

# S.R. A1A Drainage Improvements

## Brevard County

Financial Project Identification (FPID) No.: 448636-1

### Project Description

The Florida Department of Transportation (FDOT) is proposing to enhance drainage at three locations along State Road (S.R.) A1A in Cocoa Beach.

To help alleviate standing water in the on-street parking area of northbound State Road (S.R.) A1A at North 1st Street, the project plans to reconstruct the curb and add a drainage structure to better capture stormwater. The project would require temporary closure of the on-street parking.

On southbound S.R. A1A at South 1st Street, the project plans to reconstruct the drainage structure, sidewalk, and curb ramp to provide an improved crossing for pedestrians.

FDOT is also evaluating the northeast corner of southbound S.R. A1A at South 9th Street for possible drainage improvements.

This project is proposed to be constructed with the S.R. A1A Pedestrian Crossings project from Crescent Beach Drive to Minutemen Causeway (FPID No.: 445867-1).

### Project Status and Estimated Costs\*

Design:	Ongoing - completion late 2022	\$	155,000
Right of Way:	Within existing		—
Construction:	Funded - spring 2023	\$	357,000

\*subject to change
