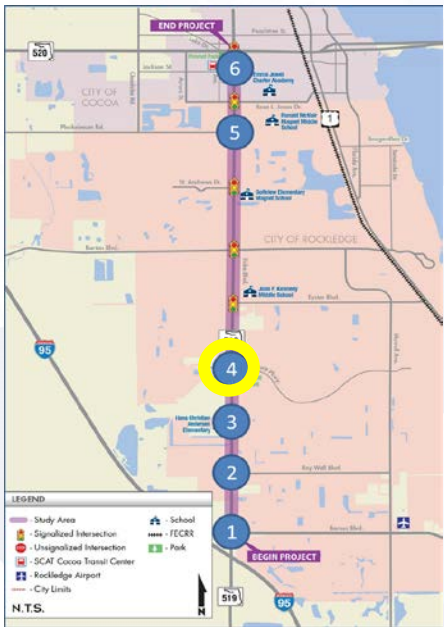

Hans Christian Anderson Elementary School

- On-Site Improvements
 - On-site storage
 - Management

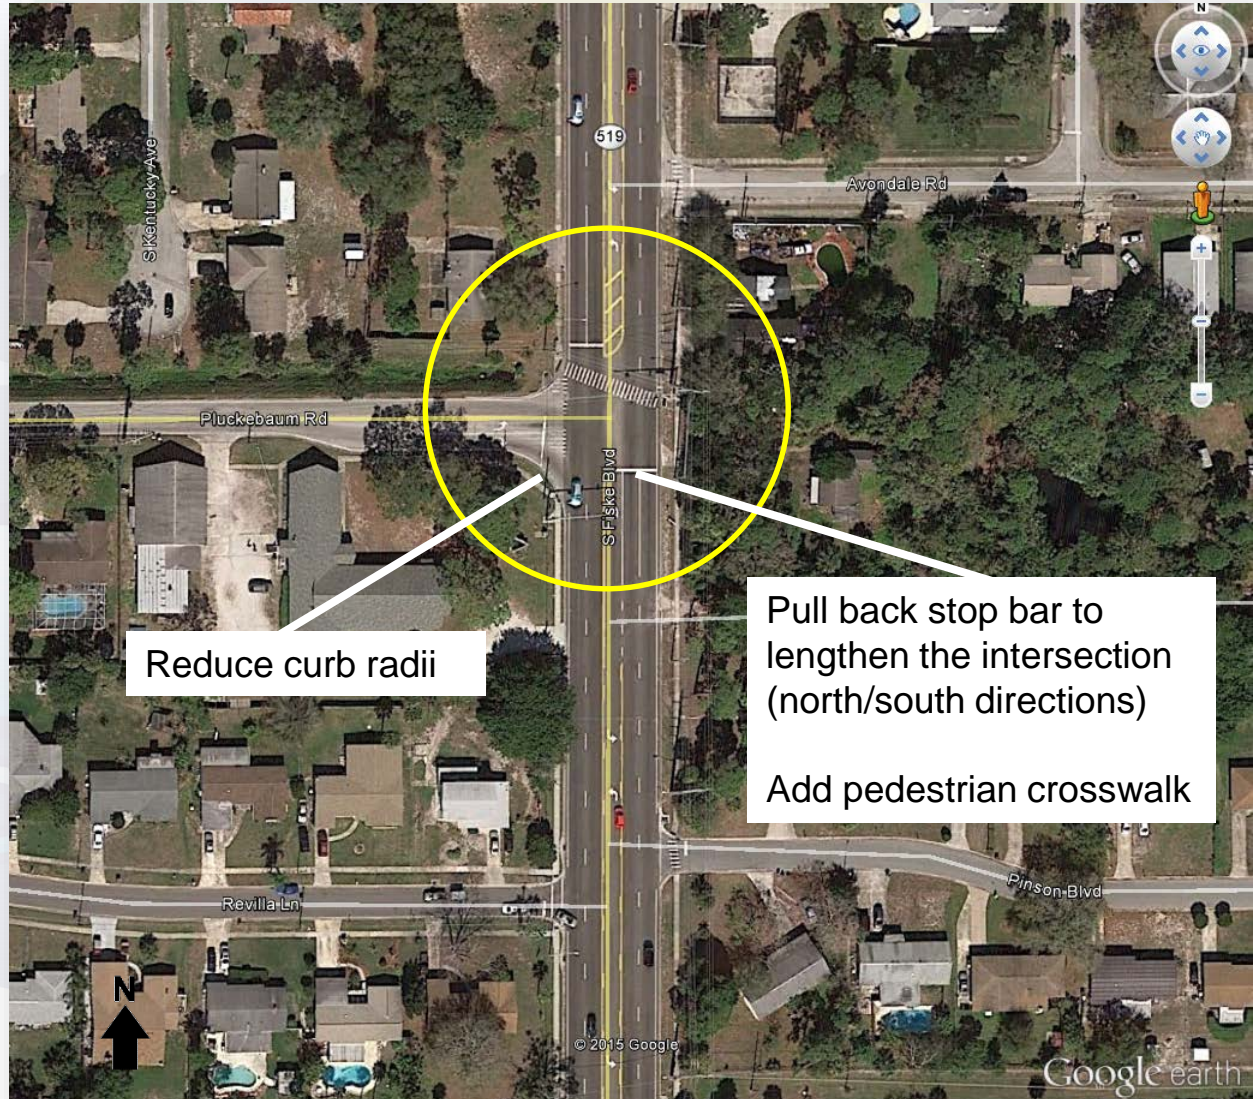

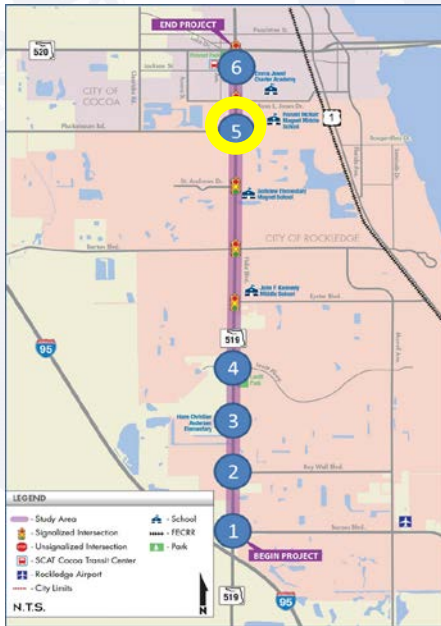

Levitt Parkway

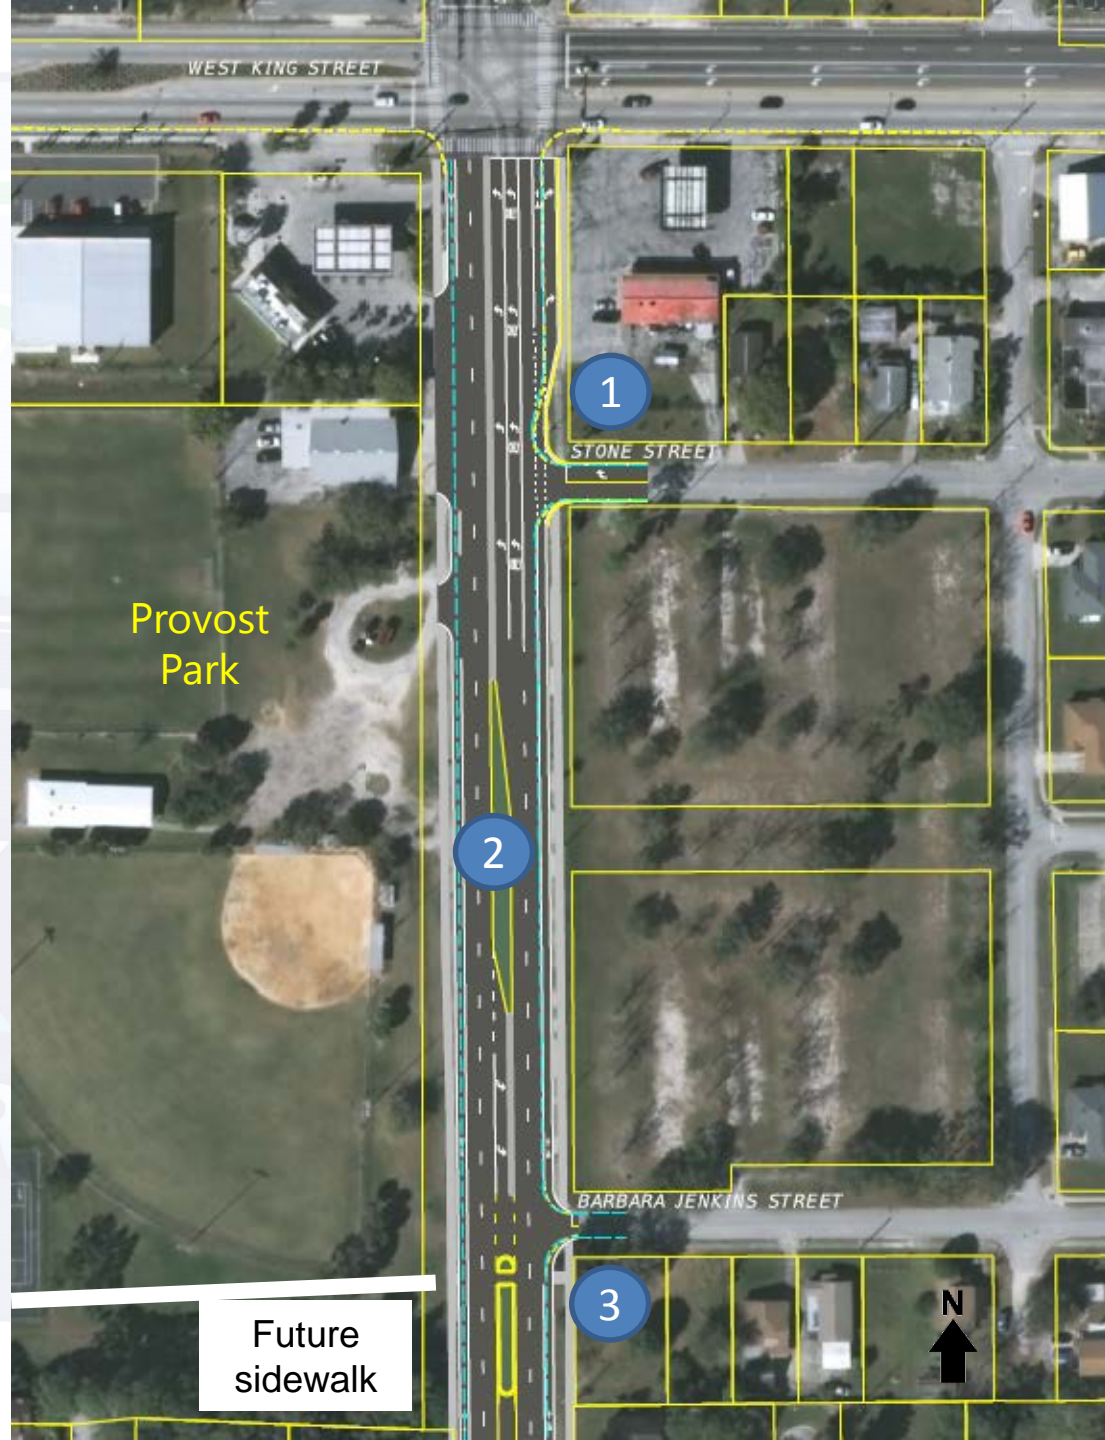

Pluckebaum Road

- Pedestrian enhancements

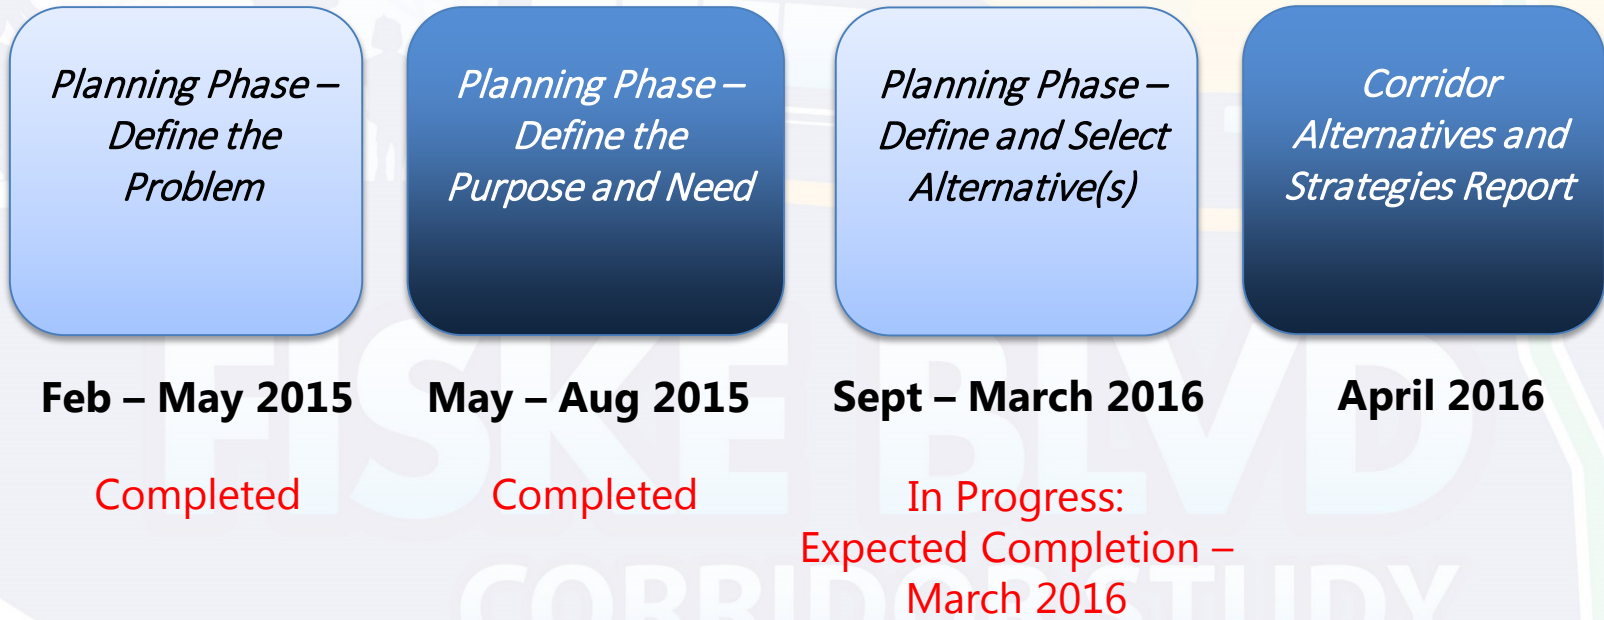

Provost Park/ Stone Street/SR 520

1. Right-in/out only at Stone Street
2. Formalized median
3. Pedestrian Refuge

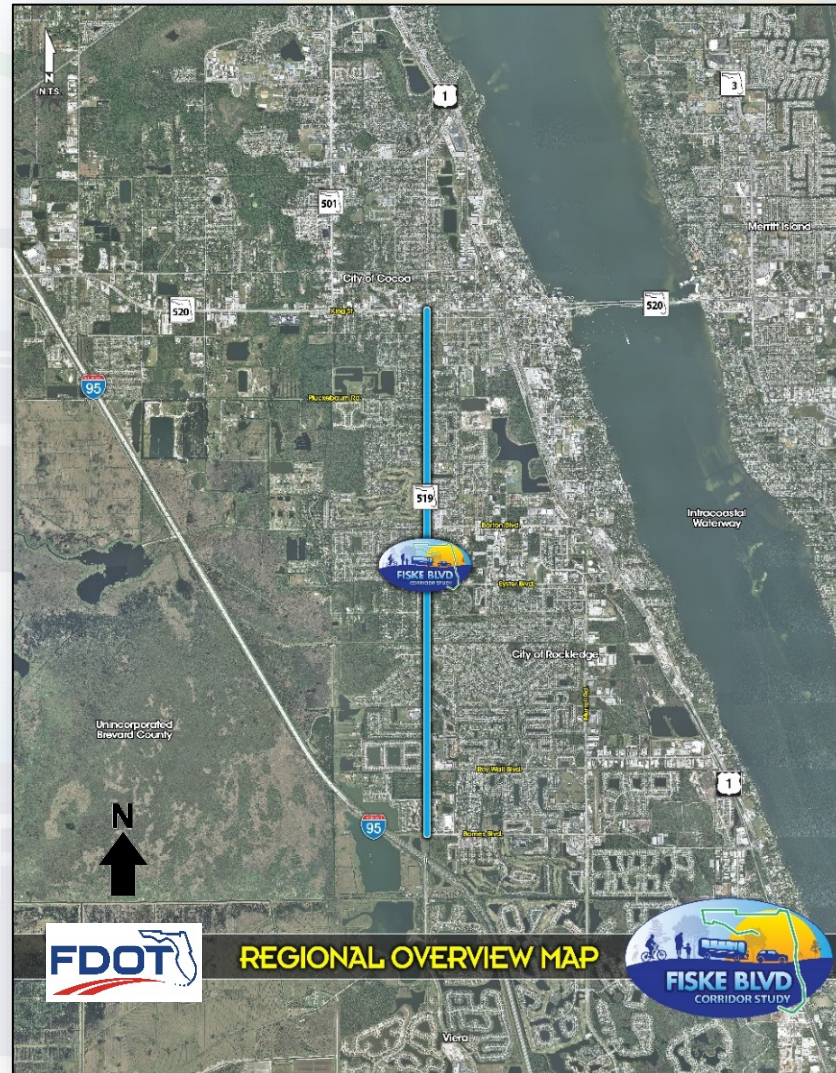

Next Steps

- 14 month schedule ("living document")

REGIONAL OVERVIEW MAP

Viera

Benefits of a Roundabout

Saves lives

- Up to a 90% reduction in fatalities
- 76% reduction in injury crashes
- 30-40% reduction in pedestrian crashes
- 75% fewer conflict points than four-way intersections

Slower vehicle speeds (generally under 25 mph)

- Motorists have more time to judge and react to other cars or pedestrians
- Advantageous to older and novice motorists
- Reduces the severity of crashes
- Keeps pedestrians safer

Efficient traffic flow

- 30-50% increase in traffic capacity

Reduction in pollution and fuel use

- Improved traffic flow for intersections that handle a high number of left turns
- Reduced need for storage lanes

Potential money saved

- No signal equipment to install and repair
- Savings estimated at an average of \$5,000 per year in electricity and maintenance costs
- Service life of a roundabout is 25 years (vs. the 10-year service life of signal equipment)

Community benefits

- Traffic calming
- Aesthetic landscaping

Source: Federal Highway Administration

What is a Roundabout?

A roundabout is a circular intersection without traffic signal equipment in which traffic flows around a center island.

Why Modern Roundabouts?

In Florida, over 44% of all traffic fatalities and serious injuries occur at conventional (stop & signal-controlled) intersections. Roundabouts have been proven to reduce the number of fatal and severe injury crashes by 82% over a stop-controlled intersection, and 78% over a signalized intersection.

Conventional intersections have 32 vehicle and 16 pedestrian conflict points, while roundabouts have only 8 vehicle and 8 pedestrian conflict points. Because there are no crossing movements in a roundabout, left-turn and right-angle crashes are eliminated.

For safety tips and more information, please visit:
www.AlertTodayFlorida.com

A Guide To Modern Roundabouts

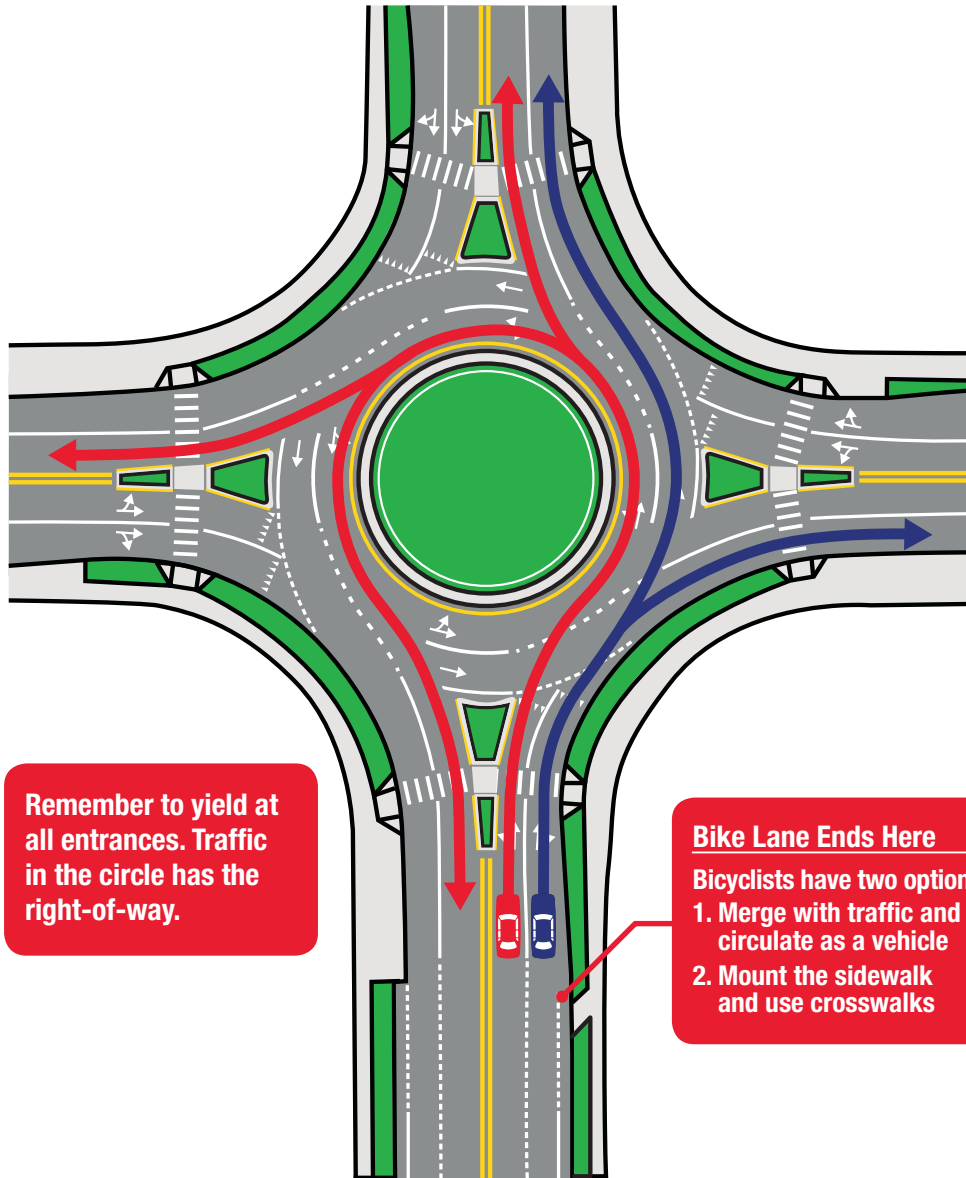

Informational Guide for:
MOTORISTS • PEDESTRIANS • BICYCLISTS

Funded by FDOT

Navigating a Modern Roundabout

Remember to yield at all entrances. Traffic in the circle has the right-of-way.

Bike Lane Ends Here

Bicyclists have two options:

1. Merge with traffic and circulate as a vehicle
2. Mount the sidewalk and use crosswalks

1. Slow to 10-15 mph on approach to a roundabout
2. In multi-lane roundabouts, follow signs and markings to determine the lane(s) that will serve your destination
3. Yield right-of-way to bicyclists merging into the entry lane before the bike lane ends
4. Yield right-of-way to pedestrians crossing the entry lane

5. Yield right-of-way to motorists already in the circulatory roadway when it is safe to do so
6. Turn right onto the circulatory roadway when it is safe to do so
7. When you approach your destination street, use your right-turn signal and exit the roundabout
8. Yield right-of-way to pedestrians crossing the exit lane

Roundabout User Tips

Motorists

- Determine which way you want to go in advance of the roundabout
- Keep right at the splitter island and slow to 10-15 mph
- Watch for bicyclists and allow them to merge into the entry lane
- Watch for pedestrians crossing the entry roadway and yield right-of-way
- Yield right-of-way to vehicles within the circulatory roadway
- Turn right onto the circulatory roadway when it is safe to do so
- When you approach your street, use your right-turn signal and exit the roundabout
- Watch for pedestrians crossing the exit roadway and yield right-of-way

Pedestrians

- Stay on the walkways and cross at designated crosswalks
- Do not enter the central island
- Watch for motorists and bicyclists
- Cross to the splitter island and stop there if traffic requires

Bicyclists

- Merge with traffic on the entry lane or use the ramp to the sidewalk
- If riding with traffic, signal your intended path
- If using the sidewalks, yield right-of-way to pedestrians and walk your bicycle at crosswalks

All roundabouts have these features:

Yield-at-entry

- Traffic entering the circle yields to traffic already in the circle.

Traffic deflection

- Pavement markings and raised islands direct traffic into a one-way counterclockwise flow.

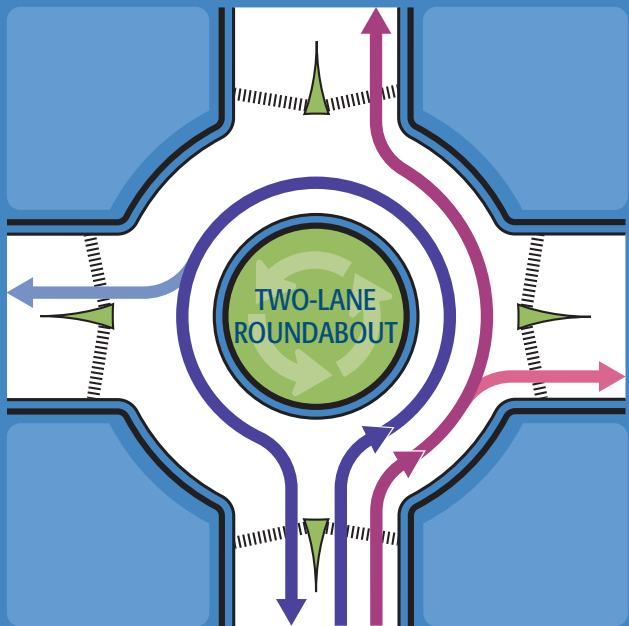

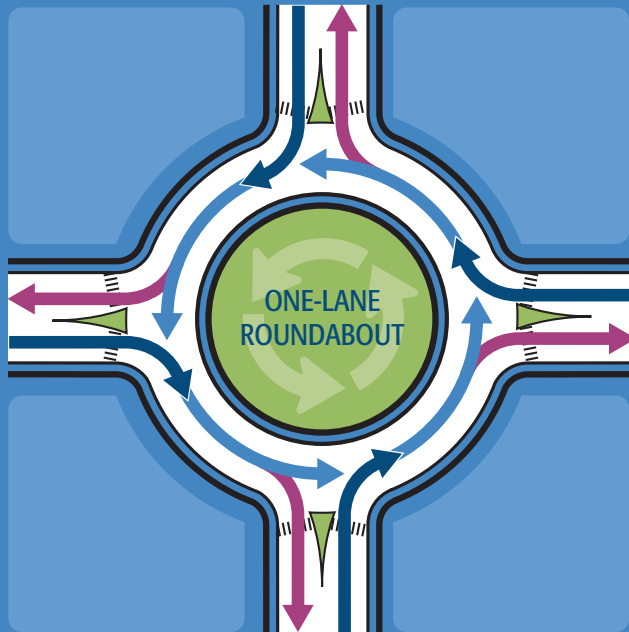

Geometric curvature

- The radius of the circular road and the angles of entry can be designed to slow the speed of vehicles.

ROUNDBABOUTS

What?

A roundabout is a one-way, circular intersection that uses signs to guide motorists around them. They do not have traffic signals. Roundabouts have safe crossings for pedestrians and bicyclists.

Roundabout Rules of the Road

Slow down

Choose lane according to exit

Yield to traffic in roundabout

Do not pass in roundabout

Be alert for pedestrians and bicyclists

Allow emergency vehicles to pass

ROUNDBABOUTS FICTION vs. FACT

@ FICTION

Roundabouts are unsafe

@ FACT

Roundabouts are safe. They have fewer and less severe crashes, 90% fewer deaths and 75% fewer injuries.

In roundabouts, drivers cannot run red lights or stop signs.

Roundabouts can be used in various intersection types.

@ FICTION

Roundabouts are dangerous for pedestrians and bicyclists

@ FACT

Roundabouts have up to 40% fewer incidents with pedestrians and cyclists.

@ FICTION

Roundabouts cause traffic delays

@ FACT

Roundabouts offer non-stop travel with no waiting at stop signs or traffic signals.

Roundabouts accommodate up to 50% more traffic than typical intersections.

@ FICTION

Roundabouts are expensive

@ FACT

Roundabouts eliminate the cost of traffic signals and signal maintenance.

During power outages, traffic still flows freely.

@ FICTION

Roundabouts are bad for business

@ FACT

Businesses near roundabouts have seen an increase in sales with more customers who can easily and safely drive, walk, or bike there.

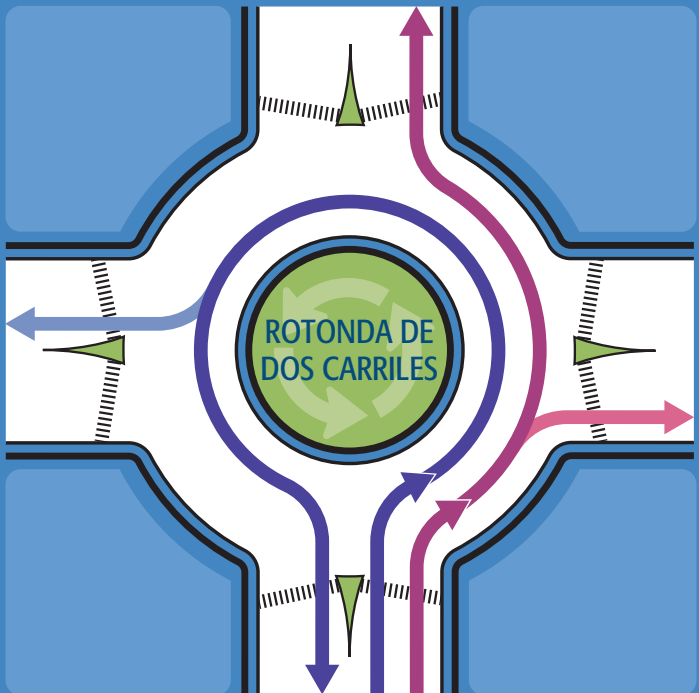

They can also mark a business district or main street.

ROTONDAS

¿Que es una rotonda?

Una rotonda es una intersección circular que utiliza señales para guiar a los automovilistas en una dirección. Estas no tienen las señales de tráfico. Las rotondas tienen cruces seguros para peatones y ciclistas.

Reglas de la rotonda en la carretera

Disminuya velocidad

Elija el carril de acuerdo con la salida

Ceda el paso al tráfico en la rotonda

No adelante en la rotonda

Esté alerta a los peatones y ciclistas

Permita que los vehículos de emergencia pasen

ROTONDAS FICTION FRENTE HECHO

@ FICTION

Las rotondas son inseguras

@ HECHO

Las rotondas son seguras. Ocurren menos accidentes y menos graves, 90% menos muertes y 75% menos lesiones.

En las rotondas, los conductores no pueden cruzar el semáforo o las señales de alto.

Las rotondas se pueden utilizar en varios tipos de intersección.

@ FICTION

Las rotondas son peligrosas para los peatones y ciclistas

@ HECHO

Las rotondas tienen hasta un 40% menos de incidentes con peatones y ciclistas.

@ FICTION

Rotondas causan retrasos en el tráfico

@ HECHO

Las rotondas ofrecen flujo vehicular sin parar ya que no hay espera en las señales de alto o semáforos.

Las rotondas tienen capacidad para 50% más de tráfico.

@ FICTION

Las rotondas son costosas

@ HECHO

Las rotondas reducen el costo de las señales de tráfico y su mantenimiento.

Durante los cortes de energía, la policía no tendrá que enviar oficiales para dirigir el tráfico.

@ FICTION

Las rotondas son malas para los negocios

@ HECHO

Los negocios cerca de las rotondas han visto un aumento en las ventas con más clientes que pueden fácilmente y con seguridad conducir, caminar o montar en bicicleta allí.

También las rotondas pueden ser un punto de referencia para un distrito de negocios o calle principal.

SR 519/Fiske Boulevard Corridor Planning Study Agency Meeting

SUBJECT: Agency Meeting with the SCTPO, City of Rockledge and FDOT

DATE: August 22, 2016

LOCATION: 2725 Judge Fran Jamieson Way, Building B, Viera, FL (Magnolia Room)

ATTENDEES:

Judy Pizzo – FDOT

Chris Cairns – FDOT

Pat O’Neill – City of Rockledge

Jim McKnight – City of Rockledge

Steven Bostel – Brevard County

Bob Kamm – SCTPO

Georganna Gillette – SCTPO

Amphone Soupharath – VHB

Rohan Sadhai – VHB

The SR 519/Fiske Boulevard Agency Meeting was held to discuss the recommendation for improving the intersection of Roy Wall Boulevard and Fiske Boulevard with a roundabout. FDOT began by reminding the group that the findings and recommendations from the Corridor Planning Study is for planning purposes only. The recommended improvements have been developed to support the goals and objectives envisioned along the corridor and have been presented and vetted by the project visioning team and the public. At this time, there is no commitment to implement these improvements. The recommended improvements will be further evaluated when the project advances to concept development and the information will be shared with the stakeholders. Following is a summary of main discussion points from that meeting:

- Roundabout Recommendation at Roy Wall Boulevard and Fiske Boulevard Intersection
 - The City of Rockledge expressed their concern regarding the safety and operation of the proposed roundabout and the preference for a traffic signal at this location.
 - VHB discussed the following statistics on how roundabouts generally improve safety and operation when compared to a signalized intersection.
 - *Roundabouts have been proven to reduce the number of fatal and severe injury crashes by 82% over a stop-controlled intersection, and 78% over a signalized intersection. Conventional intersections have 32 vehicle and 16 pedestrian conflict points, while roundabouts have only 8 vehicle and 8 pedestrian conflict points. Because there are no crossing movements in a roundabout, left-turn and right-angle crashes are eliminated.*
 - The City noted that there are no objections to the roundabout recommended at the intersection of Levitt Parkway and Fiske Boulevard.

- Traffic Signal at Roy Wall Boulevard and Fiske Boulevard Intersection
 - VHB and FDOT explained that based on the data collected at 31 locations along the corridor (intersections, segments and pedestrian crossings), and data provided by the City of Rockledge regarding the Health First Expansion, the intersection does not meet the requirements for a traffic signal.
 - VHB and FDOT explained the various warrants that are considered in a signal warrant analysis.
 - The City noted that Health First currently has 285 employees and will expand to 520 employees upon completion.
 - VHB noted that based on information provided, there are currently 485 employees and a proposed 510 upon completion of the expansion. Although the existing conditions numbers vary, the build-out numbers are generally within the same order of magnitude and will not change the future traffic conditions analysis.
 - The City also noted that there is a new development which has been recently been approved, located at the southwest corner of the Martin Road and Fiske Boulevard intersection. In addition, there are two new developments being proposed near this intersection, east of Fiske Boulevard.
 - The City also noted that Roy Wall Boulevard is currently being used as a detour route for the Barnes Boulevard widening project. VHB noted that the turning movement counts used in the study were collected prior to the construction of Barnes Boulevard.
 - FDOT emphasized that during the project kick-off meeting, three project visioning team meetings, and two public workshops, this is the first time this information has been communicated to the project team.
 - FDOT further noted that even with the new development, there was no guarantee that a signal would still be the recommended alternative. Based on FDOT's policy, a roundabout alternative must be evaluated on new construction and reconstruction projects. Evaluation is also required for all other types of projects that propose new signalization or require a change in an un-signalized intersection control.
- The discussion shifted towards a raised median alternative along the corridor
 - VHB reminded the group that during the first public workshop, the 60 to 70 attendees strongly opposed a median alternative and disliked the idea of losing left-turn access along the corridor. For that reason, the median alternative was not moved forward.
- The final recommendation from the meeting was to finalize the Alternatives Report with the current recommendations, and document the City of Rockledge and SCTPO opposition to the roundabout alternative at the Roy Wall Boulevard and Fiske Boulevard intersection.
- Next steps to address the operations at the Roy Wall Boulevard and Fiske Boulevard intersection would take place in the scoping of the project's concept development.
 - The scoping will include feedback from the City and SCTPO and will include additional data collection at the Roy Wall Boulevard/Martin Road intersection, to assess traffic conditions after the completed Health First expansion and the Barnes Boulevard widening project.
 - The scoping will also include provisions for a full traffic signal warrant study.
