

Fiske Boulevard (S.R. 519) Intersection Improvements at Roy Wall Boulevard/Martin Road

Brevard County

Financial Project Identification (FPID) Number: 446600-1

Project Description

The Florida Department of Transportation (FDOT) is proposing operational and safety improvements at the intersection of Fiske Boulevard (State Road (S.R.) 519) near the intersections of Roy Wall Boulevard and Martin Road in Rockledge.

Proposed improvements include realigning Martin Road 115 feet northward to align with Roy Wall Boulevard, creating a four-legged intersection. A new traffic signal will be installed at the intersection.

New pedestrian signals and crosswalks are planned to enhance visibility at the new intersection. Some segments of existing sidewalk approaching the pedestrian crossings will be replaced and newly constructed curb ramps will meet all current Americans with Disabilities Act (ADA) standards.

These improvements are designed to promote safe and efficient mobility through the intersection for all users.
